MARRIAGE LICENCES are of two kinds-(x) the Common or Ordinary Licence grantedby the Archbishops and Bishops, through their Surrogates. for marriage in any church or chapel duly licensed for marriages, (a) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 364). The Act of 1833 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes

a marriage is also guilty of felony. By a sub-sequent alteration in the law, the hours for marriage were extended, and they are now from

Sam. to 3 p.m.
GENERAL NOTES.—The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of

the diocese to perform the service.

A MARRIAGE CERTIFICATE is nothing more than a copy of the entry in the church register, and the customary fee is 28. 6d, and a stamp duty of zd. customary fee is 22. 60, and a stamp duty of xc. Searches in the register-books may be made on payment of small fees, viz., xc. for a single year, and 6d additional for every other year. There are small fees, regulated by custom, on the certifi-cate given of banns in one parish for marriage in another. MARRIAGE FEES are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a strangerclergyman be invited to perform the service

INFANTS cannot be lawfully married without the consent of certain persons. The law on the subject is to be found in the Guardianship of Infants' Act which came into force on Sept. 30, 1925. Where both parents are living both must consent; where one is dead, the survivor; or if there is a guardian appointed by the deceased, the guardian and the survivor. The Age of Marriage Act, 1929, prohibits any marriage where either party is under 16 years of age.

MARRIAGE LICENCES FOR ESTABLISHED CHURCH.

MARRIAGE LICENCES can be obtained in London practice of the Faculty Office (as Enight-rider St., Doctors' Commons, E.C.4), at the Vicar-General's Office (a The Sanctuary, Westminster, S.W.r.), and at the Bishop of London's Diocesan Registry (a Dean's Court, Doctors' Commons, E.C.4), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for London and all England and wales; those procured at the Vicar-teneral's Office (hours in both offices to to 4; Saturdays to to 3) are available for London and all England, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, ros. od. No premous notice is required and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies, according to the discesse, from £z zgs. to £z zss. 6d.
By the 4th George IV. c. 76, it is enacted, in
order to avoid fraud and collusion in obtaining licences for marriage, that before any such

licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some parts of the country it is necessary for the surrogate to procure the licence from the

Bishop's registry.)

SPECIAL MARRIAGE LICENCES (FOR ESTABLISHED CHURCH)

SPECIAL LICENCES are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must with his Grace's approval. Application must be made to The Faculty Office, 23 Knightrider Street, Doctors' Commons, E C. 4 (tel., 6834 Central). Fees for licence stamp, &c., £25.

BEFORE A REGISTRAR AND IN NON-CONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (z) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It

may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the par-ties live in the same or in different registration districts, and either party may give the notice. If both live in the same district, one of them

must have lived there for fifteen days before

In the nave have there for inteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential quali-fication, notice may be given in either district.

If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled and the other the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE).

After the lapse of twenty-one clear days from the date of the entry of the notice in the noticebook, the Superintendent Registrar may, pro-vided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

ISSUE OF CERTIFICATE AND LICENCE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his can then take place on any day within three calendar months from the date of entry of the

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

(x) Marriage by Certificate :-

a. If both parties live in the same district.—The certificate of the Superintendent Registrar of that district.

b. If they live in different districts:—A certificate from the Superintendent Registrar of each district.

(a) Marriage by Licence :- The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

PLACE OF MARRIAGE

The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the distant in which the notice is given; and if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, it may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (Guillet v. Guillet, 27 T.L.R 416).

MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m, with open doors. Each of the parties must declare as follows:— "I do solemnly declare that I know not of any lawful inpediment why I. A. B., may not be joined in matrimony to C. D."; and each of the parties must say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife for husband!" A wedding-ring may be, and is generally, used at a marriage at a register office.

MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the registered bundings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an "authorised person" (a person, usually the of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained

The parties must at some time during the ceremony make the following declarations.

"I do solemnly declare that I know not of any lawful impediment why I, A.B., may not be joined in matrimony to C.D"

Also each of the parties must say to the other—
"I call upon these persons here present to
witness that I, A B, do take thee, C, D, to be
my lawful wedded wife [or husband]";

or, in hen thereof -"I, A. B., do take thee, C. D., to be my wedded

wife [or husband]

NAVAL MARRIAGES ACT, 1908.

This Act provides that any officer, seaman, or manine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of themty-one clear day, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church

in which the marriage is to take place.

No marriage by licence can take place under

this Act.

MARRIAGE FERS.

For a marriage by licence the total fees are

£2 128. od.

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in

which they are generally known.

A marriage may take place at a registered building before a Registrar without religious cere-mony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue

in wates, and in places where the weish congress used, the declaration and contracting words may be said in Weish, as provided by Section 23 of the Marriages and Registration Act, 2837.

If both parties are Jews, they must give notice to a registration officer in the usual

way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is

If both parties are members of the Society of Friends (Quakers), or if, not being in member-ship, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district m which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Relaxations have been made by Marriage Prohibited Degrees of Relationship) Acts, 1907 to ross, which successively permitted the following marriages, i.e.,
With a deceased wife's sister.

Act--- 1907. deceased brother's widow. Act-1921. wife's brother's daughter. Act-regge. deceased wife's sister's daughter. do.

father's deceased brother's widow, do. mother's deceased brother's

widow. do. deceased wife's father's sister. do. do. deceased wife's mother's sister. brother's deceased son's widow. sister's deceased son's widow.

No clergyman can be compelled to solemuize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

During the lifetime of a person upon whose decease a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for a man to contract such a

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As

regards Scotland, the party there, after regards scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, One of the parties to the marriage only need be a British subject.

need be a Britian subject.
Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is soler-nized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

(a) That both parties are British subjects; or,

(b) If only one of the parties is a British subject, that the other is not a subject or

citizen of the country; or,
(c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,

(d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied-

(a) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,

(b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or, (c) That the leave of the Secretary of State

has been obtained.

The marriage must be solemnized by or before marriage officer as defined by the Act

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and resi-dence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their resideuce not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such mairiage officer

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner as if the party so

0 10 0

resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given, he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

- (a) That he or she believes that there is no impediment;
- (b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manuer provided by the Act, the marriage may be solemnized A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that dis-

trict; two or more witnesses are required to be

The following fees for marriages under the Foreign Marriage Act are payable to His Majesty's Government:—

registered by him

For certificate by a Marriage Officer of
notice having been given and posted
up in case of one of the parties residing
outside the consular district in which

Marriages may be solemnized 8 a m to 3 p.m. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonal be that of the Chuch of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzer are, in the absence of any foreign consular officer are, in the absence of any

treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinty or affinity would not be valid.

A marriage netween Christians in India may be proved in England by an India Office certifi-

cate (Braid v. Braid, 1909, as T L.R. 646).
Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of its Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiraty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF 1906 — Under the Marriage with Foreigners Act, 1906, any Britsh subject destrined to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicie in a foreign country will be recognised as valid by the English courts (re Green Noyes v. Pitkin, 1909, as T.L.E. sas).

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardiaus is necessary. It can be contracted by a male over xyears of age and a female over x- Marriages

may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 13 days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation of beans is only valid for three months. Under the Marriage Notices (Scotland) Act, 1898, a notice posted up in a conspicuous

Under the Marriage Notices (Scotland) Act, 1896, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Register's office is equivalent to the proclamation of banus. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registral issues a certificate: fee, 28 of Such certificate of publication is only valid for three months. Under the Naval Marriages Act, 1908, launs may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a

certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in mediaval times, Scotland having diaregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (a) by exchange of consent before two witnesses (called in legal language per verba de present); (a) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, subsequente capula); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (a) by constant itying together as husband and wife (called marriage by habit and repute), i.e., the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for ar days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in

1856 by the Act 29 and 20 Victoria, Chap. ed. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5s. xd. The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Seasion.

Marriage with a foreigner may be solemnised regularly if one of the parties has a residential qualification and provided that one party has resided in Scotland for ar days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for ar days.

MOTOR LAW.

The modern Charter of Motor Law is the Road Traffic Act 1930 and Regulations made thereunder by the Minister of Transport. This Act not only consolidated the law by repealing some thirty earlier Acts, but made numerous amendments and new provisions to keep abreast with the rapid development and modern universal use of motor vehicles.

Boine of the new features are Compulsory Insurance against Third-party risks; abolition of speed limit for ordinary private car; publication of a "Highway Code"; physical fitness for driving licence. The following provisions of the law have been selected for special reference in

these notes.

Driving Licence.—As to fee, &c., see p. 549. No person to drive without a licence, nor employ a person to drive who is not licensed. To be produced to police constable on demand; but no conviction if heence produced at a police station within five days. On application for licence declaration must be made as to any physical disability, &c., certain disabilities will involve refusal of licence.

Speed Limits.—The Act prescribes Speed Limits for various classes of Motor Vehicles but for ordinary passenger motor cars (adapted to carry not more than seven, excluding driver) there is now no speed limit. But heavy penalties may be incurred for driving recklessly or at a speed or in manner dangerous to the public having regard to all the circumstances, nature and condition of road, amount of traffic

at the time, &c.

Pillion Riding.—Only one person (pillionaire)
on a motor-cycle in addition to driver, and then
only on proper seat securely fixed behind the

duver.

Third Party Insurance.—No person may use, or permit to be used, a motor vehicle unless covered by a Policy of Insurance in respect of third-party risk. There is to be a "Certificate of such insurance, and this certificate of insurance must be produced by a driver to a constable on demand. Under the Regulations of Transport Ministry an applicant for a car license under the Finance Acts must with his application produce to the Licensing Authority his Certificate of Insurance.

Highrest Code.—The Minister of Transport has compiled a Highway Code as authorised by the Act. It is issued with driving licence, and copies may be obtained from H.M. Stationery Office or booksellers, price rd. The code is

intended as a guide to persons using the road, and may be revised from time to time. Failure to observe any provision of the code is not an offence of itself, but it may be relied on as tending to establish or negative the liability of a party in any proceedings—whether civil or criminal.

Accidents.-In the case of an accident causing damage to any person, vehicle or animal, the driver of the motor vehicle must stop, and on request of any person having reasonable grounds for so requiring, give his name and address and identification of his vehicle. If this is not done on the spot then the accident must be reported at a police station or to a constable as soon as possible, and in any case within 24 hours.

NOTE.—From January z, 1932, every motor vehicle, but not motor-cycle, must be fitted with a reflecting mirror.

PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and enclosed in a cover addressed to "The Passon enclosed in a cover addressed to "the Passport Office, "Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S. W. z," or to "The Branch Passport Office, 35 Dale Street, Liverpool "The charge for a Passport 10 75.60. Passports are issued in London between the hours of xo and 4 (Saturdays, so to s), and in Liverpool, 9 30 to 4 (Saturdays, 9.30 to s). The Passport Offices are closed on Sundays and Tublic Holidays (except in London between the hours of ro a m. and noon for cases of special emergency only). Pass noon for cases of special emergency only). Pass ports may be obtained through the post if a Postal Order for 7s. 6d., which should be crossed, made payable to the Passport Office, is forwarded with the application. Cheques, treasury notes or postage stamps should not be sent in payment. Application should, if possible, reach the Passport Office not less than four days before that on which the Passport is required. that on which the Passport is required

Foreign Office Passports are granted (1) to natural-horn British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions of Colonies, or in India.

The wife of an alien is deemed to be an alien. Passports are granted (x) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regula-tious, verified by a Declaration made by a member or official of any Banking Firm established in the United Kingdon, or by any Mayor, Mayatrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Soluctor, Notary Public or Chartered Accountant, resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers ; (a) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Passport Office : (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned. Persons naturalised or

ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office

If the applicant for a Passport be a British subject by naturalisation, the Certificate of Naturalisation must be forwarded to the Passport Office with the Declaration or letter of recommendation. British subjects by naturalisation will be described as such in their Passports, which will

be issued subject to the necessary qualifications.
British Passports are only available for travel
to the countries maned thereon, but may be
endoused for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any Immigration Regulations in force in British or foreign countries, or from the necessity of obtaining a was where required

Passports endorsed as valid for the British Empire are also ave'lable for travelling to termtory under Britith protection or mandate, not, however, including Palestine or Iraq, for which countries special endorsements must be obtained

Foreign Office Passports are available for five years from the date of issue, unless otherwise stated. On the expiration of their period of validity they may be renewed for further consecutive periods of one to five years. In no circumstances are they available beyond ten years from the date of issue. Thereatter, or if at any time the Passport contains no further space for visas, application must be made for the issue of a new Passport.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Empire, to the nearest Passport issuing authority.

Persons resident in the Irish Free State should make application for their Passports to the Passport Department, Ministry of External Affairs, Dublin.

CERTIFICATION OF PHOTOGRAPHS.

Note -- It is essential that one of the two photographs of the applicant (and wife, if to be included on the Passport) should be certified on the back as shown on the Application Form.

Safe Custody of Passports.

Pas-ports, when not in use, should be kept in a secure place At the expiration of the period of validity a Passport should be returned to the Foreign Office.

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for ros or

For INTEREST on pledges not exceeding 40s ,

for every 25. or part of 26., per month ... 1/d. And after the first month any time not exceeding 14 days to be charged as half a month

FORFEITURE.-Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker. Pledges above row, if not redeemed within twelve calendar months and seven days from the

day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit-ie, the loan and profit and as per

cent, on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same

When the loan is 5s or under, the charge on form of declaration is one halfpenny, when the

loan is above 58, one penny SPECIAL CONTRACTS.—A pawnbrokei may make

a special contract with a pawner in respect of a a special contact with a pawner in respect to a pledge on which the pawner water a loan of above 40s, provided that—

(r.) The pawner at the time of the pawning

shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker
(2) The duplicate of the special contract pawn-

ticket shall be signed by the pawner
The pawnbroker may also charge:—For ticket,

profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special con-tract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as in the case of ordinary pledges for more than xos.

POOR LAW.

The Poor Law in England and Wales is now administered through Public Assistance Committees, constituted for Counties and County Boroughs, which take the place of the old Boards of Guardians The law is consolidated in the Poor Law Act, 1939.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c . received

VACCINATION.

In England and Wales vaccination is compulsory within six months from birth, the obliga-tion to comply with the law being imposed on the parent or other person having custody of the child. The local Public Vaccinator (a doctor appointed by the local authority) will must vary to suit different cases, the following directions may be found useful to those who, doctor appointed by the local authority) will in cases of emergency, are called upon to draw vaccinate free of charge. Penalties are incurred up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who

Exemption may be obtained if a parent, within four months from the birth, makes a declaration that he conscientiously believes that vaccination would be prejudicial to the health of the child.

WARD OF COURT.

By appropriate legal process an Infant may be made what is termed a Ward of Court in the Chancery Division of the High Court. In this way judicial control of the Infant may be secured, the court assuming and exercising wide secured, the court assuming and exercising whoe
powers in respect both of the person and
property of Wards of Court. Legal advice will
obviously be necessary as to the circumstances
in which an order might be made in any particular case.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty m most cases, and is safer in every case, to pro-tect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die mtestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide The help of a lawyer in anxious to provide The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. Assuming a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be often repeated. Sounding phrases are entirely out of place Avoid the use of "legal terms," such as "heirs" and "issue, when the same thing may be expressed in plain language. If m writing the will a mistake be made, it is Before a will is better to rewrite the whole. executed, that is, signed by the testator in presence of two unlesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. A will should be uritten in whand ery legibly on a single sheet of paper. Although, of course, forms of wills must vary to suit different cases, the follow-ing directions may be found useful to those who, TESTATOR OR TESTATRIX .- The person who

maker be a woman, the testatrix.

ESTATE.—By this word is to be understood
property of all kinds, both real and personal.

Real property includes tithes and advowsom, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like.

RESIDUARY LEGATERS.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of m legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been

To Begin A Will.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks.

To End a Will. —After disposing of the property, 10 ENDA WILL.—After disposing of the property, the will may be ended as follows.—"And I hereby appoint the said — sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this — day of —, 30—

EXECUTION OF A WILL AND WINNESSES —The

testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or left a legacy or state of resulten in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will

Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found

sufficient

Signed by the testator [or testatrix, as the case may bel, in Thomas Smith the presence of us, both present [Signature at the same time who in his for her] presence and in the presence Testator. of each other have hereunto set our names as witnesses.

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street,

of

Reading, Esq
It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, m his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us. who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."
If the testator be blind the will should be read aloud to him in the presence of the witnesses. and the fact mentioned in the attestation clause.

makes the will is the testator, or if the willmaker be a woman, the testatrix.

ESTATE.—By this word is to be understood present, then the attestation should be:—"The present, then the attention should be:——The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great different accountaged in a continue of the second continues of the second cont difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

CODICIL.-When any change is required to be made in the disposition of property a stated in the will the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to a content snound begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

Executors.—It is usual to appoint two executors, although one is sufficient. The name and tors, although one is sufficient. The name and address of each executor should be given in full. as follows .—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will " An executor may be a legatec. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

Appointment of Trustees—The form of ap-

pointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. Sec PUBLIC

TRUSTER, post.

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:— "I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of a years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of az years or being female attain that age or marry, of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which then parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her inte for during her widowhood), and after her death for second marriage, which first happens] upon trust in equal shares for all or any my children or child "&c. as before The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY—A minor cannot make a will. A married woman (married since January z, 1893) may dispose by will of any real or personal property as her separate property as if she were a feme sole (Married Women's Property Act, 188s, s. z(z)) As to the powers of a woman married before that date it is advisable to con-

sult a solicitor.

REVOCATION .- A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking pievious testamentary disposi-tions), or by burning, tearing, or otherwise de-stroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of mairiage (Law of Property Act, 1925, 8. 177); so that after marriage the old will should be reacknowledged, or a new one made.

LAPSED LEGACIES —If a legatee die in the life-time of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator For instance, if a share of residue is left to "all my children hving at my wife's death." the share of a child who died in the wife's lifetime would lapse even though the child should

leave issue

TO ONE PERSON ABSOLUTELY .- When it is the as for instance a wife or child, the will may real.—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith,

absolutely ' TO CHILDREN UNDER AGE -When estates are left wholly or in part to children under the age of az years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual meonie for their maintenance A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted. DUTIES OF EXECUTORS.—After the death of the

testator, the duties of the executor are briefly as testator, the duties of the executor are briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way, then to make lists of the delts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. (For scale of duty see Index, "Estate Duty.") Under the Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have terest, even though the property may not have been under his personal control. The executor must take the will to the Principal Probate Registry, Somerset House, or to the local Dis-

trict Probate Registry, or to a solicitor, and prove the will. Collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to advertise in certain London personal manify to advertage in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. All the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will. or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administra-tion may be obtained through an Liland Revenue Office.

ADMINISTRATORS -If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL

To find a will proved before Jan. 1, 1858, the date on which the Court of Probate Act, 1857 (so & sr Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or a District Registry In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually read by a bout Registry. This index is usually ready by about October of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (minety words) for an ordinary copy, and ninepence a folio for a certified copy, which can be produced and read in any court of law. The sp District Probate Registries established by the Act of 1857 are at :—Bangor, Birmingham, Blandford, Bodmin, Bristol, Carlisle, Carmarthen, Chester, Durham, Exeter, Gloucester, Ipswich, Lancaster, Leicester, Lewes, Lincoln, Liverpool, Llandaff, Manchester, Newcastle-upon-Tyne, Norwich, Nottingham, Oxford, Peterborough, Shrewsbury, Taunton, Wakefield, Winchester, York.

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of living persons at Somerset House. the wills of thing persons at somerset thouse.

A will may be deposited personally, or through
the Registrar of a District Registry, who will
transmit the will to London in a registered
letter. The fee is 1.5r, with an additional 5s.
if forwarded by a District Probate Registrar. A will once deposited will not be given up to anybody, but must remain in the registry until any local, but must remain in the registry intil the testator dies. Any will appointing the Public Trustee as Executor may be deposited with him for safe custody. (See Public TRUSTEE, post.)

PROBATE OF WILLS.

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 4 The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the

If there be no will or no executor be appointed, or the executor will not act, two sureties must be obtained to enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, when one surety only will be required. They need not attend upon the first visit.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Application may be made at a District Probate Registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout

Where the deceased has left no will, and the whole personal estate does not exceed £100, the wildows, or children, if residing at more than three miles from any Probate Registry, may apply to the Registrar of the County Court.

Scotland.—"Confirmation" is the Scotlish equivalent of Probate. That is obtained in the

Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor

declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed no Scots (£8 6s. 8d. sterling). A will may be eithe. (1) holograph, i.e., written by the testator himself, in which case no witnesses are necessary; (2) tested, which means that it is signed in presence of two witnesses. It is not signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

TRUST FUNDS AND INVESTMENTS.

By the Trustee Act, 1925 (which came into force on Jan. 1, 1926), a trustee may invest trust funds in (a) any parliamentary stocks or Government securities of the United Kingdom; (b) on real or heritable securities of the United Kingdom; (c) in stock of the Bank of England or Ireland; (d) in India 7, 5½, 4½, 3½, 3 and 2½ per cent. stock or other stock issued by the Secretary of State for India charged on Indian revenue, (e) in securities the interest of which is guaranteed by Parliament; (f) in Consolidated Stock of the Metropolitan Board of Works, or of Stock of the Metropolitan Board of Works, or of the London County Council, or Debenture Stock of the Receiver of Police, or Metropolitan Water Stock; (q) in Debenture, Guaranteedor Preference Stock of any railway in the United Kingdom incorporated by special Act, and having paid a dividend of not less than 3 per cent. on its Ordinary Stock for 10 vears; (h) in United King-dom Railway Stock when the railway is leased in Descripting to any railway such as that menperpetuity to any railway such as that mentioned in (g) supra; (i) in Debenture Stock in Indian Railways; (j) in "B" annuities of the Eastern Bengal East Indian, the Scinde, Punjaub and Delhi, Great Indian Peninsula and Madras nominate of nucley. An executor and period and period annulties in the his will. An Executor dative is one appointed by the Court (r) in the case of intestacy or (a) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be

ment, or upon the capital of which the interest ment, or upon the capital of which the interest is so guaranteed; (?) in the Debenture or Prefer-ence Stock of any Water Company supplying water for profit, and incorporated by special Act or Royal Charter, which has paid a dividend of not less than 5 per cent. on Ordinary Stock for to years; (m) in the nominal or Inscribed Stock of any Municipal Borough in the United King-dom having a population of more than 50,000, or of any County Council; (a) in the Nominal or or any council; (w) in the Monlinal of Inscribed Stock of any commissions supplying water by statute, and having power to levy rates over an area embracing not fewer than 50,000 persons, provided the rates for 10 years have not exceeded Se per cent. of the amount authorised to be levied; (a) in Stocks authorised under the Colonial Stock Act, 2002; (p) in local bonds issued under the Housing (Additional Powers) Act, 2019; (q) in any Stock or Securities issued in respect of any Government loan in Northern Ireland; (r) in Stocks, &c., authorised for the investment of cash under the control of the Court. All such investments may be varied. As regards railway investments, the L & N.E. Ry., the S.Ry., the L M. & S. Ry., and the G.W. Ry., are to be treated as if they were a company which had in each of the ten years before amalgamation paid a dividend of not less than 3 per cent, on its Ordinary Stock. All the Stocks above mentioned may be purchased, although they are redeemable, and the price exceeds the redemption value; but as to those mentioned in paragraphs (y), (i), (k), (l), (m), (v), (p) and (q), appra, if any of them is liable to be redeemed at par or at some other fixed rate, a trustee may not purchase (a) at a price exceeding 15 per cent. above par or such other fixed rate; nor (b) if the atock is liable to be so redeemed as aforesaid within 15 years of the date of purchase at a price exceeding its redemption value. 66 3 to xx of the same Act contain various important provisions as to the rights of trustees in the matter of investing trust monies.

of investing trust monies.

As to the investments permitted by The Rules of the Supreme Court, 1888, see "Whitakke" for 1937, p. 254, where The Trusts Amendment Act, 1884, (Scolland only), The Colonial Stock Act, 1900, and The Housing (Additional Powers) Act, 1919,

are also noted.

THE PUBLIC TRUSTER.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well main-tained. The value of the trusts accepted up to March 31, 1931, was £313,878,729.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal in-terview. Upon his assenting to act, his appoint-ment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or

jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee. the expense of fresh appointments is saved. His integrity is gnaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of

investment

As regards investments, the Public Trustee, like a private trustee, is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts or under the general law. See Trust Funds ante. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to defray the expenses of the Department and no more

ent and no more A profit is not intended.

An interview with the Public Trustee or with any of his senior officers can be arranged at

any time.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C. 2 (tel., Holborn 4,300), or at any Post Office.

There is a branch office in Arkwright House,

Parsonage Gardens, Manchester.

WIRELESS RECEIVING LICENCES.

HEAVY penalties are prescribed by the Wireless Telegraphy Act, 1904, on conviction of the offence of establishing a wireless station, or installing or working wn eless apparatus without the Postmaster General's licence Licences for receiving broadcasting programmes and messages sent for general reception can be obtained at any post office on payment of the fee of ros.

STATISTICS OF PASSENGERS PER DAY AT LONDON TERMINI (1930).

The succession to the property of a person dying Intestate on or after January 1, 1926, is regulated by The Administration of Estates Act, 1925, which repealed the old law and established one new Code applicable both to Real Estate (land, &c.) and Personal Estate (leaseholds, chattels, investments, &c.). The Act abolished the rule of Primogeniture (inheritance by eldest son), the rights of dower (widow's third) and of curtesy (husband's life interest), and all special customs (e.g. gavelkind and Borough English). As to Personal Estate: Parents were placed on an equal footing; a mother regained her ancient preference over an intestate child's brothers and sisters; relatives of the whole blood obtained priority over those of the half blood; and relatives more remote than first cousins were excluded from the distribution. "The widow's £500" under the Intestates Estates Act, 1890, was increased to £1,000, whether there be issue or no issue, and given also to a husband; whilst the widow or husband now also takes all the "personal chattels."

TABLE OF EXAMPLES

Important.—Note.—By Section 46 of the Administration of Estates Act, 1925, a surviving husband or wife takes absolutely (i) the "personal chattels", and (ii) £1,000 free of death duties and expenses. The "residue" is then distributed as indicated in the Table.

"Personal chattels" are:—Anticles of household use or ornament, &c (not used for business

purposes).

In each instance it is supposed there are no nearer relations than those named. If the Intestate leaves. The Estate is distributed as follows -One half to widow (or husband) for life, and x Widow (or husband), and children . . . then to children equally. Other half to children equally at once

2 Widow (or husband), and father and mother

- 3 Widow (or husband), and either father or mother, not both
- Widow (or husband), and brothers or sisters of whole blood
- Widow (or husband), and brothers or sisters

- 22 Any other relation than those named in preceding examples (e g. Great grandparents)

The Crown. and no widow or husband

Notes — The life interest of a husband or wife may be redeemed by payment of a lump sum.

In ascertaining the persons entitled to take, regaid must be had to the operation of "the statutory trusts," i.e. The relative must have attained or attain the age of zz or have married or marry under that age.

Taking per stripes is taking by descent or representation. Thus, in Example 6 nephews and nieces take amongst them the share which their deceased parent would have taken if he or she had survived the Intestate.

Since January 1, 1927, in certain circumstances the mother of an illegitimate child, may succeed to real or personal property on the intestacy of the other. (Legitimacy Act, 1926, 8. 9.)

Intestates' Estates, Scotland.

I.-MOVABLES.

In each instance it is supposed there are no nearer relations than those named.

By the Intestate Husband's Estate (Scotland) Act, rgrr, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value; if over that amount she takes £500 out of the heritable and movable estate rateally before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

Nephew by brother, and nephew	All to nephew by brother.
by half-sister)
1	1

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, i.e., share it with the other next-of-kin and thus get an equal share of the mixed estate.

* Per capita means by the head; per stirpes means inheriting through a parent deceased.

**Manables is here per capita divide into as many shares as there are children. Where representatives

at a deceased parent take per stirpes they take equally amongst them the share that would have
fallen to the deceased had he or she survived.

II.-HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors."

In each instance it is supposed there are no nearer relations than those named.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1821, and the Scale thereunder, but the Act allows an option to a solicitor of declining to adopt it. It chiefly walkers to color water the solicitor of the solicit to a solicitor of declining to adopt the tententy relates to sales, purchases and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgaree's (not mortgaree's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £300 is per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. Charges are now subject to an increase of 33% per cent.

Scotland - Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Frees for litigation are regulated by the Court of Session. The tables of fees are published in The "Pailianent House Book" and in "The Scottish Law Directory. When a solicitor sues for payment of a pro-fessional account it is remitted to the Auditor of the Court for taxation of his charges.

MEDICAL FEES.

The following are the charges usually made by General Practitioners:—

GANERAL	RENTAL (OF PATIENT'S HOUSE)				
PRACTITIONI RS.	Lio to £25.	£25 to £50	£5010 £200		
Ordinary Visit . Night Visit . Mileage beyond two	Pouble an	5s to zos 6d rdinary visi	7н 6d to 158 t.

Attendee on servants Midwifery	54. 11 (18	58 zi to 41 Gs.	58 to 78. 6d		
Adminstring Chlfrm Consultants	!	zł Ga.	3 (19		
Advice or Visit alone Advice or Visit with		3 Gs zi to 3 Gs.	3 (is		
anotherPractitioner Mileage beyond two miles from Home		158	158		

Special visits— $\iota \ c$, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. he himself is called in in consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond

the first

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well; but if the

illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is

the same as to himself. Certificates of health are to be charged for same

as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required

Medical bills are commonly rendered once or twice a year.

STOCKBROKERS' CHARGES.

The Rules and Regulations drawn up by the London Stock Exchange "Committee for General Donoton Mock Exchange Communication Contents
Purposes are very voluminous and technical.
The customary scale of brokerage is s. per £100
on British (with some exceptions) or Foreign
Government or American dollar stocks, and ros. Government or American dollar stocks, and ros. per £roo on British Railway registe ed stocks. On shares not exceeding zgs. the brokerage is x/d. per share; not exceeding zos., zd. per share, not exceeding zos., zd. per share, and so on. There are minimum charges of ros ou less than £roo and £1 on over £100.

ACCOUNTANTS' CHARGES.

The following scale of fees is generally applicable, but for special work fees are usually a matter of negotiation:—

Company Audits.—Fee fixed by Shareholders in

General Meeting.

Preparing Balance Sheets, Investigating Accounts, &c.—Principals' time, per day of seven hours, 5 to 10 Gs. Managing Clerks (if Charhours, 5 to 10 Gs. Managing Clerks (if Chartered or Incorporated Accountants), 3 to 5 Gs.; (not Chartered or Incorporated Accountants), 2 to 2 / Gs.; other Clerks, 2 G. and upwards. If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

Receivers, Liquidators and Trustees in Bank-ruptey.—Usually by percentage on realisation of assets and dividends paid

Voluntary Liquidators — Usually fixed by the Company in General Meeting.

ARCHITECTS.
Fees on New Works.—For taking the Client's mstructions, preparing sketch design, making approximate estimate of cost by cubic measurenent, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(a) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £3,000 the percentage is to be so per cent. in the case of works costing £300 graduated to 6 per cent. in the case of works costing £3,000 as the special character of such works may render

appropriate. Alterations and Additions.—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c .- In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works.—In addition to the per-centage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out. Partial Service.—If the project or part of it

be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows :-

(a) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such

works.

(b) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated

cost of such works.

Instalments.—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclamable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments

from time to time as the work proceeds.

Work Executed with Old Materials, &c —In
all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the ercentage shall be calculated as if the works had been executed throughout by a Contractor,

and with new material.

Services Not Included in Percentage.-The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved :-

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and

plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to, the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground laudiords, adjoin-ing owners, public authorities, or others, and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services conse-

quent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire, flood, or tempest during the execution of the works, and services in con-nection with the planning of grounds or gardens.

Housing Schemes and Laurng Out Estates.— The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries,

and the Scottish Board of Health.

Approval of Lessec's Plans — For approving plans submitted by a lessee and for inspecting plane submitted by a lease tain an inspecting the work during its progress so far as may be necessary to ensure the conditions being ful-filled, and certifying for lease when required, the charge is as follows :-

For each £ 100 or part of £ 100 of the total cost up to £ 500, 2½ per cent. (minimum fee,

AS 38.1.

For each £zoo or part of £zoo from £zoo to £5,000, 1% per cent.

For each £zoo or part of £zoo above £5,000,

Litigation and Arbitration.—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court of before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect

I and Surveying and Leveling.—For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause az.

Sanitary Surveys.—For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause ar, the minimum fee being £3 38., in addition to the cost of assistance and ap-

pliances.

Expenses. - The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

QUANTITY SURVEYORS.

1.-ARCHITECTURAL WORK. Note.-In cases where any of the materials used in construction are supplied by the building owner the percentage charge is based upon the estimated or actual value thereof.

Lump Sum Contracts.

(a) Taking out and preparing Bills of Quantities:—2½ per cent. upon the estimated cost of the work up to £5,000; a per cent. above

- £5,000.

 (b) Pricing out estimates:—½ per cent.

 (c) Measuring and making up account of variations upon contracts including pricing —2½ per cent. upon the amount of the gross additions, and 1½ per cent. upon the amount of the gross omissions.
- (d) Preparing approximate estimates:—½ per cent. upon the estimated cost.
- (e) Surveying work in progress, taking par-ticulars, and reporting for Interim Certificates:— 1/2 per cent. upon the amount of the valuation

(f) Taking particulars on site and writing specifications for works of alterations or repair, including supervision if required:—7½ per cent. on the amount expended or alternatively a charge based upon the time involved.

Schedule Contracts

(a) Preparing, pricing and agreeing a schedule of prices .- 1/2 per cent. upon the cost of the work.

(b) Measuring, bringing to account and valuing work done. - 21/2 per cent. upon the gross amount of the account.

II .- ENGINEERING WORK.

Lump Sum and Schedule Contracts. Percentage charges half those for architectural work but the same scale in respect of charges based upon time

III .- LITIGATION AND ARBITRATION.

For qualifying to give evidence, settling proofs, conferences with solicitors and counsel, attendance in courts or before arbitrators or other tribunals, and for other services in connexion, the charge is based upon the time involved, with a minimum of 5 guineas per day.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

CONSULTING ENGINEERS

On Constructional Work the payment is usually a commission upon the estimated or actual cost of works covered by the Engineers' Specifications and (or) Drawings, or alternatively an agreed The total commission is normally 5 per cent. unless such cost be less than £10,000, when remuneration is at a higher rate or by an agreed fee. Additional fees (usually 3 per cent. increase) are payable for Reinforced Concrete work.

For Quantities and Accounts (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is

1½ to 1½ per cent. or an agreed fee.

A copy of Professional Rules and Practice and Scale of Fecs may be obtained (price zs) from the Hon Sec of the Association, xx, Victoria Street. Westminster, S.W. 1.

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

1. Sales by Auction.

Freehold, Leasehold, and Comphold Properties, including the preparation of particulars, and advising as to reserves:—On the first £300, a per cent., on the next £4,700, a per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On amounts paid by the purchaser for Chattels, Fratures, Fittings, Trade Stocks, and other Monable Effects, Tymber, and Transfer in the small transfer.

Timber, and Tenant-right under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and s½ per cent. on residue, to include inventory and valuation.

Where the division of an Estate into a number

of lots involves substantial additional work, increased remuneration as arranged between the

Vendor and Auctioneer.

Sale before Auction,

After issue of advertisements, the same scale as by auction.

Non-Sale.

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary com-

mission then payable.

Furniture, Trade Stocks, and Chattels, on the Vendor's Premises.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery —5 per cent. on the amount realised, exclusive of preparation of catalogues.

catalogues.

Live and Dead Farming Stock (except Horses, Pedigree Live-Stock, and Milk-Recorded Cattle, Dedigree Live-Stock, and Milk-Recorded Cattle, on dead stock, on the amount realised.

Horses, Pedigree Live Stock and Mik-Recorded Cattle.—5 per cent. on the amount realised.

On Lots referred to in the last four varagraphs, reserved or bought in by or on behalf of the vendor.—One half the commission on sale, calculated on the name of caseria or burner, calculated.

the amount of reserve or buying-in price.

2. Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases.—On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, x½ per cent.; and a commission, in addition, on the amount paid for Chattets, Fixtures, Futures, Future, Future, Future, Trade Stocks, and other Movable Effects, Tunber, and Tenant-right, of 5 per cent. up to £500, and \$1/2 per cent. on the residue, to include inventory and valuation

NOTE.—In Sales by Auction and Private Treaty Sales.—Where two Agents are co-operating at the request of the owner, the commission shall

be at the rate of a scale and a quarter.

3. Purchases.

Freehold and Copyhold Estates and Houses, and Ground Leases .- One-half of the scale for and Ground Leases.—One-nair of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but includ-ing inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guines per cent. on first $\sharp_{1,000}$; half a guines on next $\sharp_{9,000}$; and a quarter of a guines per cent. beyond on the value of the property. Minimum fee, $\sharp_{5,5}$ s.

4. Lettings.

Business Premises, Unfurnished Houses, Flats, Business Premises, Unfurnished Houses, Flats, dc., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise.—
If the annual value be £100 or less 5 per cent. on one year's rent, where the term is for one year or less, and 7½ per cent. on one year's rent where the term is for more than one year. If the annual value be over £100 the above scale shall amply to the first £100 and on the excess shall apply to the first £x00 and on the excess rental over that amount, where the term is for three years or less, g per cent. on one year's rent; where the term is for more than three years, 1% per cent. on one year's rent; in the case of leases requiring the lessee to repair the demised premises requiring the lessee to repair the demised premises the commission is ro per cent. on one year's rent, whatever the term. Upon the premum or consideration (in all cases), 5 per cent. up to £1,000, and s1/2, per cent. on the residue; and the commission on any sum obtained for fixtures, furnitures, or effects of any kind, of 5 per cent. up to £500,

and sig per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to 'et or sell, is let by him with an option to purchase, and the tenant afterwards exercises his option, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation. -Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.—s per cent. on the first year's rental, and

3/2 per cent. for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.

-Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects. - A minimum fee of two guineas

per day, exclusive of expenses.

GERMANY'S "POCKET BATTLESHIPS."

Germany is building 5 "Pocket Battleships" Gernany is building 5 "Pocket Battleships" of 10,000 tons displacement, heavily armoured, 50,000 h p., with 6 17-in. guns (670 lb. projectile), 8 of his guns, and 4 3'5-in. guns, with 6 torpedo tubes. "A" (Breatz Preussen) was laid down at Kiel early in 1930, and "B" was voted by the Reichstag in May. The designed speed of these ships is 26 knots, with a cruising area of 10,000 sen miles (at 20 knots).

FLEETS OF THE MARITIME POWERS (March, 1981).

NOTE.—As a result of the London Naval Conference (Jan. 22-April 25, 1930) the British Empire, the United States and Japan undertook to proceed at once with the reduction of their capital ships, and all five Powers agreed to waive (during the years 1932-1936 inclusive) the right to replace obsolescent ships granted by the Washington Treaty.

APPLITIK STEPP

In 1907 the "Old Constitutional Force" known the "Militia" was transformed into the In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1992 the terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored, but no appointments are at present made to the force.

Militia in the War.—At the outbreak of the Chart Was all units areas are before the terms of the control of the co

mutta is the war.—at the outsiress of the Great War all units were embodied, the majority being included in Defence Schemes. One or two units served abroad, but, generally speaking, the units were employed as training and reinforcing centres for the Armies in the field.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Yolunteers" were transferred into the Territorial Force, which included English, Welsh, and sorce, winch included English, Welsh, and Scottish (avalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; In-fantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

Territorials in the War .- The strength of the Territorial Force in July, 1914, was about sog, occ. During the Great War 3re new units were formed, and there passed through the ranks of the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers and nearly 600,000 other ranks, of which some 5,500 officers. and zof,ose other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

OFFICIAL END OF THE WAR.

The Official Termination of the War, when Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921. The Ottoman Empire was excluded from the Order in Council, and War with Turkey was declared at an end on August 6, 1924.

8, Dean's Yard, Westminster, S.W. z.

(Hours to to g.)
Sessions of the Church Assembly in rare. Feb. 1-5; June 13-17; Nov. 14-18.

MEASURES PASSED BY THE ASSEMBLY, 1931.

(Date of Royal Assent is shown in brackets.)

Beclesiastical Commissioners (Loans for Church

Training Colleges) Measure, 1931
(March 27, 1931)
Episcopal Pensions (Sodor and Man) Measure, 1931(March 27, 1931 Benefices (Exercise of Rights of Presentation Measure, 1931 (July 8, 1931

(July 8, 1931) Ecclesiastical Commissioners (Provision for Unbeneficed Clergy) Measure, 1928 (Amendment) Measure, 1931(July 8, 1931)

THE CHURCH ASSEMBLY (or "National Assembly of the Church of England") was established in 1920, "to deliberate on all matters concerning the Church of England and to make provision in respect thereof." The Assembly consists of three Houses, composed of Bishops, Clergy, and Laity respectively. The first two Houses consist of the Convocations of Canterbury and consist of the convocations of canterbury and York, of which the respective Upper Houses form the House of Bishops, and the respective Lower Houses the House of Cleryy; the House of Laily comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conferences, who consist mainly of representatives elected, either directly or indirectly, by members of the Church of England

on a roll prepared in each parish.

The Church Assembly is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters, but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the manner prescribed by the Church of England Assembly (Powers) Act, 1919, otten referred to as the "Enabling Act." It is specially provided that any innovation touching doctrinal formulæ, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rites thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement pur-porting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right

of their episcopal office.

Parochial affairs are managed by Parochial Church Meetings of parishioners who are members of the Church of England and by Church Councils elected by such meetings.

General Statistics.-The number of baptisms in 1929 was 427,258, the Easter communicants in the various English Diocesea numbered 2,443,887. The total gross income of za,824 incumbents was £4,65,95,95, including £29,807 contributed as Easter offerings. The stipends of the assistant clergy were £2,022,732. The amount of voluntary parochial contributions in the 43 diocesses of England was £6,928,881, and the total from all sources £9,873,765.

ST. PATRICK'S NATIONAL CATHEDRAL. DUBLIN.

Dean and Ordinary, Very Rev. Hugh Jackson Lawlor, D.D., Litt.D.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives (viz., see clerical and 416 lay). Honorary Secretaries, Ven. C. K. Irwin, B.D.; Very Rev. H. B. Kennedy, B.D.; J. A. Maconchy and Major E. H. C. Wellesley.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude, ga St. Stephen's Green E. Dublin; Asst. Sec. Rev. J. H. Yates, B.D. Chief Accountant—George B. Butler.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, the Sovereign, as one of its members, being supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annulant Rights and Clerry (the annulant Rights and Clerry (the annulant Rights and Clerry (the annulant Rights and Clerry (the annulant Rights and Clerry (the annulant Rights). of the annuitant Bishops and Clergy (the annuities provided were commuted for a capital sum). the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are so Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops

funds, subject to the General Synod.

The first property it held was the capital sum \$\frac{1}{2}\sigma_{2

Since 1869 members of the Church have paid clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nonsnaton, consisting of 7 persons, viz :—The Bishop, 3 diocesan nominators (a sessment for stipend paid by parishes, 1930, clerical and x lay) appointed by the Diocesan schemes was £340,954.

THE EPISCOPAL CHURCH IN SCOTLAND. THE RT. REV. BILBOTS. CORE. Cley. Stipd. Sees. The RT. REV. Bilbots. Come. Cley. Stipd.

Registrar of the Episcopal Synod, George J. Wood, W.S., 24 Young Street, Edinburgh. Churches, Mission Stations, &c., 414. Parsonages, 215. Clergy, 316. Communicants, 30.536. THE CHURCH OF SCOTLAND.

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom His Majesty the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £5,000 towards his expenses. The country, for Church purposes, was, prior to the union of the Church of Sootland with the United Free Church of Sootland with the United Free Church of Sootland which was effected at a joint meeting of the General Assemblies of both Churches held on October s, 1929, in the presence of H.R.H. the Duke of York as Lord High Commissioner, divided into 16 Synods and 84 Presbyteries, and there were shout 1800 ministers and licentiates engaged in ministerial and other work. The number of communicants on the roll (Dec. 31, 1928) was 750,797. The sum of £80,865 35.30, was (apart from Seat Rents levied by Church Authority and amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies, amounting to £43,337 68.7d.), but including legacies and supplementary endowments of over £53,450,000, have been endowed and erected into parishes quotated. The figures applicable to the Ch

income of the Church was £2,391,720.
Until 1260 the Church of Scotland was Roman
Catholic, but in that year the Scots Parliament
abolished the jurisdiction of the Pope, proscribed
the Mass, and ratified a Confession of Katth

Until 1860 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Fath drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonics were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbytery was settled in 1850.

The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1810, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the at-tempt of Charles I to impose on the Church a Book of Canons and a Liturgy was met by the Book of Canons and a litting was mee by the Mational Covenant and the restoration of Presbyterian forms, which culminated in the Westminuter Confession of Fusith in 1866. At the Restoration the Church again became Episcopal, but in 1869 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form of government, and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In roar Parliament passed the Church of Scotland Act, roar, to declare the lawfulness of certain Articles declaratory of the constitution of the Church of Scotland. These Articles were framed with a view to facilitating union among Presbyterian Churches in Scotland. union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland (under the Presidency of the late Viscount Haldane), enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments Bill) was introduced and was passed into law (15 and 16 Geo. V. c. 33) in 1925. The primary purpose of this legislative measure was to transfer to and vest in the Church of Scotland General Turtess incorporated under the Church General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirma-tion Act 1921, the whole properties and endowments belonging to the Church as it then existed for behoof the latter. Further legislation is in progress for the unification of holding of Proporties and Investments of the re-united Church of Scotland.

LORD HIGH COMMISSIONER, Rt. Hon. Jas Brown, o.B.E., M.P., Holyrood Palace, Edinburgh Moderator (1931-2), Rt. Rev. John Anderson Graham, c.L.E., D.D.

OTHER PRESBYTERIAN CHURCHES.

(1) The Presinterian Church in Ireland.—The largest of the Presinterian churches in Ireland consists of 34 presinterian churches in Ireland consists of 34 presinteria, 279 ministers, 24, 336 families, 7,368 Sabbath -school teachers, and 66,836 scholars. During the 12 months ended Dec. 31, 1930, this branch contributed by congregational effort £362,497 for religious, charitable, and missionary purposes. The total income for the period for all purposes was £480,92.—
Moderator, Rt. Rev. J. Gilbert Paton, M.C., M.A., B.D., General Sec., Rev. W. A. Watson, M.A., B.D., Church House, Belfast.

(a) The Presbyterian Church of England has 14 presbyteries, 352 congregations, 6 preaching stations, and 84,598 members. It has a Theological College (Westminster College, Cambridge), and supports 68 missionaries abroad, including 34 women. In 1938 the amount raised for all purposes was £320,313.—Moderator, Rev. Principal John Oman, M.A., D.D., D.Phil. Gen. Sec., Rev. Thomas Mackay, M.A. Church Offices: 15 Russell Square, W.C. 2. Publications Office: 21 Warwick Lane, Paternoster Row, E.C. 4.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WRSLRYAN METHODISTS.

z. Wesleyan Methodists, the original body founded in 1730 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of laymen, was need in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics of Methodism throughout the world (1923) are: Ministers, 60,227; local preachers, 82,542; members and probationers, 100,008,547; Sunday schools, 92,608; officers and teachers, 967,327; schools, cs.668; officers and teachers, 967,337; scholars, 9,946,543; churches and other preaching places, ro8,638. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synois, which are senti-annual meetings of the ministers and calcuted laymen in each district over which selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.—Pres. Designate (1932), Rev. Dr. H. Maldwyn Hughes, Principal of Wesley College, Cambridge: Sec. of the Conf., Rev. Robert Bond, 197 Palace Road, Tuise Hill, London, S.W. 2.

THE PRIMITIVE METHODISTS.

a. The Primitive Methodists, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers handed together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—President (1931-32), Rev. E. McLellan, 22 Roe Lane, Southport, Lancs. Gen. Sec. of the Church, Rev. Jacob Walton, 78 Harrow View, Harrow, Middlesex.

THE UNITED METHODIST CHURCH.
3. The United Methodist Church was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate from

and independent of each other. These were :—
The Methodist New Connexion, which owed its origin in 1991 to the Rev. Alexander Kilham, one of the early Itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as minis-terial members, all of whom should be elected by

the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by

The Bible Christians, founded in reas by Wm. O'Bryan, a Wesleyan lay preacher in Cortiwall. They existed mainly in the West of England. The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wes-leyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference delates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over nomination.

The act of union of these three denominations into one took place in London on Septemtions into one took place in London on September 17, 1809, when the first united Conference was held.—President (1812-32), Rev. John Ford Reed, Shebbear College, Beaworthy, Devon; President Designate (1923-23), Rev. Wm. C. Jackson, B.A., 45 Northumberland Street, Higher Broughton, Manchester. Sec. of Conference, G. P. Bunt, "Rostornel," Alexandra Road, St. Austell, Cornwall; Connexional Sec., Rev. Henry Smith, 13 Abbay Road Briefston. Abbey Road, Brighton.

INDEPENDENT METHODISTS

4. Independent Methodists. - This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in zees.

WESLEYAN REFORM UNION. 5. This Union is Methodist in doctrine, Con-5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—President (1921), J. T. Waterhouse, 'as Burnett Avenue, Bradford, Yorks.; Gen. Sec. and Connexional Editor, Rev. G. A. Metcalie, Wesleyan Reform Book Room, as Change Alley, Sheffield.

RR-UNION.

A scheme for the re-union of the Wesleyan Methodists, the Primitive Methodists and the United Methodist Churches has been approved by all three Conferences. It is anticipated that

An Enabling Bill has been passed by both Houses of Parliament and has received the Houses of Parliament and has received the Royal Assent. The final vote on Union (that is, the final vote prior to that of the Uniting Conference) was taken by the three Conferences in 1931, the majority of 75 per cent. being requisite in each case. This vote will take effect in 1932 The Uniting Conference will then meet in 1932 subsequently to the meeting of the several Conferences. The first United Conference to meet in 1932 subsequently to the meeting of the several Conferences.

The CALVINISTIC METRODIST OR PASSETTERIAN CHUNCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in 'federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a congituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam India, and in Brittany. Churches and Assam, India, and in Brittany. Churches and preaching stations in Assam, 1,438; church members, 88,380; adherents (including com-

municants), 98,964.
In 1930 the body numbered—churches, 2,498; chapels and other buildings for Sunday-school branches, 1,707; ministers and preachers, 1,152; elders, 7,514; communicants, 185,827; on probation, 849; Sunday-school teachers and and

officers, se.400; teachers and scholars, 187,783; adherents (including communicants), 294,394, Contributions in ald of the Ministry in 1872, 5203,732. For various religious purposes (la-£303,733. For various religious purposes (including the ministry), £437,736.

One of the features of the Weish churches is

One of the features of the Weish churches is the Sunday-school, which is attended by adulta as well as children; the vernacular is the lan-guage used generally in these schools. The Eng-lish branch of the Church has 378 chapels and preaching stations, with 34,849 communicants. All the rest are Weish.

All the rest are Weish.

Moderator (South Wales) Synod, Rev. Stephen
George, M.A., Llandrindod; (North Wales)
Rev. D. D. Williams, M.A., Liverpool.

Moderator of General Assembly, Rev. William
Thomas, Maesteg, Bridgend, Glam.

Ohief Secretary, Rev. R. Cunllo Davies, M.A.,
Bryn Elwydd, Machynlleth, North Wales.

THE INDEPENDENTS

The Independents, or Congregationalists, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1908, and in 1908 nine districts were formed, each under a Moderator. astricts were formed, each under a Moderator. There are yr county and other Associations in the British Isles, with 4,768 churches and preaching stations; the number of ministers in the British Isles is a,900. Chavman of the Congregational Union of England and Wales, regi-2s, Rev. H. C. Carter, M. A. Seeretary, Rev. Bidney M. Berry, D.D. Office and Publication Department, as, Memorial Hall, Farringdon St. E. C.

The Countess of Huntingdon's Connexion, with 32 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. Secretary, E. Dolhy Shelton. Offices, 4x, Holborn Hall, Gray's Inn Road, W.C. z.

Minor Religious Denominations.

The General Assembly of Unitarian and Free The General Assembly of Univarian and Fractional Christian Churches, has about 330 ministers, 345 chapels and other places of worship. Gen. Sec. Rev. Mortimer Rowe, B.A., Essex Hall, Essex Street, W.C.a. The Brethren number about \$6,000, of whom five-eighths belong to the "Open" body. The Society of Friends (Quakers) consists of 19,227 members in Great Britain, and has 366 places of worship with as places of and has 395 places of worship with as places of worship in Ireland and a 344 members. Central Offices (Great Britain), Friends House, Euston Ed., N.W. 1, (Ireland), 6 Eustace Street, Dublin The Churches of Christ have 14,277 members and 185 churches in the British Isles, with 159 Sunday Schools, 1,732 teachers, and 16,81 schools. The Church of Christ, Scientist, has in the British Isles as pranches of The First Church of Christ, Scientist, in Boston, Mass., U.S.A. (Offices, Donington House, Norfolk St., Strand, W.C.s.). The Exervian Church (Offices, 3s Fetter Lane, E.C.) has in the U.K. 42 congregations and preaching stations, with 3,336 communicants. The Catholic Catho that in the U.K. 42 congregations and preaching stations, with 3,35 communicants. The Catholic Apostolic Church has above 80 churches, including in the U.K. 42 congregation and the Church form of the Inhabitants of the Apostolic Church has above 80 churches, including in Church form of the Inhabitants of the United Kingdom are about 200,000 Jews, mainly in London and other large towns, who possess the New Church (Swedenbergran),75 societies, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches and Ferror of England (otherwise called The Research Church (Swedenbergran), 75 societies, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches. The Free Church (Swedenbergran), 75 societies, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches. The Free Church (Swedenbergran), 75 societies, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches. The Free Church (Swedenbergran), 75 societies, with about 6,700 registered members; the Latter-Day Statist (Bermons) have 82 churches. The Free Church (Swedenbergran), 75 societies, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 synagogues, with about 200 sy

AND THE BAPTISTS.

The Baptists are similar to the Congregationalists in all respects but one—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Espitist Union, which was formed in 1813. In the British Isles there formed in 1813. In the British Isles there were, in 1930, 4,243 chapels and 2,031 pastors. The members numbered 4,05,34s, Sunday-school teachers 59,539, and Sunday scholars 483,430. President of the Baptist Union, 1931-29, Rev. Carey Bonner. Secretary, Rev. M. E. Aubrey. Office, 4, Southampton Row, London, W.C. 1. The Baptist World Alliance (founded in 1905) is a Federation of National Conventions and Unions in 1905.

in more than 60 countries. Communicant membership about 11,500,000. General Sec., Rev J. H. Rushbrooke, D. D. Office, 480uthampton Row, W. C. r. The Strict and Particular Baptists have about

600 places of worship in England and Wales, and 20,000 members, with Foreign mission fields.

the Reformed Church founded (in New York) the Reformed Church founded (in New York) in 1872. Pressiding Bishop, Bt. Rev. F. Vanghan, D.D., Emmanuel Rectory, Morecambe. Gen. Sec., Rev. A. V. Bland, D.D., Rydal Mount, Morecambe. The Old Roman Cathelic Church: Archishop in Gt. Britasn, Most Rev. Bernard Mary Williams, Madam's Wood, Painswick, Stroud, Glos. The Seventh Day Advantists (Hidges., Stanborough Park, Watford, Hertz) have 64. Stanborough Fark, Watford, Herts) have 64 organized churches, 25 companies, and 4,588 members in the British Isles. The Greeks (Exarch of Western and Northern Europe, Metropolitan of Thyateira, Archbishop Germanos, 20, Newton Rd., Bayswater, W.a) have8t, Sophia's Cathedral (Moscow Road, W.a) and Cardist. The Armenians have a church in London (S. Sarkis, Lyars Gerdan) and in Manchester (St. Trinity. Iverns Gardens) and in Manchester (St. Trinity, Upper Brook Street); the French, Dutch, Sweden, and Swiss in London, Norwich, Hull, and Canter-bury; and there is a mosque for Mesisms in Melrose Road, Southfields.

Scientist (Sloane Terrace, S.W. 1); Second (Palace
Gardens Terrace, W. 8); Third (7 and 8, Curzon
Street, Mayfair, W. 1); Fourth (34 Woburn Place,
Russell Bq., W. C. 1); Fyth (58, Crouch Hill, N.4);
Sizth (Gwendolen Avenue, Putney, S.W. 18);
Secenth (Wright's Lane, Kensington, W. 8);
Eighth (20, Acre Lane, Brixton, S.W. 2); Ninth
(Marsham Street, Westminster, S.W. 1); Tents
(Bennett Park Hall, Blackheath, S. E. 2); Electrif
(Nutford Place, Bryanston Square, W. 1); Twelfth
(Ullswater Road, West Norwood, S.E. 27). Jews.

SPANISH AND PORTUGUESE SYNAGOGUE, Bevis Marks, E.C. 3.—Founded during Commonwealth; present building erected in 1701. The oldest Jewish synagogue in the country. GREAT SYNAGOGUE, St. James's Place, Duke

Street, Aldgate, E.C. 3. — Founded in sign (present building 1790).

WEST LONDON SYNAGOGUE, Upper Berkeley Street, W. z.

Educational Statistics.

I .- ELEMENTARY.

Statutes require parents in England and Wales to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age; in Scotland, to provide efficient education up to 15 years; in Ireland, to cause their children to attend school from 6 to 14 years.

e to 14 years.

In England and Wales (1989) there were 20,791 public elementary schools with accommodation for 7,209,382 pupils, and average attendance of 4,015,326; in addition, there were 129 special schools for blind and deaf children, with accommodation for 9,384, and 463 for defective and epileptic children, with accommodation for 40,303. There were (1920) 33,698 certificated college-trained men teachers and 64,058 women, 5,542 certificated not college-trained men teachers and 64,058 women, 5,542 certificated not college-trained men teachers and 30,942 uncertificated women.

In Scotland (1929) there were 2,915 primary schools with accommodation for 861,585, and average attendance of 584,492. There were (1929) 3,916 certificated men teachers and 15,128 women teachers, and 34 provisionally certificated women.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening, handicruits, cookery, &c.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, &c., show that the schools are valuable agencies in child-welfare generally.

II.—EDUCATION BEYOND ELEMENTARY. Secondary.

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, &c., employments.

dustrial, commercial, &c., employments.

In England and Wales (1929) the number of Secondary schools recognised for grant was 1,341, with 10,249 full-time men and 10,256 full-time women teachers. The Authorities aim at securing graduate teachers as far as possible. The full-time pupils numbered 48,279 boys and 46,272 girls under 12; 140,844 boys and 11,235 girls over 16—a total of 20,928 boys and 48,247 girls. Of these about one-fourth come up from elementary schools with "free places," others with scholarships. Mine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Of these "efficient" schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The system in Wales is much the same as in England, though the schools are under earlier statutory provisions, and are called "Intermediate" in many cases. In Wales there is a Cantral Welsh Board.

In Scotland there are Preparatory and Secondary Departments under the same Commissioners and Local Authorities as the Elementary schools. In 1920 there were 207 Preparatory Departments with 76,091 children on the Register and average attendances of 66,347, and 225 Secondary Departments with 75,232 children on the Register and average attendances of 73,152. The Authorities aim at securing honours graduates as far as possible, and all teachers are certificated.

Technical.

Technical Education in England and Wales is provided in Evening and similar schools and in Day Technical Classes and Technical Institution Courses (mostly controlled by Local Authorities). State grants are paid on the number of students, of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses, Tutorial Classes, and also Schools of Art, Branch Schools of Art, and Art Classes In Scotland Technical Education is provided in like manner.

Trainina.

Training is provided by the State for Elementary School Teachers, of whom so per cent. have been trained in Colleges having nearly 23,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose; in Scotland all candidates for employment as teachers must undertake a course of training of at least one year in teaching.

Universities.

Many of these institutions now receive annual State grants, mainly in the form of "block" grants paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in England and Wales. State grants to Irish Institutions were transferred from the Treasury to the Irish Governments as from April, 252s.

In 1930-31 the Professors and Undergraduates were approximately as under .—

tion Council, S. H. Shurrock, M.A. Goldsmiths' Librarian, R. A. Rye.

Accountant, Oliver Greenwood, F.S.A.A. Supt. of Examinations, R. B. P. Wallace, M.A.,

Secretary to Training Colleges Delegacy, G. R. Oake, B.A.

Representative in Parliament, Sir E. Graham Little (1924). Public Orator, Prof. E. A. Gardner, Litt.D.

Organisation of Teaching.

Organisation of Teaching.
On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1902, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other University Institutions are the Brown Animal Sanatory Institution in Wandsworth Road, Goldsmith's College at New Cross, the Francis Galton Laboratory for National Eugenics at University College, the Institute of Historical Research in Malet Street, and the University Observatory.

LONDON FOOT HOSPITAL SCHOOL OF CHIROPODY, 23 Fitzroy Sq., W. z. -Sec., A. Phillips, F.C.I.S.

COMMERCIAL EDUCATION.

Commercial Students are well served by number of independent schools or colleges in which class or private tuition is given or coaching undertaken by correspondence. Schools of Commerce can be found in practically every town: Book-keeping, Office Routine, Shorthand, Languages, are the usual subjects. Nearly every Education Authority has its system of Evening Institutes (Session—September to Easter and sometimes July) in which tuition may be obtained in most Commercial and Technical subjects. Classes are either free or subject to nominal charges.

The London County Council has Junior and Senior Evening Institutes to serve every district in the Metropolis. A child joining direct from an elementary day school and attending regn-cost. A postcard addressed to the L.C.C. making a request for details will be promptly answered.

In addition to the Secondary Schools in London, at which various stages of commercial London, at which various stages of commercial training are included in the general subjects, the L.C.C. has a series of voluntary and free Day Continuation Schools at which commercial and trade subjects are taught to children over 14 years. The L.C.C, has also several Central Schools at which free training is given to children 12-17 years in general education with either a commercial or industrial bias.

IMPERIAL DEFENCE COLLEGE, 9, Buckingham Gate, S.W. z. Telephone: Victoria 9000.

SECRETARIAL.

CHARTERED INSTITUTE OF SECRETARIES, 6 LORdon Wall, E.C. a.

TECHNICAL EDUCATION. See also "Commercial Education."

In addition to the Institutions enumerated In addition to the institutions enumerated below there are Faculties of Engineering at the Universities of Birnningham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester, and Sheffield; Wales; St. Andrews, Glasgov, and Edinburgh; Dubhn, National University of Ireland, and the Queen's University of Belfast.

L-UNDER LONDON COUNTY COUNCIL

The principal technical institutes maintained or aided by the L.C.C. are the following:—

Institutes entirely maintained by the L.C.C.

BARRETT STREET TRADE SOROOL, Oxford
Street, W. I. .—Principal, Miss E. E. Cox, B.A.

BRAUFOY INSTITUTE, Prince's Road, Vauxhall
Street, S.E. zz.—Princ. A. Ritchie-Scott, D.Sc.,

F.R.S.E. BLOOMSBURY TRADE SCHOOL, Queen Square, Bloomsbury, W.C. z. — Principal, Miss A. Bloomsbury, Crawley, B.Sc.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Rd., S.E.s.—Princ., S. Thorogood,

CENTRAL SCHOOL OF ARTS AND CRAFTS, South-ampton Row, W.C.—Principal, P. H. Jowett, A R. C. A.

CLIPHAM SCHOOL OF ART, Edgeley Road, High St., Clapham, S.W. 4—Principal, W. A. Wildman, A.R.C.A., R.B.A.

CLAPHAM TRADE SCHOOL, 373-7 Clapham Road, S.W.g.—Principal, Miss K. A. Corner, M.B.E. HACKREY TECHNICAL INSTITUTE.—Principal,

W. Bankine, M.B.E., M.I.M.E. M.I.Struct.E., Dalston Lane, E. S. HAMMERSMITH SCHOOL OF BUILDING AND ARTS

AND CRAFTS, Lime Grove, Shepherd's Bush, W. 12.—H. W. Mole, A.R.I.B.A., M.I.Struct.E. Hammershuth Trade School, Lime Grove, Shepherd's Bush, W. 12.—Principal, Miss M. A. J. Boon.

LONDON SCHOOL OF PRINTING AND KINDRED TRADES, 61 Stamford Street, S.E. z .- Principal, J. R. Riddell.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.-Principal, Capt. L. N. Coombs, B.Sc.

ADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—Principal, F. H. Reid, B.Sc., PADDINGTON M.I.M.R.

M.1.A.K.
PUTNEY SCHOOL OF ART, Oxford Road, Putney,
S.W. 15.—Principal, J. Bowyer.
SCHOOL OF BUILDING, Ferndale Road, Brixton,
S.W. 4.—Principal, F. E. Drury, M.Sc.
SCHOOL OF ENGINEERING AND NAVIGATION, High
States of Paris and Paris an Street, Poplar, E.-Principal, J. Paley Yorke.

M.Sc., A.M.L.E.E. PHOTO-ENGRAVING AND LITHO-

SCHOOL OF PHOTO-ENGRAVING AND LITH GRAPHY, 6 Bolt Court, Fleet Street, E.C. 4. Principal, A. J. Bull, M.Sc. HOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N. (Branch at Old Castle Street, SHOREDITCH

L.C.C. School).—Principal, T. Reed, M.B.K. SOUTH EAST LONDON TRCHNICAL INSTITUTE,

Lewisham High Road, S.E. 4.—Principal, G. A. Robinson, B.S.C.

SOUTH EASTERN HOME-TRAINING SCHOOL. Plassy Road, Rushey Green, Catford, S.E. 6.—Head-mistress, Miss M. E. Stuart.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—Principal J. Stuart Ker, B.Sc., A.M.Inst.C.H.; Head (School of Art), Walter Bayes, A.R.W.S.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—Principal, George F. O'Riordan, B.Sc., F.R.S.H., M.I.Mech.H., M.I.A.H., M.I.M.E.

BOROUGH POLYTECHNIC, Borough Road, S.E. z.— Principal, J. W. Bispham, O.B.E., M.A., B.Sc. CHELSEA POLYTECHNIC, Manresa Road, Chelsea, S.W.3.—Princ.F. J. Harlow, B.Sc., M.B.E., Ph.D. Ciry of London College, White Street, Monfalled, E.C.z.—Director, J. W. Bamsbottom, M.A., M Com.

NORTHAMPTON POLYTECHNIC, St. John Street, E.C. I.—Principal, S. C. Laws, M.A., M.Sc. NORTHERN POLITECHNIC INSTITUTE, Holloway Boad, N. 2.—Principal, T. J. Drakeley, D.Sc.
NORTH WESTERN POLYTECHNIC, Prince of
Wales's Road, N.W. 5.—Principal, F. E. Rowett, D.Sc., M.A.

REGEST STEELT POLYTECHNIC, 300 Regulation, Street, W. z. - Director of Education, Regent Street, W. z. - Directo Worswick, O.B.E., M.Sc.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate, —Principal, G. Patchin, A.R.S.M.
WOOLWICH POLYTECHNIC, William St., Woolwich, S.E. 18.—Princ., A. F. Hogg, M.A., F.C.S.

Technical Institutes, &c., aided by the L.C.C. BERMONDSEY SETTLEMENT. Farncombe Street Jamaica Road, S.E. 15.—Warden, Rev. J. Scott

Lidgett, D.D. Iddgett, D.D.
BLUE COAT SCHOOL FOR GIRLS, 58 Point Hill,
Greenwich, S.E.—Headmistress, Miss A. Ward.
CAMPDEN TECHNICAL INSTITUTE, LANCASTER
ROAd, W. 11.—Principal, Miss G. L. Abbot.
COEDWAINERS' TECHNICAL COLLEGE, St. John's
Lane, Finbury, E.C. 1.—Princ., F.Y. Golding.
GOLDSMITHS' COLLEGE, New Cross, S. E. 14.—WarJan A. B. Daan M. A. M. 164.

den. A. E. Dean, M.A., M.Litt.

KING EDWARD VII. NAUTICAL SCHOOL (British Sailors' Society), 68c Commercial Road, E. 14.-Secretary, Herbert E. Barker.

LEATHERSELLERS' TROUNICAL COLLEGE, Tower Bridge Road, S.E. z.—Principal, M. C. Lamb.

MARY WARD SETTLEMENT, Tavistock Place. W.C. z.-Hon. Warden, Horace Fleming, M.A. J.P.

MORLEY COLLEGE, 6x Westminster Bridge Road, S. E. z. -Principal, Eva M. Hubback, M. A.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen St., Borough, S.E. I.—Lady Principal, Miss R. A. Roberts.

ROYAL SCHOOL OF NEEDLEWORK, Exhibition Road, S.W. 7.—President H.R.H. the Duchess of York; Secretary, Miss Barber.

SAILORS HOME, Dock Street, E. r (School of Neutical Cookery). — Secretary, Payr. Com. A. E. Loder, R.N.R.

A. E. LOGET, R.N.K. SCHOOL OF WOOD-CAEVING, 39 Thurlos Place, S.W. 7.—Secretary, Maj. C. Bailey.
TOYNBER HALL, 28 Commercial Street. E. r.—Warden, J. J. Mallon, M.A.
WANDSWORTH TROHNICAL INSTITUTE. High Screet, Wandsworth, S.W. 18.—Principal, D. M.

Schools of Art aided by the L.C.C.

Griffiths, B.Sc., M.I.Mech.E.

Blackheath, Lee, Lewisham and Greenwich. Lee Road, Blackheath, S.E. 3. — Principal, John Platt, A.R.O.A.

St. Martin's School of Art, 107 Charing Cross Road, W.C. 2-Princ., G. R. Woolway, A.R.C.A. In addition to the above schools there are Art Schools or Classes attached to all the Poly-technics, except the Northampton Polytechnic, and to Goldsmiths' College. and to Goldsmiths' College. A School of Art is also conducted by the City and Guilds of London Institute at the South London Technical Art

IL-OTHER LONDON INSTITUTIONS.

School, 122-124 Kennington Park Road.

Imperial College of Science and Technology. South Kensington, S.W. 7.

Visitor: H.M. THE KING. Chairman of Governing Body, The Rt. Hon. Lord

Buckmaster, G.C.V.O. Chairman of Executive Committee, Sir Herbert Reade, K.C.M.G., C.B. Chairman of Finance Committee. Sir Herbert

Wright. Chairman of Delegacy, Walter T. Prideaux.

An Institution for the most advanced training and research in Science, especially in its appli-

cation to industry. The Departments and Professors are :-

Royal College of Science.

Aeronautics L. Bairstow, C.B.E., F.R.S. (Aviation); Sir Gilbert T. Walker, C.S.I. Sc.D., F.R.S. (Meteorology).

F.E. (Meteorology).

Mathematics: S. Chapman, F.R.S., H. Levy, F.R.S.E. (Applied); Physics: G. P. Thomson, B.A., F.R.S., A. O. Raukine, O.B.E., A. Fowler, F.R.S., (Astro-Physics); A. F. C. Pollard (Mechanical design); Chemistry: H. B. Baker, O.B.E., F.R.S., J. F. Thorpe, O.B.E., F.R.S. (Organic), J. C. Phillip, O.B.E., F.R.S. (Physical); Chemical Technology—Fuel and Refractory Materials. W. A. Bone, F.R.S.; Chemical Engineering: (vacant); Biology; V. H. Blackman, F.R.S. (Plant Physiology), E. W. MacBride, F.R.S. (2000gy), W. Brown (Plant Pathology), J. W. Munro, D.Sc. (Entomology); Geology; P. G. H. Boswell, O.B.E., F.R.S. O.B.E., F.R.S.E.

Royal School of Mines.

Mining: S. J. Truscott, D.Sc.; Mining Geology P. G. H. Boswell, O.B.E., F.R.S.E.; C. G. Cullis; Metallurgy: Sir Harold Carpenter, F.R.S.; Oil Technology: W. W. Watts, F.R.S.

City and Guilds (Engineering) College.

Mechanical Engineering and Motive Power:

C. H. Lander, C.B.K.; Civil Engineering: S. M Dixon; Electrical Engineering:

Fortescue, O.B.K.
Rector, H. T. Tizard, C.B., F.R.S.
Secretary, A. Gow, M.A.; Assatant Secretary and
Repitrar, G. C. Lowry, M.A.

City and Guilds of London Institute.

Gresham College, E.C. a.

(z.) City Gualds Engineering College (see Imperial College of Science and Technology).

(a.) South London Technical Art School, 122 and

224 Kennington Park Road, S E.
(2.) Department of Technology, as Roland Gar-

dens, S.W. 7. CRYSTAL PALACE (School of Practical Engineering).—Principal, Maurice Wilson, M. Inst. C. E.
AST LONDON COLLEGE (see University of EAST

Loudon). FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE, 63-70 SOUTHAMPTON ROW, W.C. 1.—
Princ., A. Russell, D.Sc., LL.D., F.R.S.

INSTITUTE OF CERTIFICATED GROCERS (Incorporated), so Doughty St., W.C. z.—Sec., C. L. T. Beeching, O.B.R.

POLYTECHNIC SCHOOL OF ENGINEERING (Civil, Mechanical, Electrical and Motor), 307-311 Regent Street, W. x.—Head of School, Philip Kemp, M.Sc.

SCHOOL OF MOTOR BODY AND CARRIAGE BUILD-ING (Balderton St., W.) .- Head of Dept., A. E. Holbrow.

A. E. HOROW.

A. E. HOROW.

SOUTH OF ENG. COLL. OF PHARMACY, 186 Clapham Rd., S. W., — Principal, H. Lucas, F.C. S. TRAIDES' TRAINING SCHOOLS, 123 Great Titchfield Street, W. 1.— Director, Sir Banister Fletcher, F.R.I.B.A., F.S.I. WILLESDEN POLYTEOHNIC, Priory Park Road, N.W. 6.— Principal, A. J. Bird.

RNGLISH TECHNICAL COLLEGES.

ACCRINGTON (Munic.).—Princ., J. P. Ackroyd,

ASHTON-UNDER-LYNE (Heginbottom). - Principal, Major H. Collins, B.Sc. BACUP AND RAWTENSTALL.—Headmaster, John

T. Hurst, B.A.

BANBURY (County).-Headmaster, R. Luscombe

BARNSLEY (Mining and Techn. Coll. and Sch. of Arts).—Princ., D. Paton Grubb, B.Sc.

BARROW-IN-FURNESS, -Princ., David Hardman.

BATH (Munic.) .- Principal, L. J. Castle, O. E. E., M.C., B.SC BATLEY (Techn. College). - Principal, N. B.

Radcliffe, M.Sc., A.M.I.E.E. BIRKENHEAD (Techn. Coll., Tranmere).

J. E. Lloyd-Barnes, M. Eng., M. I. Mech. B

BIRMINGHAM (Central Techn. Coll.)—Princ.,
D. Stirling Anderson, Ph.D., M.I.Nech.E.

(Vittoria St.—For Jewellers and Silveramiths)—Headmaster, W. T. Blackband.

(Vittoria Junior School of Arts and Crafts).

—Headmaster, J. L. Umbers, N.C. (Tech. Coll., Handsworth).—Princ., W. E.

Harricon, B.Sc., A.R.C.S.

Harricon, B.Sc., A.R.C.S.

Techn. Coll., Aston).—Princ., Raymond R. Butler, M.Sc., A.I.C., F.C.S.

BLACKBUEN (Munic.).—Head, W. Wilkinson, F.T I.
BLACKPOOL.—Princ., W. Jones.

BOLTON (Munic.).—Director, John A. Cox, M.A. BOOTLE (Munic.).—Headmaster, B. A. McMillan, B.8c.

BOURNEMOUTH (Munic.) .- Princ., C. E. Walker, M.A., B.Sc.

BRADFORD (Techn. Coll.).—Princ., H. Richardson, M.Sc. BRIERLEY HILL, STAFFS (Techn. Inst.) .- Princ.,

J. H. Dukes, B.com. BRIGHOUSE AND DISTRICT (Techn. Sch.) .- Princ.

and Sec., J. S. Hird, M.A. BRIGHTON (Munic.). — Princ., W. Mansergh

Varley, M.A. BRISTOL (Merchant Venturers').—See "English University Colleges."
BURNLEY (Munic.).—Princ., W. Munn Bankin,

M.Sc. BURTON-ON-TRENT (Munic.). - Head Teacher, A. P. Bakewell.

BURY (Munic.) — Princ., M. Tomlinson, M.A. CAMBORNE (Sch. of Metalliferous Mining).—
Princ., R. A. Thomas, M.I.M.M.

CANTERBURY (Sidney Cooper Sch. of Arts and Crafts).—Princ., Harold Waite, R.B.A.

CARLISLE (Tech. Sch. and Sch. of Chemistry) .-Princ., A. Hopwood, D.Sc., A.R.C.S., F I.C.

CHAILEY, Sussex (Heritage Craft Schools for the instruction of crippled children, age 3 to 14 years).—Founder & Hon. Sec., Mrs. C. W. Kimmins.

CHATHAN.—Princ., I. Keen, M.A. CHELTENHAM.—Princ., Ernest Ivamy, M.A.

CHESTERFIELD (Techn. ('oll.). — Prina., W. R. Parsonage, B.Sc., M.I. Mech.E., M.I. Struct. E. CHORLEY (Munic.). — Head Master, J. B.

Nightingale.

COLOHESTER.—Sec, G. C. Holland. COLNE (Munic.).—Princ., M. Robinson, B.Sc.

COVENTRY (Techn. Coll.) .- Princ., D. R. Mac-Lachlan, B.Sc., A.M.Inst.C.E. CREWE (Technical Coll.) .- Princ., J. Smith,

M.B.E., M.Eng. CROYDON (Central, S. Norwood, and Thornton Heath Polytechnic).—Princ., W. Thomson, M. A., B.Sc.

DARLINGTON (Techn. Coll.). - Princ., J. W. Augles, M.Sc., M.I.Mech.E. DARWER (Munic.)—Princ., L. G. Whiteley.
DEWSBURY (Munic. Techn. Coll. and Sch. of Art).
—Princ., H. Wright, E.Sc.

WHITAKER'S ALMANAGE. 1982.

DOMGASTER (Techn. Coll.) .- Princ., G. Lawton. Ph.D., B.Sc., A.I.C.
DOVER (Sch. of Sci. and Tech., Ladywell)...
Ovg. Master, H. H. Jacques, B.Sc.
DUDLEY...-Princ., Arnold W. Gibson, B.Sc. DURHAM (Johnston Sch.) .- Princ., J. Cleminson, EAST HAM.—Princ., W. H. Barker, B.Sc.
RRITH.—Princ., W. Neagle, B.Sc.
GATESHEAD.—Princ., H. Livingston, B.Sc.
GILLINGHAM (Medway Tech. Coll.).—Princ.,
Charles Colles, B.Sc.
GLOUCESTER.—Princ., R. Leach, B.Sc.
GRIMSBY.—Princ., A. P. Williams, B.A.
GWILDERD, Berling, E. S. Traidill, B. Sc. GUILDFORD.—Princ, E. S. Tosswill, O.B.E. HALIFAX (Munic.).—Princ., A. R. Boeree, M.A., B.Sc., F.I.Q. HARROGATE.—Princ., W. E. C. Jalland, M.Sc. HARROW.—Princ. and Sec., Thomas Bolton. HERTFORD (William Baker Technical School).
—Governor, Rev. F. C., Macdonald.
HORWIGH (Ry. Mech. Inst.)—Princ., E. Blakemore, A.E.L.E.E. HUDDERSFIELD.—Princ., J. F. Hudson, M.A. HULL (Munic. Techn. Coll.).—Princ., E. P. Bates, IPSWICH (Sch. of Engineering).-Princ., W. E. Double, A.I. Mech. E.
(Women's Evening Coll.).—Principal,
Miss J. Horniblow. ISLEWORTH (Spring Grove Poly.) .- Princ., C. A. Wood, M.A. KEIGHLEY .- Princ., W. Healey, B.Sc., M. I. Mech. E. LANCASTER (Storey Inst. Tech. Coll.).—Head-mater, Francis H. Mould, B.Sc., A.R.C.S. LEEDS (Techn. Coll.).—Princ., J. H. Everett, B.Sc. LEIORSTER (College of Technology).— Princ.
L. W. Kershaw, B.Sc., F.G.S.
LHIGH (Muulc.).—Princ., J. Toft, B.Sc.
LHKOLN.—Princ., E. R. Waiter, M.Sc.
LIVERPOOL (Muulc.).—Director, C. F. Mott, M.A.
Princ., J. Scholes Hague, M.Sc.
LOUGHBOROUGH.—Princ., H. Schofield, M.B.E., Ph.D. MACGLEAPIELD,-Princ., Geo. Beach, LL.D. MAIDSTONE .- Princ., James Quick. MANCHESTER (Munic.) .- See " English University Colleges MIDDLESBROUGH (Constantine Tech. Coll.).-Princ., T. J. Murray, M.Sc., Ph.D. MORLEY.—Princ., C. F. Thetford, B.Sc., A.R.C.Sc. NELSON (Munic.) .- Princ., Alfred J. Fawthrop, NEWARK (County Techn. Coll. and School of Art).—Princ., J. W. Whitaker, Ph.D., F.I.C., M.I. Min. N. NEWGASTLE - UPON - TYNE (Rutherford Tech. Coll.).—Princ., E. C. Edgar, D.Sc., F.I.C.
NEWPORT, Mon.—Princ., G. R. Beunett, M.B.E., B. 86. KORTHAMPTON (Techn. Coll.).—Principal, J. Biakeman, M.A., M.Sc.
NORTHWIGH (Verdin).—Princ., W. S. Osborn, NORWICH (Munic.) .- Princ., Howard A. Costigra, R.Sc., Ph.D., F.G.S. NOTTINGHAM (City School of Art.).—Principal, J. Else, A.R.S.S. OLDHAM (Munic.).—Princ., H. G. Taylor, M.Sc. OXFORD (Sch. of Arts and Crafts) .- Princ., J. H. PETERBOROUGH (County Tenhn. Soh. for Soke).

——Princ., J. H. Device, rh.D.

PLYMOUTH (Munic. Sch. of Arts and Crafts).

Headmaster, David H. Hodge, A.M.C. PLYMOUTH AND DEVONPORT (Techn. Coll.)— Princ., W. S. Templeton, B.Sc. PORTMOUTH (Munic.).—Princ., Leonard B. Benny, M.A. PRESTON (Harris Inst.).—Princ., T. M. Naylor, W.SC. BADCLIFIE.—Prina, Hubert Boardman, READING.—See University. REMDRUTH (Munic.).—Prina. ROCHDALE ((Munic.).—Prina. and Sec., J. E. Holden ROCHESTER.—Princ., J. E. Phillips, M.A. ROTHERHAM.—Princ., F. C. Clarke, A.R.C.SC., RUGBY (Coll. of Techn. and Arts).-Princ., P. I. Kitchen, B.Sc.
St. Helens (Munic.).—Princ., J. W. Simpkin, M.Sc. SALFORD (Royal Technical Coll.).-Principal, SALFURD (2014) To minimal Coll.,—Princepox,
Bertram Frentice, D.Sc., ph. D.
SHEFFIELD University (q.v.).
SHEEWSBURY.—Princ., A. E. White, B.A., B.Sc.
SMETHWICK (Munic.)—Princ., H. Garrett, B.Sc.
SOUTHAMPION (Hartley Univ. Coll.).—See Coll.) -- See "English University Colleges." SOUTHFORT (Manchester Road). — Princ., F. Blomley, B.com. SOUTH SHIELDS (Marine Sch.) .- Princ., H. R. Cullen, M.A. STOCKPORT (Coll. for Further Education).—
Prina, G. Wood, M.Sc.
STOKE-ON-TERRET (Longton Sutherland Inst.).—
Prina, H. G. Belasco, B.Sc. STRATFORD (G. E. Mechanics' Inst., L. & N.E. Ry.).-Sec., Francis G. Perry. SUNDERLAND (Munic.). - Princ., V. A. Mundella. M.A., B.Sc. SUITON COLDSTELD (Munic., Tech and Art Sch.)
—Princ., R. A Pritchard, M.A.
SWINDON.—Princ., G. H. Burkhardt, M.Sc. TODMORDEN (Munic.) .- Princ., C. L. Berry, M.A. TONBRIDGE .- Princ., J. Lister, Ph.D., A.R.C.SO. TOTTENHAM (Poly.) .- Princ., H P. Shallard. TUNBRIDGE WELLS, -Princ., J. Lister, Ph.D., A. R.C. SC. WAKEFIELD .- Princ , N. Tunstall, B.Sc. WALSALL (Tech. Coll.) .- Princ., F.E. Thompson, A.R.C.S., F.I.C., F.C.S. WARRINGTON (Munic.) .- Princ., C. Bottomley. WEDNESBURY (County) .- Princ., T G. Bamford. M.Sc. WELLINGBOROUGH. -Princ., F. J. Thorpe, B.Sc. WEST BROMWICH (Kenrick Techn. Coll.). Coll.). --Princ., R. C. Prescott, M.Sc., M.I. Mech. E. WEST HAM (Munic. Coll.).—Princ., T. C. Baillie. M.A., D.80 WIDNES (Munic.). - Princ., J. H. Crabtree, A.E.O.SO., B.Sc.

WORKING WOMEN'S COLLEGE

RESIDENTIAL COLLEGE FOR WORKING WOMEN (Incorporated), Hillcroft College, Surbiton, Surrey.—*Principal*, Miss F. Street, M.A.

BOY SCOUTS. (Incorporated.) FOUNDED in 1908, as a result of an experimental camp held by the Chief Scout the previous summer at Brownsea Island, Dorsetprevious summer as provinces about porters shire, the movement was organised by Lord Baden-Powell, G.C.M.G., G.C.V.O., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and selfreliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handlerafts useful to themselves, and promoting their physical development and

and promoting their physical development and hygiene.

The Movement (whose membership exceeds 2,310,000) has taken root in all parts of the British Empire, and nearly every other country has adopted it.—Imperial Headquarters, 25 Buckingham Palace Road, London, S.W. z.

THE GIRL GUIDES ASSOCIATION,
A movement founded by Lord Baden-Powell,
G.C.M.G., G.C.V.O., K.O.B., Chief Scout, on the
lines of the Boy Scouts and incorporated by
Charter in 1915, while in the year 1923 H.M. the
King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst Its aim is to develop good citizenship amongst gil sby forming their character, training them in habits of observation, obedience, and self-reliance; inculcating loyalty and thoughthiness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good lomes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over each good. ship of the Movement now numbers over 947,000 all over the world, that of the British Isles alone being over 552,000 Imperial Headquarters, 27-29 Buckingham Palace Road, London, S.W. z.

Beadmasters' Conference Schools.

THE HEADMASTERS' CONFERENCE (Secy., W. A. Bulkeley-Evans, C.B. R., LL. D., 5 Paper Buildings, Temple, E. C. 4.)—The Headmasters' Conference was founded in 2865 and incorporated in 2995. The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Governing Scheme or other Instrument under which the School is administered, and if the School is maintained or aided by a Local Education Authority (s) how the Governing Body is constituted, (b) to what extent by right or in practice the Governing Body acts independently of the Local Education Authority in directing general policy or administering disposable funds, to the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School.

who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage. The sunnal meetings are, as a rule, held in December, alternately (s) at some school represented on the Conference, (b) at London or some University town.

NOTES:—(a) "Annual Fees" represent the average amount payable annually, exclusive of fees for optional subjects.

Sees for optional subjects.

(b) "Headmaster." In certain Schools other titles prevail, e.g., Beaumont, "Rector"; Belfast Academical, "Frincipal"; Dulwich, "Master"; Edinburgh Academy, "Rector"; Glenalmond, "Warden"; Halleybury, "Master"; King William's, I. of Man, "Frincipal"; Liverpool College, "Principal"; Magdalen Coll. Sch., "Master"; Manchester Gr., "High Master"; Mariborough, "Master"; Badley, "Warden"; St. Columba, Dublin, "Warden"; St. Edward's, Oxford, "Warden"; St. Paul's, "High Master"; Stonyhurst, "Rector"; Victoria College, Jersey, "Principal"; Wellington, "Master"

THE BOYS' BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is 100,000 officers and boys, with 50,000 juniors in The Life Boys.—Abbey House, Westminster, S.W. 2.

CHURCH LADS' BRIGADE.

An organisation especially valuable for helping a parish to keep the elder lads to their religious initiated by Joi duties; was founded in 182, and combines a military method with moral and religious and connected instruction. It is estimated that 1,000,000 is its rhoods, P.S. Sisterhoods, P.S. Sisterhoods, P.S. W. H. Bolton training, and to-day there are over one thousand Tuffley; Heave Companies throughout the Empire, with upwards | Strand, W.C. a.

of 60,000 lads.—Headquarters, Aldwych House, Catherine Street, W.C.s. Chaplain-General and Secretary, Very Rev. Edgar Rogers, O.B.E., M.A., F.S.A.

THE BROTHERHOOD.

THE BROTHERHOOD MOVEMENT, "to lead men and women into the Kingdom of God, to unite in Brotherhood of mutual help, to win the masses of the people for Jesus Christ, and to encourage the study of social service," may be said to have been founded in 1875 as the outcome of the Pleasant Sunday Afternoon movement initiated by John Blackham of West Bromwich. The movement is non-political and unsectarian, and connected with it are other societies—Sisterhoods, P.S.A., Bible Classes, &c. President, W. H. Bolton; General Scretary, Rov. J. W. Tuffley; Headquarters, 37 Norfolk Street, Strand. W.C. a.

Zecondary Schools.—I. Boys.

A Secondary School, as defined by the Board of Education, is a school for pupils who intend to remain for at least four years, and up to at least the age of ro. It must provide a progressive course of general education of a kind and amount suited to an age-range at least from 12 to 17.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, so Gordon Square, W.C. z. President, L. W. Taylor, M.A. Joint Hon. Secs., W. Jenkyn Thomas, M.A.; F. R. Huristone-Jones, M.A.; Hon. Teasurer, W. W. Vaughan, M.V.O., M.A.; Ass. Sec., H. Marshall.—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite than the secondary school for the secondary school for white secondary school for boys in England or Wales administered under a definite than the secondary school for the form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (Sec., Rev. C. B. Armstrong, M.A., St. Columba's College, Rathfarnham) is similar to the I.A.H.M. ASSOC. OF ASSISTANT MASTERS IN SECONDARY Schools, so Gordon Sq., W.C. r. Sec., G. D. Dunkerley, B.Sc.

"Ses H.M.C." refers to preceding list of Headmasters' Conference Schools.

Denotes Membership of I.A.H.M + Denotes Dual School (Boys and Girls).

Becondary Schools .- IR. Girls.

For Dual (Co-Educational) Schools (Girls and Boys), see pp. 348-348,

A Secondary School, as defined by the Board of Education, is a school for pupils who intend to remain for at least four years and up to at least the age of 16. It must provide a progressive course of general education of a kind and amount suited to an age-range at least from 12 to 17.

ASSOCIATION OF HRAD MISTRESSES.—Head mistresses of Public Secondary Schools are eligible for membership. A Conference is held annually in June. *President* (1931-33), Miss E Strudwick, St Paul's Girls' School, Hammer-Secretary, Miss R. Young, 20 Gordon Square.

W.C x. "See G P.S." refers to preceding list of tabu-

James Robb, LL B.; Treas, Jas. Davidson CARNEGIE UNITED KINGDOM TRUST (1914), Comely Park House, New Row, Dunfermline
—Sec, Lt -Col. J. M. Mitchell, O.B.E., M.C., MA Object Income of fund to be devoted to the "Improvement of the well-being of the masses of the people of Great Britain and masses of the people of Great Artain and Ireland by such means as are embraced in the meaning of the word 'Charitable' in Scots and English Law." The Trustees are concerntrating upon the development of public libraries by means of grants (for book-pulchase only) to municipal libraries; grants in aid of county library development and for the further development of the National Central Library. They are also helping to promote schemes of Regional Library co-operation. In the sphere of Rural Development and Social Service they are co-operating with the National Council of Social Service in the following — Rural Community Councils, Village Halls, Educational Settlements in New Housing Estates, Young Farmers' Clubs, Music and Drama in Rural Areas, and Boys' and Girls' Clubs. In the sphere of Adult Education they are helping the Workers' Educational Association. They are also making grants for the re-organi-sation of public-owned Museums. Grants are also made in aid of Public Playing Fields and certain forms of Music and the Drama. Grants to individuals are excluded; the organ grant policy has been discontinued; and in general grants are not made for the election of buildings. Management.—By Trustees. Income

(1930).—£122,600 ARNEGIE DUNFERMLINE TRUST (operations confined to Dunfermline).—Sec.,J W. Ormiston. CARNEGIE HERO TRUST FUND (Income £ar,000), in peaceful pursuits within the British Isles and territorial waters. If rescuer has not sustained death or injury, the act must have been of an outstanding nature Giants or annuities may be awarded according to circumstances — Sec., J. W. King Edward VII's Hospital For Officers, SISTER AGNES, 27 Grosvenor Cresceut, S W z. KING EDWARD'S HOSPITAL FUND FOR LONDON, 7 Walbrook, E.C. 4.—Was inaugurated in 1897 to secure more efficient support for the ho-pitals of London and so to commemorate the 6oth anniversary of the accession of Queen Victoria. The Fund not only collects money for the voluntary hospitals, but helps to pro-mote efficiency by means of its annual grants, every individual claim being carefully con-sidered on its merits. Efforts are also made by various forms of propaganda to arouse and maintain a wider interest in the work of the hospitals generally. Total receipts, 1928, maintain a work of the work of the hospitals generally. Total receipts, 1928, £378,635; expenses, £14,00x; grants to hospitals and convalescent homes, £39,300 (including £30,750 for extensions, &c., from Wells legacies); funds in hand (including £30,750 for extensions, &c., from Wells legacies); funds in hand (including £30,750 for extensions, &c., from Wells legacies); gifts to capital), £3,638,586—Pres., H.R.H. THE SALVATION ARMY.

THE SALVATION ARMY was founded by General William Booth (b. 1829, d. 1922). In Dec., 1930, the number of Officers, Cadets and Employés was 32,455, of Corps and Outpots, 15,304, Local Officers (unpaid) 123,305. The number of countries occupied was 82, and of languages used 72. Connected with the Salvation Army are 1,452 philanthropic institutions, including 329 Industrial Homes, 24 Maternity Homes and 28 Children's Homes, 173 Sium Posts, 14 Prison-Gate Homes, 28 Shelters and Cheap Food Depots for the Homeless, 139 Labour Bureaux, 25 Farms, &c., 2,018 Industrial and Day Schools. The total raised in the British Isles during "Self-Denial Week" in 1932 amounted to £123,262. Balance-sheets and statements of account re-THE SALVATION ARMY was founded by General

lating to the General Funds or to the Social Funds can be obtained, post free, from ror Queen Victoria Street, E.C. 4.—GENERAL, Edward J. Higgins (1929), Queen Victoria Street, London, E.C. 4.

GIRLS' LIFE BRIGADE (Inc.).

An organisation founded by the National Sunday School Union in 1908, with the supreme purpose of keeping girls in close touch with the Church and Sunday School, and of training them for useful and noble Christian womanhood. Its four-fold programme covers every phase of a girl's life: Spiritual, Physical, Educational and Social. This interdenominational-temperance Movement has an international membership which is rapidly increasing. — Headquarters, 56 Old Bailey, London, E.C. 4.

Sinklespear's plays, dec, and Newspaper Roun, ros.m. to 6 p.m. Librarian, J. L. Douthwaite. GUY'S HORSITAL, St. Thomas Street, S. E. z.—Kounded by Thomas Guy (a bookseller), in 1731: the main entrance and quadrangle (with statue

of founder) are early 18th century. 650 beds.
HOLBORN VIADUOT, E.C. 1, was constructed in 265-2656 by order of the Corporation of the City of London from the designs of William Haywood, of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the "Hole-bourne"). The Holborn Valley Viaduct is 2,400 ft. long, and is mainly of iron construction. The cost (£2,27,00) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues; these dues were abolished in 1889 and 1902, and the loan is otherwise displayment.

its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1641. Four of its members—Duncan, Keayne, Sedgwick, and Spencer-who emigrated in the and Honorable Artillery Company of Boston, U.S.A. American soldiers and sailors may view

the annoury, on request.

HORSE GUARDS, Whitehall, S.W. z.—Archway and offices built about 1750. The head-quarters of the Commander-in-Chief until quarters of the commander-in-the diractions are specified on and Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into Horse Guards' Parade. Horse Guards' Parade, where the Colour is "trooped" on the King's Birthday, has been enlarged to 300,000 sq. ft. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 125,000 sq. ft.; Leicester Square, 100,000 sq. ft.). HOUSES OF PARLIAMENT, Westminster, S.W. x.—The" Palace of Westminster" was rebuilt in 1840-1850 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of £x,108,000.—Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days. from 10 a.m. to 3.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack files by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains. "Bir Ban" (124) tons gamed after size of the contains."

and when Parliament is sitting the Union Jack files by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains "Big Ben" (13½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliamont is sitting.

INNS OF COURT.—The Inner and Middle Temple, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the Temple Church (q.v.) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. 1) places the incident which led to the "Wars of the Roses" (1455-1485). Lincoln's Inn, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the place of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 15th century. the rath century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. Lincoln's 1nn Fields (y acres); the Square contains many fine old houses with handsome interiors. Grav's Inn. Gray's Inn Road, W.C. z., was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1504); the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1556). No other "Inns" are active, but Staple Inn is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposte Gray's Inn Road), and the Hall, with hammer beam roof, is intact; in rear of the hall is a picturesque Dutch garden, restored by the present owners of Staple Inn (the Prudential Assurance Company). Clement's Inn (near St.

Clement Dane's Church); Citiford's Inn, Fleet Street and Thavies Inn, Holborn Circus. Sergants' Inn, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 18g9.

KENSINGTON PALACE, W. 8.—Enlarged by Christopher Wren for King William III. (1891), and continued as a royal residence until 1760. The

topher Wren for King William III. (1691), and continued as a royal residence until 1750. The birthplace of Queen Victoria in 1819. Open on Saturdays and Sundays, a to 6; winter a to 4. Renaington Gardens (q.x.) adjoin.

KING'S COLLEGE HOSPITAL Denmark Hill, S. E. S. LAMBETH PALACE, S. E. x.—The official residence of the Archbishop of Canterbury, on south bank of Thammer: the oldest mark is 7th century, the of the Archbishop of Canteroury, on some using of Thames; the oldest part is 13th century, the house itself is early 13th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary. LAW COURTS, Strand, W.C. 2.—The Royal Courts of Justice were erected from the designs

of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1894-1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court Until they were occupied by the Supreme Court of Judicature (established in 2572 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (7 5). The Central Hall is 138 ft. long.
LITTLE BRITAIN, Smithfield, E C r.—Benjamin Franklin lived in Little Britain on his first computer to London. It was then a centre of the

ing to London. It was then a centre of the hookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholo-

mew's Church (q.v.).

LIVERY COMPANIES' HALLS.—The Principal Companies (see p. 607) have magnificent halls, but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL, Whitechapel High Street and Road, E. z. - Founded 1750. Hospital con-

tains 930 beds.

tains 930 beds.

LONDON MONUMENT (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3.

Built from designs of Wren, 1671-1679, to commemorate the Great Fire of London, which broke out in Pudding Lane, Sept 2, 1666.

ST. RAPRICLONEW'S HOSPITAL. Smithfield.

ST. BARTHOLOMEW'S HOSPITAL, Smithfield, E.C. z.—Founded A.D. zzaz by Rahere (see St. Bartholomew's Priory, p. 314). Present buildings mainly 18th and 19th centuries; main entrance ryoa. The Great Hell contains a series of portraits including Henry VIII. Harvey, Abernethy, Pott, Radeliffe, &c. Hospital for 760 beds. The Church of St. Bartholomew the Less (rebuilt

The Church of St. Bartholomew the Less (rebuilt z82) is within the hospital precincts; Inigo Jones was baptised in former church.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, W. z.—Eounded in 273. Hospital for 340 beds.

Present buildings date from z829.

ST. JAMES'S PALACE, in Pall Mall, S.W. z.—
(Not open to the public). Built by Henry VIII.
(according to tradition, from designs by Holphy): the Catabouse and Presence Chamber. (according to tradition, from designs by 9do)ein); the Gatchouse and Presence Chamber remain, and part of the Chapel Royal. A royal residence from regs to 1837. Royal Levées held here during the season. Representatives of Foreign Powers are still accredited "to the Court of 8t. James," and (by the King's permission) the Conference of the Allies was held there in Rebruser, ver.

St. John's Gate, Clerkenwell, E.C.z.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early reth century) and choir of Church (crypt zath century) alone

and choir of Unuron (crypt result behavior), some survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery. St. THOMAS HOSPITAL, Albert Emitsahkment, S.E. z.—Founded zaz.]. Present buildings (7 red brick houses) by Currey, 1868—7z. z.ooo beds.

SMITHFIELD, E.C. z.—Sir William Wallace was executed there (1905) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor* Walworth (1982) in the reign of Richard II. Anne Askew, a Protestant martyr (1946), was burned there in the reign of Henry VIII.; and under Mary I. (1953—1958) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggatt, Unitarian (1622), in the reign of James I. At Unitarian (z6zs), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gift figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, x666. Smithfield Market occupies the W. side of West Smithfield.

SOMERSET HOUSE, Strand, W.C. 2, and Victoria Embankment, W.C. 2.— The heautiful river façade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in x55s the palace passed to the Crown, and it was a royal residence until about the close of the ryth century. The building is now occupied by the Board of Inland Revenue and by the Principal Probate Repairty and the office of the Registrar-General of Births, Marriages and Deaths. In the Probate Registry (Central Hall) are the wills (*inter alm*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C. z. (Strangers not admitted).—Known in the City as the "House," muted).—Rhown in the city as the "House," was founded in 1773 and now consists of about 4,000 members. A dealer ("folber") does business only with other members; a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears." Charman of the Committee for General Purposes, Sir Archibald Henry Campbell; Deputy Purposes, Sir Archivald Hellry Campbell; Deputy Chairman, H. F. Chamen; Secretary, General Purposes Committee, A. L. F. Green; Secretary, Trustees and Managers, R. M. Brydone; Office,

New Court, Throgmorton St., E.C. a.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to bankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1860-1870 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860-1869; the Chelsea Embankment, 1871-1874. The total cost exceeded £3.000,000. Sir Joseph William Bazalgette (1879-1891) also constructed the London gette (1819-1891) also constructed the London main drainage system, 1848-1865, at a cost of £4,500,000. A medallion has been placed on a pier of the Victoria Embankment to com-

The "Sword of St. Paul" appears in the zst quarter of the City Arms, not "Walworth's dagger" as once commonly believed, as crossful repeated in an inscrip-tion in Fishmongers Hall.

memorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embank-

ment on the Surrey side.

ment on the Surrey side.

THAMES TUNNELS.—The Rotherhithe Tunnel (foot passengers and vehicles); constructed by the L.C.C. and opened in 2908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is x mile 440 yards, of which gao yards are under the river. The cost of the tunnel and its approaches was £,150,041.

The Bischwall Tunnel (foot passengers and vehicles) was constructed by the L.C.C. and opened in 2507, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly 12, miles, of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,405,000. Greenwich Tunnel (foot passengers only) constructed by the L.C.C. and opened in 2002, connects the Isle of Dogs, Poplar, with Greenwich. The length of the sulway is 400 yards, and the cost connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 40 yards, and the out was about £180,000. The Wookvich Tunnel (too passengers only), constructed by the L.C.C. and opened in zers, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 12. The length of the subway is about 500 yards, and its cost was £85,865. The Thames Tunnel (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (B.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The Tower Subway for foot passengers was opened in 1870, and has long been closed.

TOWER HILL E.C. x and E.C. 3, was formerly

Towns Hill, E.C. z and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LORDON, E.C. 3 (built by William the Conqueror, A.D. 1066-1087).—Admission to Jewel House, on all week days, 6d.; White Tower and Armouries, including Vaults, 6d.; to Bloody Tower, on all week days, 6d. Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from fasted at the office at gateway. Open from a May to 30 Sept., zo a.m to 6 p.m.; z Oot, to 30 April, zo a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. Constable, Field-Marshal Lord Methuen, G.O.B., G.C.M.G., G.O.V.O.; Lieutenant, It.-Gen. Sir W. P'dnund Honside, K.C. B., C. M., G. B.S. G., Major and Exident Governor, Lt.-Col. Dan Burges, P.E., D.S.O.; Keeper of the Jewel Home, Major-den. Sir George J. Younghusband, K.C.M.G., K.C.I.E., O.B.; Curator of the Armouries, Charles Houlkes, F.S.A. The Yeoman Warders retain their picturesque of the Armouries, Charles Houlkes, F.S.A. The Yeoman Warders retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (Edward V. and his brother), Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elisabeth, Sir Walter Raleigh, William Penn, Cranmer, Ridley and Latimer and many others were imprisoned in the Thyer. were imprisoned in the Tower.

TRAPALGAR SQUARE, S.W. z .- This space was laid out in the second quarter of the 18th century. In the Square are the Nelson Monument 142 feet high, with Landseer's lions round the base, and statues of Havelock, Napier, and Gerdon. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations of Armistice Day (Nov. zz-zz, zgz8). In the facade of the N. Wall of Trafalgar Square

are metal standard measures. Westminster Hall, S.W. : (built by William Rufus, A.D. 1087-1100 and altered by Richard II., 1377-1399), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is Houses of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 184). The Hall is see feet long, 68 feet wide, and so feet high. The hammer beam roof of carved oak, dating from 1339, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations of Newland of Parliament, of Parliament, or Par lations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards, S.W. z.— Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I.

was beheaded here.

The Waterloo Cup (Coursing) is won at Altoar, near Liverpool, Greyhound Racing, with a mechanical hare, is held several evenings weekly at Wembley, The White City, Harringay, Wimbledon, Clapton and West Ham. All the London greyhound tracing, and speedway meetings are held on some evenings when there is no greyhound racing. There are also speedways at Les Bridge, Clapton, and High Boech, near Woodford. The Calentta Sweep (on the race for the Derby) is promoted annually by the Royal Calcutta Turf Club. The Sweep is not open to the public and no "tickets" as such, are issued. It is confined to Members of the Club who are allotted Numbers in the drawing, each Number being of the value of Rs ze (Tub Kursus). The Sweep is drawn in Calcutta, Idia, usually on the Saturday proceding the race. No drawing list is issued, but members who have drawn horses are informed individually.

Laws Relating to Cabs in London.

MOTOR CABS.

FARE payable : (a) Not exceeding two-thirds of a mile, or for a period of time not exceeding s. d. seven and a half minutes o 6

(b) Exceeding do. : (1) For each third of a mile, or time not

exceeding three and three-quarter (a) For any less distance or time......

In addition to the above the driver is entitled to charge the following extra payments:-(z) Lugyage:-For each bicycle, child's

mail cart, or perambulator, od.; for each package carried outside

(s) Extra persons:—When licensed to carry more than two persons—for each additional person beyond two,

the whole journey...... o 6
Provided that one child or two children under the age of ten years shall count as one person.
HORSE VEHICLES.

Exclusive of the extra 6d, authorised by Home Secretary FARES BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter): If hired and discharged within the Four-Mile Radius, for any dis- s d. tance not exceeding two miles

The driver may notify, by means to be approved by the Commissioner of Police, that he is willing to accept a fare of 6d. for any journey not

exceeding a mile

For every additional mile or part of a mile of the four-Mile Circle, wherever discharged, for the first and each

succeeding mile or part of a mile
If hired within, but discharged outside the Four-Mile Circle, whole distance not exceeding one mile, is.; exceeding one mile, then for each mile ended within the circle, 6d.; and for each mile or part of a mile ended outside

FARES BY TIME: Inside the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, as. ; two-wheeled Cabs..

If above one hour, for every quarter hour of the whole time and for any less period, four-wheeled Cab, 6d.; if two-wheeled Cab If hired outside the Circle, wherever dis-

charged, for one hour or less whether a four-wheel or a hansom..... If above one hour, then for every quarter

hour of the whole time and for anyless period o If hired within, but discharged outside, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—Hirers of Cabs should pay-

ticularly notice these regulations, as disputes generally arise from their not being clearly understood. Whether hired by DISTANCE OR BY TIME, or

whether within or without the radius. LUGGAGE.-For each bicycle, child's mail s. d

cart, or perambulator, 6d.; for each package carried outside the carriage

NOTE .- Luggage carried on the footboard of a hansom-pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause.

EXTRA PERSONS .- For each above two (one child or two children under zo years of s. d age count as one person)

WAITING .- When hired by distance, and at the request of the hirer made to wait: for every 15 minutes completed—if hired within the Four-Mile Circle, 4 wheels, 6d.; 8. d.

If hired without Circle, a or 4 wheels ...

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabe are based upon a combination meter Motor case are used upon a communication of time and distance. When the cab is kept watting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is a six or more miles an hour, then the charge is a speed of six or more miles an hour, then the charge is a second or house the same transfer in house drawn case are by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between \$ p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by

time, for every mile or any part exceeding four miles, the fare regulated by distance. AGREEMENT to pay more than legal fare is not binding. If the driver agree beforehand to take any sum less than the proper fare, the penalty for

demanding more than the sun agreed upon is as.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.
Driver may demand a reasonable sum as a de-

posit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. renalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at any Police Station within twentyconductors as my roles station within twenty four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.
All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office,

rog, Lambeth Road, S.E.x; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office (see p. 414).

HACKNEY CARRIAGE STATISTICS. During 1930 there were licensed public carriages: — Hansoms, 6; clarences — animal 63, mechanical 8, 167; omnibuses—animal 1, mechanical 8, 163; chart-a-bancs, 1,76a; tramway cars—mechanical 2,72; total, 18,653. Drivers and conductors:—Cab drivers—animal 87, mechanical zo,927; stage drivers—animal z, mechanical 17,301; composite licences (stage driver and conductor)—animal 1; mechanical 4,039; con-

duotors, 19,745; total, 58,811.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London During 1930, 540 applicants for cab drivers' licenses passed the examination as to knowledge of London and its environs. 18,365 separate examinations were held. LOST PROPERTY.

Of lost property, 175,318 articles were deposited, of which 67,530 were claimed by the owners. The number of awards paid to drivers,

&c., was 36, 178.

Enquiries as to property left in a London omnibus, tram-car, or cab should be made at the Lost Property Office, rog., Lambeth Road, S.E. r. Office hours, ro to 4 (Saturdays, ro to x). The office is not open on Sundays, Good Friday, Christmas Day and Bauk Holidays. For property left in a motor coach, enquiry should be made at the office of the coach company concerned.

: LIGHTING-UP TIME.

By the Road Transport Lighting Act, 2927 (27 and 28 Geo. 5, ch. 37) "every vehicle on any road shall during the hours of darkness carry—

(a) two lamps, each showing to the front a white light visible from a reasonable distance;

(b) one lamp showing to the rear a red light visible from a reasonable distance:

and every such lamp shall, while the vehicle is on any road during such hours as aforesaid, be kept properly trimmed, lighted and in efficient condition, and shall be attached to the vehicle in such position and manner as the Minister

(of Transport) may by regulations presorbe.

It shall be the duty of any person who causes or permits a vehicle to be on any road during the hours of darkness to provide the vehicle with lamps in accordance with the requirements. of this Act and of any regulations made there-

und ar.

nd :r." (Sec. r (r).) (Regulations have been made and are con-

tained in S.R. & O. No. 723 of 2929.)
Whole or partial exemption may be given to whole or partial exemption may be given to wahloles used for naval, military or air force purposes (Sec. r (3) (b)); vehicles carrying imfammable or explosive goods of a nature specified in the regulations; vehicles when standing on places specially set aside for the purpose; vehicles drawn or propolled by hand, save as provided (Sec. s (a)).

The Minister way by regulation require or

The Minister may by regulation require or permit, on conditions, distinctive lamps to be carried displaying coloured lights on vehicles used as Hackney Carriages or public service

vehicles or vehicles used for naval, military, or air force, or police purposes, or as ambulances.
The "hours of darkness" are defined thus:—

(a) As respects the period of summer time.

the time between one hour after sunset and one hour before sunrise.

(b) As respects the remainder of the year the time between half an hour after sunset and half an hour before sunrise.

Bicycles (pedal and mechanical solo), pedal tricycles, and invalid carriages, require a single white light to the front.

Pedal bicycles and tricycles need not show a red light to the rear if they have attached an

unobscured and efficient red reflector. Pedal bicycles and tricycles and solo motor cycles need not carry a lamp if being wheeled by a person on foot as near as possible to the near or left hand edge of the carriage way.

Horse Vehicles.—A separate lamp showing a red light to the rear shall not be required to be carried if the lamps showing a light to the front also show a red light to the rear visible from a reasonable distance and no part of the vehicle or load extends more than 6 feet behind such lamps.

Any vehicle carrying a load overhanging later-ally more than zz inches from the centre of the nearest side lamp must have either an additional lamp on the sides where the load overhangs or the position of the one lamp must be such that no part of the load projects outwards more than as inches beyond a vertical line drawn through the centre of the substituted or additional lamp.

On any vehicle carrying a load more than 6 feet behind any lamp showing a red light to the rear carried in accordance with the Act, an additional or substituted lamp shall be carried so that such load shall not project more than 6 feet beyond such additional or substituted lamp.

Certain vehicles engaged in agriculture are exempt from carrying lamps.

There are special provisions as to vehicles Intere are special provisions as to venice towing and being towed. A lamp showing a red light need not be carried by the drawing vehicle; no lamp showing a light to the front need be carried on any vehicle being drawn; a lamp showing a red light need not be carried on any vehicle being drawn except the rearmost vehicle. Provided—if the distance between any such vehicles exceeds g feet, each vehicle shall be required to carry the same lamps as if it were not a drawing vehicle or a vehicle being drawn, and if a drawn vehicle carries a load that projects laterally more than as inches beyond the outer-most of the lamps showing a white light to the front, an additional lamp shall be carried on the projecting load so that no part projects more than zs inches beyond a vertical line through the centre of such lamp.

centre of such lamp.
Public Service Vehicles must, in compliance
with the requirements of The Public Service
Vehicles (Conditions of Fitness) and (Equipment
and Use) Provisional Regulations, 1931, be adequately lighted inside, and, in the case of doubledecked vehicles fitted with a permanent top, also
lighted outside at all times during the hours of
derkness when carring passengers.

darkness when carrying passengers.

Regnal Years.—The years of a king's reign are the regnal years, and each begins on the anniversary of his accession: e.g., Regnal year at of the present King began on May 6, 1932; regnal year at off of dating Acts of Parliament. The Summer Time Act of 1925, for example, is quoted as 15 and 16 Geo. V. ch. 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII. began on January sa, so that Acts passed in that reign are, in general, quoted with only one year number, but year so of this series ended on May 6, 1910, and Acts of the Parliamentary Session ages are headed so Edw. VII. and I Geo. V.

Number of Ambulance calls in 1915, 2,405; 1920, 19,414; 1925, 35,269; 1926, 39,447; 1927, 40,23; 1928, 43,415, 1929, 43,257

The Service is established for the conveyance

to hospital of persons suffering from accident or sudden illness in the streets or public places, or from accident in private houses. It is not, in ordinary circumstances, intended for the removal of persons suffering from illness in private houses. Urgent parturition cases are removed to hospitals on the application of a duly qualified medical practitioner or a certified midwife, provided that either a certified midwife or doctor accompanies the case. Calls for ambulances are made by means of the telephone, the operator being asked for "Ambulance." When communication is established the location of the accident should be given.

General Ambulance Section.

Ambulance Stations.

Eastern Ambulance Station, Brooksby's Walk, Homerton, E. 9 (near Homerton Railway Station).

North-Western Ambulance Station, Lawn Road, Fleet Road, Hampstead, N.W. 3 (near Hamp-stead Heath and Belsize Park Rallway Stations)

Western Ambulance Station, Seagrave Road, Fulham, S.W 6 (near West Brompton Railway Station).

South-Western Ambulance Station, Landor Road, Stockwell, S.W. 9 (near Clapham Road and Clapham North Railway Stations).

South-Eastern Ambulance Station, New Cross Road, S.E. 14 (near Old Kent Road Railway Station).

Brook Ambulance Station, Shooters Hill, Woolwich, S.E. 18 (nearest Railway Station, Blackheath).

The ambulances for general service are available for the conveyance, on payment, of private maternity, mental, medical and surgical cases, at any time of the day and night. Applications for ambulances should be made to the Head-quarters, Victoria Embankment, London, R.C., when the actual charge for any proposed removal can be obtained.

In addition to the above service and to that of the St. John Ambulance and Brigade, Ambulances are maintained by the City of London.

River Ambulance Service (for conveyance be-tween the wharves and river hospitals of sick tween the wharves and river hospitals of sick and recovered patients, the staff of the hospitals and visitors to patients, as well as stores and parcels). South Wharf, Trinity Street, Rotherhithe, S.E. z6 (z4 beds); Bermondsey zazó. North Wharf, Managers' Street, Blackwall, E. z4 (c3 beds). Steamers—Albert Victor, Geneva Cross, Maltese Cross, Red Cross, White Cross.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of nine Colonial companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual whether the company is conducted on the statutary system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter I.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 2x December, 1930.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less impor-tant in itself than in relation to premium income, cant in Reli cina mirriation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 18½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading,

because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher absorbed in expenses may regionately be nighter than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST .- The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is without deduction of Income Tax except where marked (N)-net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing poliview, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables H^m(*) and O^m(*) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The Om and Om (9) tables in conjunction are more stringent than the Om table alone, the Herry property and the strength of is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

Most large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merita. Tariff rates of promium per £100 insured against fire for the more common classes of risk are as follows—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous

proximity, s. 6d.

Household goods therein, usually as
A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on. from as,

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from as.

Most fire insurance companies transact accident and miscellaneous business, and if a strong

company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several com-panies. The "comprehensive" policies pre-viously referred to, combine in one contract protection against damage by fire to the contents protection against damage by fire to the contents of a house, or from burglary, housebreaking. larceny, theft, &c., and insurance against demestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of ss. per £ soo of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

INCOME TAX ALLOWANCES.

following rates:-one-half the standard rate in TAX ALLOWANCES.

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax on the "Taxable Income" (i.e., that part of the income on which the tax is actually charged—the first £175 of the taxable income being charged at half the standard rate of tax; the remainder at the standard rate of tax; the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the

BONUSES.

The following table gives examples of Bonus declared on Whole Life and Endowment Assurances for £100. In each case the rate given is in respect of a policy effected at age 30 next birthday, and the Endowment Bonus is based on a Policy maturing at age 60.

REPAYMENTS OF INCOME TAX ON PREMIUMS. (See also p. 458.)

The amounts repaid by the Income Tax Commissioners on account of Life Insurance Premiums during the years 1914-15 to 1925-26 are shown below. These amounts repaid are additional to the allowances made on assessment (see p. 458).

	Year	Number.	Amount.	Year.	Number.	Amount.
191 191 191	44-15 5-16 6-17 7-18 8-19	85,005 38,908 37,989 37,980	£144,185 179,678 343,189 537,761 551,073 588,637	1980-21	\$3,08x \$3,886	£679,337 784,433 610,464 633,997 £36,196 513,178

without participation in profits If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset This is called the "Discounted Bonus" or "Cost Price"

ANNUAL PREMIUMS FOE WHOLE LIFE
ASSURANCE.

Life assurance may be effected either with or without participation in profits If without participation, both sum assured and premium remain unchanged. If with participation, as a debt Policy shoulder or remain as a debt Policy should only be effected on this system in companies which bitcher remains as a debt policy should only be effected on this system in companies which can point to good and consistent bonus records. and whose valuation reserves are particularly strong

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits 1t is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher honuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the lates are usually

high to commence with, but are greatly reduced after a few years Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bouuses compare with valuation bonuses, especially in cases of endowment assurance

University Life—Total Domines guaranteed to amount to at least 30/- per cent. per annum for first ze years and 30/- per cent per annum thereafters

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their depends upon profit earning capacity—see first investment of small annual sums there is no

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bouuses attaching under a "with profit" Policy

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the end of 15, 20 and 25 years, or at death, if previous

Notes for page 465 .-

ces for page 405—

Australlan Mutual Co-operative, London Life and Mutual and Citizens' Rates are for quarterly payments.

† Caledonian—Increased rates for purchase money of £5,000 or over.

‡ London Life Rates are for exact sege stated, but are apportioned for actual age at time of purchase.

This Table shows amount of Annuity granted for every £ see paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty. [For Notes see page 44.]

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

Figures given as at end of 2929, except for Orders and Old Societies, 2222. Figures in membership column for "Oollecting Societies," represent numbers of assurances
 † Divides only Sick Fund
 Annual division about 524,000.
 † Collecting Societies, although registered under the Friendly Societies Acts, are also subject to the Industrial Assurance Acts.
 † Now a Deposit Society.

Building Societies are for the most part associations incorporated with limited hability the members who had not already received under the Building Societies Acts. The excepations of the member is a dvances, or by sale to the member is idding the tions are a few societies established prior to 1857, which have chosen to remain unincorporated. The object of building acceptance in The object of building societies is to assist their members in acquiring dwelling houses, business premises, or other freehold or leasehold property, for occupation or investment. Vembers' subscriptions are accumulated in a fund which may be augmented by deposits and loans, and advances are made from the fund to assist members in the purchase of properties. Security for advances is given by a mortgage upon the property purchased. Many, if not most, of the earlier societies were terminating. Many, if not In these societies the share subscriptions were accumulated until there was sufficient capital to make an advance to a member upon mortgage, and the right to an advance, or as it was called an "appropriation." was conferred upon the

advances, or by sale to the member budding the highest premium for the privilege of the appropriation. By later legislation, however, balloting for advances was prohibited for new societies. The Acts define a terminating society as one in which the rules provide for the termination of the society at a fixed date, or when a result specified in its rules is attained Usually the rules provide that a society shall terminate when all the members have received advances. Terminating societies are rapidly being replaced by the permanent societies, some of which have become very wealthy and important financial institutions.

All building societies are required to register their rules and file their accounts with the Registrai of Friendly Societies, who is also Registrar

of Building Societies The following is a summary of particulars extracted from the Registrar's Report :-

The H Demeda ? is	the small		

from standard permitted in fineness and in weight of coins when first issued from the Mint.

Standard Gold contains twenty-two twentyfourths (carats) of fine gold and two twentyfourths of alloy; fineness, 916 66, or 22 canats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 178. 10¹2d., and one ounce of pure gold, on the same basis, £4 4s. 11 1/4 d During 1931 the average market price of gold fluctuated about the mean value up to September 19 Since the suspension of the gold standard on September 11 the price has been fixed in relation to the \$, storling exchange being 106/11 on October 17. Bar Gold - The "bar," as purchased in the bullion market. is see oz. troy (except for the Far East, which requires to oz. bars).

Standard Silver formerly consisted of thirtyseven-fortieths of fine silver and three-fortieths of alloy; fineness, see. Silver for coinage, by an Amending Act (so Geo V ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, see; xa truyounces of soo fineness are coined into 66 shillings † [Another Standard, called the "New Sterling" or Britannia, of the fineness zz oz. zo dwt (958 33), is practically obsolete. It is occasionally used, however, for high-class plate]

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last twelve years was as follows :- rgrg, 57,1nd.; the last twelvey ears was as indows:—grap, 57,76...;
rgso, 67,46...; yags, 36,56...; yags, 34,746...; yags, 34,46...; yags, 34,46...; yags, 34,76...; yags, 34,76...; yags, 37,76...; yags, 34

quoted in cents per troy ounce fine. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by s'rgs; to express a United States price on the English system, multiply the cents by o'456s.

Bronze is an alloy of copper 95 parts, tin 4

• Issues on special occasions.

† By law a shilling weights one sixty-sixth of soc.

Troy; soc of pers silver would be used in codning 7s shillings of 98 fineness and 23s of 98 fineness.

† The logal weight of a penny is one third, of the halfpenny one-fifth, and of the farthing one tenth of an ounce avoirdupois; the halfpenny is one suck in diameter

† Duccontinued

parts, and zinc z part, or of copper es% parts, tin

and zinc 1/2 parts.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £30.

Melting of Coins.—The melting of British gold

and silver coin is prohibited.

and silver coin is promoted.

Light Geld.—Any person to whom it is tendered should break, cut, or deface any gold coin below the least current weight, but under the provisions of the Coinage Act, 1891, and an Order in Council of 15 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums

of row, £1, £5, £70, £20, £50, also for £100, £500, and £1.000.
Treasury Notes of the value of £1 and row were replaced by Bank of England notes as from

November 22, 1928.

Bank Post Bills can be obtained at the Bank of England for amounts of £xo and over at seven days sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn : they may be obtained at the Chief Office of the Bank

of England in London, or at any of the branches Legal Tender of Money.—Bank of England Notes of £x and res. are legal tender in Great Britain and Northern Ireland for the payment of any amount, those of the higher denominations are legal tender in England and Wales only. Change cannot be demanded except from the Bank of England. Gold, if of or above the least current weight, is legal tender to any amount. Silver is legal tender for sums up to £2, and bronze up to xad

British Coinage Statistics. — During rose the number of coins struck at the Royal Mint was 193,215,538, of which 164,936,670 were Imperial, 20,049,468 Colonial, and 8,229,400 Foreign.

BRITISH DOMINIONS.

Imperial Sterling Coins are the sole legal metallic currency in :-

NEW ZEALAND. FALKLAND ISLANDS. GIBRALTAR. ST. HELENA. Fiji WEST INDIES. See also JAMAICA, below.

Special Coins are current in addition to the Imperial series in :-

COMMONWRALTH. - Special AUSTRALIAN florins, shillings, sixpences, and three-pences in silver, and pence and halfpence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs, while the silver coins are of 500 fineness

UNION OF SOUTH AFRICA. -Silver and bronze coins, bearing special designs, and cor-responding to Imperial coins in denominations, weights and composition, except that the fineness of the silver is Soo. BRITISH GUIANA .- A special groat or four-

pence.

BRITISH WEST AFRICA.—Silver and also
"alloy metal," zs., zs., 6d., and 3d.,
One penny, one halfpenny, and onetenth penny (nickel-bronze).

The doubles (= z penny), 4.

GUERNSRY.—Eight doubles (= 1 penny), 4,

a, and a double. JAMAICA. - Nickel-bronze pence, halfpence,

and farthings JERSHY. - Special pence, halfpence, and farthings

MALTA. - One-third of a farthing (bronze).

HALL MARKS ON PLATE .

Assay Office Marks. - Official marks stamped on

gold and silver plate at Assay Offices:

Assay Office ... Distinguishing Mark.
Leopard's Head (uncrowned from smiths' Hall)

1300 to 1478-9, when it became 2300 to 2478-9, when it became crowned until 2822, since when

it has been uncrowned). From 1697-1720 this mark was not used in London.

Birmingham... Anchor.

Chester Sheffield City Arms (a Garbs and a Sword). Crown.

Edinburgh... .. Castle

Tree, Fish & Bell. Glasgow Dublin Harp crowned

The Assay Offices at Bristol, Exeter, Newcastleupon-Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1263).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or

Christian and Surname) of the maker.

Data Mark (instituted in 1478-9) —The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the type of letter indicated by a letter on a shield, the type of letter and the shape of the shield being changed in cycles of so, as or as years. In so year cycles (London, invariably, Chester, alternately with as, and Sheffield, alternately with as), the letters J, V, W, X, Y, Z are omitted; in syvear cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is contract from the alphalet: at Cleavew all is omitted from the alphabet; at Glasgow all the letters are employed in a se-year cycle

The Sovereign's Mark.—The "lion Fine"

passant," for silver articles only, was first used in 1544, and has been is use ever since (except during the Higher Standard

period, 1697-1720). From 1544-9 it was crowned; since then, uncrowned. The Sovereign's Head —The portrait of the reigning Sovereign was impressed on all plate reigning Sovereign was impressed on all piace chargeable to duty assayed from 1954—1859—30. The duty on plate was removed in 1850, and the Sovereign's head does not appear on plate assayed before 1954 or after 1890.

The Crown.—On 901d articles only, in lieu of the "lion passant" on silver.

the "lion passant" on silver.

Britannia.—A full-length figure of Britannia
was impressed on silver plate of a special
standard of fineness (xr oz. ze dwt. of fine metal
to each ro dwt. of alloy) during a short period
only, x697-x720; since that date the Britannia
quality has been manufactured in small quantities, bearing the figure of Britannia, with the
lion's head erased and the date mark.

Craylic Silvers. A titles of silvers between the market.

Sterling Silver .-- Articles of silver plate marked at an asay office are guaranteed to be of the requisite standard of purity and to contain zroz. sdwt. of fine metal to each z8 dwt. of alloy.

Sterling Gold .- Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The relative values of the various standards is shown below:

Pure gold, a4c. 4 4 11½ 3rd Stand., 15c. a 13 18 Standard, asc. 3 17 10½ 4th ditto, 1sc. a 2 5½ and ditto, 18c. 3 3 8½ 5th ditto, 9c. 1 11 10½

* For the greater part of the material for this article readers of the Almanaca are indebted to the late Mr Wilfrid Oripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

London (Goldsmiths' Hall) Date Marks From 1438 to 1936.

The Collector will find but little difficulty in another, presuming his knowledge to be insufficient to judge by the style and period of the article tradition.

article itself, e.g..:

An article marked with the letter F 2721-2 can be distinguished from letter F 1801-3 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1821); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1821-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801-3); the absence of crown on leopard's head, and the presence of the Queen's vice the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 12, 1906, under which the mark for each Assay Office is ordained to be:—London, the sign of the Constellation Leo; Birmingham, Equiliateral Triangle; Chester, Acorn and two leaves; Shefield, the sign of the Constellation Libra; Edinburgh, St. Andrew's Cross; Glaspon, double block letter F inverted; Dublin, Boujet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

		George V. (A.D. 1910-).

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Nets.—The first portion (I-VIII) of this table is based upon that given on p. 347, Parts IX and X on p. 777, and "Modern" on p. 852, of "A History of Architecture on the Comparative Method" (9th ed.), by Sir Banister Fletcher, P.R.I.B.A., F.S.A. (Bataford.)

MARKS ON PORCELAIN.

PUTTERY or porcelain usually bear distinctive marks either painted on or stamped into the bottom of the article. These marks may indicate the factory, the potter, or the decorator, and in the case of Chinese or Japanese ware the dynasty at the date of manufacture. In the factory at Sevres the practice of marking the date by letters was also followed, and this has led to the forging of many bogus pieces. The factories in Europe generally indicate the place of origin only Special knowledge is therefore required of the collector, and the learned amateur notes not only the mark, but the material, the colouring, and the decoration of the article, and frequently has to compare it with one that is unquestionably genuine. The following hints will, in the absence of the more learned dissertation of Mr. Chaffers, serve as a guide to the ordinary possessor or purchaser.

In the manufacture of porcelain, two main varieties of paste are used, termed 1espectively hard and soft, or, as the French have it, pate dure et pate tendre. The hard paste contains more alumina and less silica than the soft When baked, it is translucent, hard, and sonotous on being struck; it has a white, milky colour, and can sustain, without injury, sudden atternations of high and low temperature. Its essential constituent is pure white kaolin, a variety of clay which is exceedingly scarce in England and other parts of Europe, but of comparatively common occurrence in many districts of China and Japan The soft variety has an unctious, cream-like enamel, and is soapy to the touch, it is lighter than the other kind, and less hard (a knife will scratch) it, and does not require so great a heat for solidification.

The manufacture of hard, and what is often considered the only true, porcelain, was invented by the Chinese about \$76. BC, and attained its greatest perfection at the beginning of the rith century. The secrets of the art were, in rit, carried over to Japan, whose inhabitants soon became formidable rivals to the older makers. Specimens of this casten ware had, from a very early date, occasionally found their way into Europe, but no regular importation took place until the middle of the 16th century, when a small settlement was formed on the Japanese coast by some enterprising traders from Portugal. It was from them that the ware first received the name it now bears, its translucence probably reminding them of the cowne-shell which, from a supposed resemblance to the shape of a young pig, had been termed, in their language, porcellains.

In 1641 the Japanese authorities, having viewed with strong disapproval the many conversions to Christianity effected by the Portuguese missionaries, expelled the settlers from the island, and gave to the Dutch, who could always be trusted to refrain from proselytizing, the exclusive privilege of trading with them. Although the commercial industry of the Hollanders supplied England and the Continent with comparatively large quantities of the Oriental porcelain ware, the fluer specimens were eagerly sought after, and, by Queen Anne's time, all classes seem to have become infected by a collecting mania. The high prices

they fetched naturally led to many attempts at imitation, which, owing to the difficulty in finding a suntable clay, all resulted in more or less marked failure, nothing but the inferior pate tendre being produced.

The first successful experiment was made, with the kaolin from Aue in the Erzgebirge, by J. F. Bottcher, who had act dentally gained a knowledge of its valuable proporties. In consequence of the discovery, Augustus, Elector of Savony, was induced to set up a porcelain factory near Dresden, with Bottcher as director, and, in 175, the latter succeeded in producing an almost perfect imitation of the hard, white porcelain of the East. The most elaborate precautions were taken to prevent the secret of its manufacture getting abroad, but a very few years later, a heavy bribe extracted it from one of the workmen, and a rival factory was established at Vienna. The works at Berlin, Badon, and other towns in Germany all owed their origin in the same way to the dishonesty of different imployés. The decorations of the earlier German productions were morely mintations, in blue and white, of the Chinese and Japanese; but towards the middle of the 18th century elaborate miniature paintings of flowers, insects, and copies of well-known pictures became fashionable. The best statuettes and groups were made between 1731 and 1756; the finest of these are in plain glazed white, though many are gally decorated, and the dress richly omamented with fine lace.

Of the factories in England, it is doubtful which has best claim to be termed the oldest; both the Chelsea and the Bow works were established before 1750, and those of Derhy and Worcestei very shortly after that date. Though at first confining themselves to imitations of the simple Oriental models, the English makers soon attained great perfection in the German and French styles, and, after the discovery of the Cornwall kaolin in 1755 their best productions ranked, in every respect, very little lower than the masterpieces of Diesden and Sevices

In France, a factory for the soft variety had been set up at St Cloud as early as x695, and some excellent work was produced there. In x753, works under royal patronage were set up at Vincennes, and, three years later, temoved to Sevres. The best productions were sent out during the nine years which followed the purchase of the manufactory by Louis XV. in x760 At the end of this period the discovery of kaolin near Limoges led to a discontinuance of the manufacture of pate tendre in favour of the more highly valued jate dure. Sevice porcelain, made for use, is usually painted with flowers or figure-subjects on a plant white ground. The purely decorative pieces have panels with pictures on a white ground surrounded by frames of gold scrollwork; the main body of the piece is covered with one deep or brilliant colour.

The following are the thief marks used in the more important European manufactories. The description of the appearance of the various porcelains may be found useful in the detection of forgenes, spurious piecos being unfortunately almost as abundant as genuine specimens.

GERMANY -- (Hard Paste).

DRESDEN.—The porcelain has a cold white, almost bluish, tint. The marks are always in blue.

1709-1712. -The initials of Augustus Rex.

1712-1720 -The wand of Æscu-

zyaz, with intervals to present time. -- The crossed swords.

1731-1733 - The same, with a dot between the handles

1796 -1814 (Marcolini period). — The same, with a star between the handles.

Scratches across the mark show there is some defect in the piece

Sometimes the handles meet, and cause a slight variation in the appearance of the mark.

K.P M. was painted in italics on pieces intended for royal use.

BRRIN —The potcelain closely resembles that of Dresden. In 1761 the manufactory was made a royal establishment. The marks are generally in blue, though a brown sceptre is occasionally found

2752-2762.-A capital W, with two of the strokes crossing.

2761 onwards.—A sceptre Occa sionally there are two sceptres, crossed to imitate the Dresden mark At the present day the porcelain is stamped with the Prussian eagle, encircled by the words KORNIGL, PORSELLAN MARUFACTUR.

ENGLAND-(Soft Paste till 1755).

CHELSRA.—The porcelain is of a pure white colour, with a tint almost equal to that of the hard kind. The mark is an anchor, in gold for the best, in red for the second quality.

Bow.—The porcelam is of a fine unlky white In 1750 the works received the name of New Canton; and in 1775 were transferred to Derby. The marks are very various, and often not distinguishable from those of Chelsea. We give two varieties, which generally occur in blue.

DERBY.—The porcelain is very transparent, and of a good white colour. In 1769, the proprietor of the factory, W. Duesbury, purchased the kilns and moulds of the Chelsea works. The marks are in pink, violet, or gold. The earliest mark was an italic D

After 1769, the same, crossed with an anchor (DERBY-CHELSEA).

After 1775, the date of the first royal order, a crown with crossed daggers, or a *D*, or an anchor (CROWN-DERBY)

WORCESTER.—The porcelam is not of a very good colour, but is tolerably transparent.

The enthest mark was a W or a crescent, in blue. Crossed arrows, and imitations of Chinese and Dresden marks are also found.

FRANCE (Soft Paste till 1770)

VINCENNES and SEVRES — The porcelain is remarkable for its creamy softness of colour The Sevres period dates from 1736, when the factory was removed thither from Vincennes.

1745 1753.— Two italic Ls crossed 1753-1756.—The same, with a letter in the centre. The letters A-Z denote the years 1753-77. The Sevres period begans with D

2778-1795.—The period of double letters AA-RR. 2795-1800.—R F., the initials of République Française

From 1800 to the present time, the mark has varied with each change of sovereign or government, and is, generally, self-explaining.

The Weights and Measures Act of 1878, super-seding all previous laws, enacts the legal neasures for Great Britain, beaing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two mdependent standards for weights and measures. The Gallon, the capacity standard, wet or dry is based upon the Pound. The Act of 2878 defines the Gallon as the volume of ten standard. pounds of distilled water weighed in air against brass weights, both water and air at the tem-perature of 62° Fahrenheit, with the barometer at so inches

Anothecaries' Weight. Measures of Weight

grams = 1 scruple (31) (= 1'296 Grammes), scruples = 1 drachm (31) (= 3'888 Grammes) so grains 8 drachms=1 ounce (= 31 1035 Grammes)

Measures of Capacity.

60 mmms (mm) = 1 fluid drachm (= 3 550 Mullilitien). 8 fluid drachmfluid ounce (= = 84123

Centultires).

I piut (= 0 568 Litre) I (FALLON (= 4 5459631 so fluid onnees 8 pints Litres

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' diachim is not the same as the Avondupois drain, and is spelt differently. A fluid onnce of distilled water at a temperature of 6s° Fahrenheit is equal in weight to the Avoidupois ounce (437's mains). A fluid drachm (54'6875 grains). & fluid drachm (54'6875 grains).

Approximate Equivalents . - r "table-spoon" = 1/4 fluid or , r "dessert spoon" = 1/4 fluid or , r "tea-spoon" = 1/4 fluid

Avoirdupois Weight.

7000 grains $(g_I) = 1$ pound (Ib.)16 drams $(d_I) = 1$ ounce $(a_I) (= 28 350)$ Grammer)

16 ounces = 1 POUND (= 0 45359343 Kilogram)

14 pounds = 1 stone* (= 6 350 Kilograms)
28 pounds = 1 quarter (of a cut) (= 12 70

as pounds = 1 quarter (of a cret) (= 12 70 Kdograms)

100 pounds = 1 cental (=45/359243 Kdograms)
4 quarters (112 lb.) = 1 hundred weight (ext.)
(= 50 8028 Kdograms)

2 onnes on 1205 6 Kdograms

1 onnes on 1205 6 Kdograms

Troy Weight.

24 grains = 1 pennyweight (dwt) (= 1 5552 (+) ammer)

so dwt = rounce (= 31 1035 Grammes).
For gold and silver the ounce, divided decimally, and not into grams, is the sole unit of weight. The Troy ounce is the same as the Apothecarles' ounce, = 480 Avoirdupois grains, (31 1035 Grammes) in weight. There is no Troy, Pound.

Jewellers' Weight.

The metric carat of soo millegrammes is the legal standard of weight for precious stones and pearls.

* The Smithfield stone (for dead meat) is \$ 1b. only.

Measures of Capacity, 4 gills = 1 pint (= 0.568 Litre). z pints = 1 quart (= 1'136 Litres). z pines = 1 quart (= 1130 Lures).
4 quarts = 1 (ALLON (- 47454653 Lutres).
2 gallons = 1 peck (= 9'0919 Litres).
3 gallons = 1 bushel (= (3'637 Dekallires).
3 bushels = 2 quarter (= 2'090 Hectolitres).
4 chaldron is 36 bushels = 4½ quarters.

Measures of Length. ra inches $(m_1) = 1$ foot (ft_1) (= 0 30480 Metre) 3 feet = 1 yard (yd) (= 0 914309 Metre) 6 feet = 1 fathom (= 1 8288 Metres). 5½ yards = 1 pole (=5 cags Metres).
28 yards = 1 chain = 100 links(=20 1168 Metres). 10 chains = 1 furlong (= 201'168 Metres). 8 furlongs = 1 mile = 1,760 yards (= 1 6093 3 miles = 1 league (obsolete). | Kilometres). A Cricket Petch 13 22 yards (one chain) between the stumps

A Laun Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single)

A Croquet Lawn is 105 × 84 teet (tull size) or

A Couplet Land is so x eq. (ve. (time size) in a smaller multiple of g x 4 feet.

A Badminton Court is 44×20 ft, with not 30 ins deep and g ft high at centre.

A Polo Ground is 300 × 760 vds.

A Football Ground (Association) is zo x 82 yds.

(full size); (Rugby) 110 × 75 yds. (full size).

Birmingham Gauge. The equivalent of an inch is 15,0 B.G

numbers proceed by units down to 1/0 R.G., which = 0 3964 inch, and from r B.G. ('3532 inch) by units to 52 B.G. ('00095 inch) Square or Surface Measure.

144 vq mehes = 1 sq foot (= 9 2903 Sq. Decimetres).

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow .—

As a unit of resistance, the international Ohm, which is based upon the ohm equal to 10 units of resistance of the C G.S. system of electromagnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14 4521 grammes in mass, of a constant cross-sectional area, and of a length of 106'3 centimetres.

As a unit of current, the international Ampère, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of o corris

of a gramme per second.

As a unit of electro-motive force, the international Volt, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere, and which is represented sufficiently well for practical use by 1227 of the R.M.F. between the poles or electrodes of the voltare cell known as Clark's cell at a temperature of 13° (°, and prepared in the manner described in a certain specification

As a unit of quantity, the international Condomb, which is the quantity of electricity transferred by a current of one international

ampère in one second.

As a unit of capacity, the international Farad, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity The unit generally used in practice is one-millionth part of this, or the nucrofarad.

As the unit of work, the Joule, which is rounits of work in the CGS system, and which is represented sufficiently well for practical use by the energy expended in one second by an inter-national ampère in an international ohm. In practice the watt-hour is usually employed represents the work done by such a current in an

hour, and equals 3,600 joules.

As the unit of power, the Watt, which is remits of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second 746 watts = x horse-power, and the value of a Board of Trade unit (B O.T. I.) is x,000 watt-hours, or 3,600,000 joules, or 11/3 house-power hours.

As the unit of induction, the Henry, which is the induction in the circuit when the E.M F induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampère per second

In Scotland, and at certain places in England and Wales at which the ('ran Measures Act, 2908, has been put into operation, fresh herrings must be sold by the Cran, containing 27% imperial gallons, or Quarter Grass of 9% imperial gallons. In the Isle of Man and in Ireland herrings are sold by the Maze, which contains a place of land cach. On the East Coast + but of England, at places where the above-mentioned iong hundreds of rafe each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the Last, which contains 13, soo fish. They are counted by the Warp, which is 4 fish. 33 Warps = x Long Hundred, 12s; 10 Hundred = x Thousand, 2,3so; 20 Thousand = x Last, 12,200. Cured herrings are so Thousand = 1 Last, 13,200. Cured nerrings are sold in barrels, the capacity of which, in Scot-land, must always be 25% imperial gallons, or in half-barrels of 13% gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the

England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, rorz, is in force. A Quintal of fish (Newfoundland, &c.) axib,; a barrel of anchovies = 30 lb.; a "box of fish" is about 90 lb.; a Newfoundland "box of lish" contains roo lb., rrs lb., or rss lb., to suit the requirements of the different markets.

Geographical Measures.

The North and South Poles are two points a the opposite extremities of that diameter of the earth round which it revolves. The Equator i a great circle, equally distant from the North and South Poles. For geographical purposes the surface of the earth is divided by circles called the circles of Latitude and Longitude. The circles of Latitude are small circles parallel to the Equator. The circles of Longitude are great circles perpendicular to the Equator, and passing through the North and South Poles.
These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England) The Date or Calendar

Line is shown on p. 78.

A Geographical Mile is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 5,046 feet at the Equator to 6,x08 feet at the Poles. The mean equator to 6,08 test at the roles. Inc mean length of the geographical mile is 6,076 feet. The Nautical Mile is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the Advarally Knot of 6,080 feet, divided into 10 cables, which are assumed to be zoo fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English

miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

Measures of Heat.

The comparisons in col. a are of Thermometers constructed by Fahrenheit, Celsius and Réaunur.

Gabriel Daniel Fahrenheit, F.B.S. (1985-1725), was born at Daniel, and lived a great part of his life in England and the Netherlands. He was elected in England and the Netherlands. He was elected a Fellow of the Royal Society in 1724. Anders Calsius (1710-1744), inventor of the Centigrade Thermometer, was born at Upsala, Sweden, and was for many years Professor of Astronomy at the University of Upsala. René Antoine Ferdault de Récumer (1683-1797), was born at La Rochelle, France, and became known as "The Pliny of the XVIIIth Century" on account of his work as a Natural Historian.

Thermometer Comparisons

Mantical Measures

6 feet = 1 fathom. roo fathoms = r cable length. to cables = r nautical mile.

60 nautical miles = 1 degree The assumed length of the cable is 600 feet (=18s.87 metres), but it is strictly 606.97 feet (=18s metres). The conventional Nautical (= 185 metres). The conventional Nautical
Mile (the Knot in speed measurements) is no
cables, assumed at 6,680 feet (strictly 6,669 feet),
but the Nautical Mile is strictly the length of
a minute of the meridian and differs according to latitude.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The Ton-register, the unit of capacity of a ship, was originally the space occupied by a Last of xo Quarters of wheat = xoc culic feet. Thus cubic space is the Ton-register used by all maritime nations, xoc English cubic feet.

Gross tonnage is the sum in cubic feet of all the

various enclosed spaces of a vessel, divided by 100. Net tomage is the gross tomage less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used

for passengers or cargo.

Dead-reight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the

load water line (q r.)

Displacement tonnage is the number of tons of es water displaced by a vessel when charged to the load water line (q, r), ie, it is the weight of vessel and contents in tons

Load water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest

art of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the loadwater-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold of a vessel, A vessel wholetany targoth her hold or passengers or their luggage absent is said to be "light ship," or "light," or "in ballast." Free Board is the distance from the main or

upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel affoat with two compartments holed

Bells and Watches on Board Ship.

Bells.—Time is kept by means of a bell which is struck every half hour. Anyone who, in an effort to terminate his watch prematurely strikes the bell early, is accused of "warming the bell," an expression which has grown to include the doing of anything before the appointed time.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Part (left). The day commences at noon, and is thus divided —

Watch.	Bells (in 1/2 hours).
Afternoon	noon to 4 p.m., r to 8.
First Dog	4 p.m. to 6 p.m., z, z, 3, 4.
*Last or †Second	
Dog	6 p.m to 8 p m. 1 2, 3, 8.
First	8 pm to midnight, r to 8
Middle	midnight to 4 s.m , 1 to 8
Morning	4 a.m. to 8 a.m., 1 to 8
Foremon	8 a.m. to noon, x to 8.

Last =Royal Navy; † Second in Mercantile Marine. the yarn.

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having Dog Watches, which are made by dividing the hours between a n.m. and 8 p.m. into two Watches

For TIME AT SEA see p. 78.

Speed of Ships. The Knot is a measure of speed of ships. The following table shows the equivalents of z to 42 knots in land (statute) miles per hour -

knots :	Miles	Knots	Miles	knots	Miles

Measures of Energy, &c.

In Physics the unit of force is the dine, the amount that, acting for one second on one gramme mass, gives it a velocity of one centi-metre per second. The Billish unit is the poundal, which in one second gives one pound a velocity of one foot per second. One poundal = 13,825 5 dynes. In Meteology the unit of atmospheric pressure is the Bar, equal to the pressure of 1,000,000 dynes (r megadyne) per sq. centimetre The Meteorological Bar is thus 1,000,000 Chemical Bars

Horse power is energy exerted at the rate of 550 foot-pounds per second, an alternative unit is the kilowatt (xos kilogram-meters per second)=

737 59 foot pounds per second

Thermal Unit. The British Thermal Unit (B Th U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The Gas Therm = 100,000 B Th U If U = en ft consumed, H=declared heat value of the Company's

Yarn Measures.

Cotton and Spun Silk Count -Thread = 11/2 yards

Lea or Skem, skn. = 120 yards.

Hank, hk. = 7 Skeins, or Leas = 840 vards Spindle, 1,dl. = 18 Hanks Counts = the number of Hanks in v lb

Bundle Hauks, either of 5 lb or 10 lb

Reels of cotton vary from 30 to 1.760 vards they must be marked correctly.

Bundlesof Cotton are chiefly made up for export,
Worsted Count -- Wrap, 80 yards; Hank = 560
yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linea Count .- The Hank or Lea is 300 yards, and the number of these in all is the count of the

varn A Spindle is 48 hanks; a Bundle is 200 hanks.
West of England Count.—The Hank is 320 yards,
and the number of hanks in z lb. is the count of

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures.

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made per-

system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade

z .- MEASURES OF LENGTH.

```
10 millimetres = 1 centimetre = 0'30370113 inch
(min) (cm.)

to centimetres = 1 decimetre = 3.9370113 inches.
                      (dm)
10 decimetres = 1 MRTRE (m) = 1 0936143 yards
10 metres .. = 1 dekametre = 10 036143 yards
                      (dam.)
10 dekametres = 1 hectometre = 100'36143 yards
                      (hm')
zo hectometres= z kilometre = o 62137 mile.
```

(km) A kilometre is approximately fire eighths of a mile, so that 8 kilometres may be regarded by nedestrians as s miles.

THE UNITED STATES.

The weights and measures of the U.S.A. are the same as those of Great Britain, with the following exceptions -

Weight —In the short ton of 2,000 lb., the Cental of 200 lb takes the place of the Cwt in the long ton. There are Two tons, therefore, the long ton of 2,240 lb, the short ton of 2,000 lb.

Capacity—For gram, the old bushed of 2,500 ID.
Capacity—For gram, the old bushed of 2,500 i2
cubic inches; its gallon = 568°3 cubic inches.
This is commonly called the Winchester bushel, though really of the slightly different London standard

For liquids, the old wme-gallon of agr cubic niches, two-maths of the British gallon and = 55,317 8 grains of water. It is divided into 8 pluts = 7,889 7 grains of water = 16 6 inperial ounces. In medicane the pint is divided into 16 fluid ounces = 455 6 grains of water, and the ounce into 8 fluid drachins of 60 minus

BRITISH DOMINIONS.

Australia and New Zealand .- Same as British Canada.—Same as British but with short ton of a,ooo lb., as in U S A
Newfoundland.—Name as British.
Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the cental of 100 lb, bring used as well as the curt. of 112 lb. The Old Island Measures are as follows. Jerset. Vergée (Normandy Guernsey

100d) = 0'44 &cre | 04 Acre | Bushel = 8'9 gallons | 5'8 gallons | 5'8 gallons | -5'8 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7,6'3 grains | 7 British India.

Ungul - - 0 75 inch. Guz, usually 33 inches; also the yard. = 2,000 yards. = 0 625 acre Cawny (Madras) Tola (rupoe-weight). , - 1 33 ,, ... = 180 grains Seer (Liquid) Candy = 1 760 pints Candy ,, = 500 lb. Visham = 3 lb. , Dangali = 3 pints

Parali = 15 gallons, Catty (Singapore) = z_{13} lb. Irish Free State. Same as British
Malta. Pikul

The Metric System Old Maltese Measures.

= 1'745 lb

The Metric System is compulsory in the case of chemists, and is permissible (along with British weights and measures) in other cases. In British weights and measures) in other cases. In addition, the following old Dutch measures are still used.—Liquid Measure. Leaguer=about 18 imperial gallons; half aum = 13½ imperial gallons; half aum = 13½ imperial gallons. Capacity: Muid = 3 bushels. The general surface measure is Morgen, equal to x1254000 acres; 1,000 Cape lineal feet are equal to x23 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The Metric System has been adouted by the whole of Europe (except Great Britain) and is permissive in all countries.

China.

Tael weight	=	z.33	oz.	Ch'ih	£	1'175 feet.
Catty ,,	=	1.33	lb.	Chang		11'75 feet.
Picul ,,	=1	33.33	lb.	ш	=	2,115 feet.
Ts'un	=	1'41	inch	es.		

Egypt.

The Metric System of Weights and Measures and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use. with their British equivalents, are as follows :-Lenath-

Dira Haladi (used for piece goods)= 29 83 inches Dira Mamari, or Pic (used by

architects) = ag'53 inches
Ossaba(used for agricultural land) = xx'6< feet

z Qirat=209 3 sq. yards , z Feddáu (=24 qirats)= 1.038 acter Capacity-

Arpent, 100 80, perches = 1 26 acres.

Pound = 7.554 grains. Settler = 34.327 gallons;

Boisseau (1) = 2.86 gallons. Pinte = 1.76 pints.

Old Hebrew Measures. Talmud Cubit = st 914 in.; Egyptian Cubit = 18'24 in. Cubit of Ezekiel = 25'26 in.; Reed = 151'6 in. Kikkar (Alexandrian talent) = 50 minas of 60

shekels. Shekel = ½ oz., of 8 gerah, or (Shekel of the Sanctuary) of s beka, 4 reba, 20 gerah.

Bath (fluid), Epha (corn) of 6 hin, 18 cab, 72 log = 6427 British gallons.

Cor or Homer (20 ephas) = 8*352 bushels.

DOUBLE CONVERSION TABLES FOR WEIGHTS AND MEASURES.

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples —1 centimetre = 0.334 inch and 1 inch = 2.540 centimetres 1 metre = 2.642 and 1 yard = 0.914 metre. 1 kilometre = 0.621 inlic and 1 mile = 2.662 kilometres.

Example z — What is the present value of a Leuse having zy years to run of the net annual value of £200, interest being reckoned at 4 per cent / Asswer — 19 14 years purchase, or £1,914

years purchase, or £.1544

Examin x.—A man aged 54 in the recent of a pension
or annuity of £500 a pen net wishes to commute that
for a present payment, interest being reckoned at 5 per
cent. How much will be receive? Annux — Looking
at the Table of Expectation of Life qv 1, it will be seen
that the expectation for uge 54 is about 27 years; and

from the above table an annuity certain for 17 years interest at 5 per cent is worth 11 27 years purchase. The present payment required would therefore be £2,227 approximately

approximately

Note to Example 2.— This method is only approximate.

The values of aumities which depend on hives of a given
present age when properly calculated according to a
given mortality table and a given rate of interest, are
always somewhat less than those given by the method
used in this evaniple.

REPAYMENT OF PUBLIC LOANS.

SUMS needed annually for the liquidation of a debt (principal and interest) of \pounds_{100} , at the stated percentage, in 5 to 80 years. If the loan be for $\pounds_{1,000}$, each annual must be multiplied by 10, and 80 on. Thus, a Municipal Loan of $\pounds_{1,000,000}$ and 15 percent, repayable in 80 years, would cost the ratepayers $\pounds_{51,031}$ 3x. annually for that period, and would then be extinguished.

REDEMPTION OF CAPITAL

BY ANNUAL PAYMENTS

THE following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £x00 in return for so many aimual premiums, c.y., an Insurance Company will undertake to pay £x00 on Midsummer Day, 1952, and on Midsummer Day, 1952, and each year afterward; until 1950, or 38 payments in all; for £x,000 the annual premium would be £x112. 8d., and so on. This table is of particular interest to nurchasers of Leasehold property, as it enables such purchasers to see, at a glance, the amount to be paid out of the meome from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
if you hear to the left you are sure to go right.
If you bear to the right you go wrong.
But in walking the streets 'tis a different case,
To the right it is right you should steer.

But in walking the streets 'tis a different case, To the right it is right you should steer, On the left should be left enough of clear space For the people who wish to walk there.

THE WALKER'S MANIMS
(From The Times, April 9, 1930).
Two rules the walker must obey
If he would reach his home to-day
On Roadway always keep the Right
On Footpath just the op-po-site

G BUCKSTON BROWNE

THE RULE OF THE ROAD AT SEA

Two steamships meeting.
 When both side-lights you see ahead,
 Port your helm, and show your RFD.

- 2 Too steamships passing GREEN to GREEN, or RED to RED, Perfect safety—Go a head '
- 3 Two standings crossing
 It to your standoard RED appear,
 It is your duty to keep clear,
 Fo act as judgment says is proper,—
 To Port—or Starboard—Back, or Stop her.
 But when upon your port is seen
 A Steamer's standoard light of GREEN,
 There's not so much for you to do,
 For GREEN to Port keeps clear of you.
 Both in safety and in doubt,
 Always keep a good look-out;
 In dauger, with no room to turn,
 Ease her—stop her—go astern.

CALCULATED EXPECTATION OF LIFE.

The following table (extracted from the Registrar-General's Return for England and Wales) is based upon the Census of 1921, and deaths for 1920-21-22 (English Life Table No. 9).

The xgax Census in Scotland showed longevity both of males and females less than England and Wales at all ages, ranging from 254 years and 3 23 years at bittle to fractions of a year at later ages, but while at every age women's longevity exceeds that of men in Scotland the excess is much less marked than in England

In Ireland up to zex, when the last Census was taken of the whole country as one, the longevity of males up to ze and over \$\frac{1}{2}\text{ years was less than in England, but between zegs zeg and \$\frac{1}{2}\text{ years was less than in England, but between zegs zegs and \$\frac{1}{2}\text{ years was less than in England, over than in England. Of females the Irish longevity was consistently less than that of England, except for the zees 55 to 75, when they exceeded the English averages. The Census taken in Northern Ireland in xyze, after zey years interval, and five years later than the English Census, showed remarkable improvements over that of xyx as regards longevity, and zean high figures for males of 55 and over were repeated, though less prominently. England having improved in the decade of years xyx xyx xyx.

526 Close Times for Game—Seasonable and Unseasonable Fish.

CLOSE TIMES FOR GAME.

IN each case the dates are inclusive :-

Black Game-Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

*Grouse-Dec. zz (Dec zo, Scotland) to Aug zz.

*Partridge—Feb. 2 to Aug. 31. *Pheasant—Feb. 2 to Sept. 30.

*Ptarmigan-(Scotland only) Dec. zz to Aug. zz. It is also unlawful (in England and Wales) to kill the game marked * on a Sunday or Christ-

mas Day. In England and Wales, hares, rabbits, wood-cock, snipe, quall, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those

is, under the Wild Birds Protection Acts, 1880 to 2008, from March 2 to July 32 both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares, but by an Act passed in 1898 the sale of hares or leverets in Great Britain is proof hates of leverets in Great Britain is ploid hibited from March 1 to July 31 inclusive under a penalty of a pound. The first Monday in November is the recognised date for the opening of the for-hunting season, which continues tall the following April. Otter-hunting lasts from nud-April to nud-September. The period for laws In Scotland the same remarks apply to deer-huntingo statking varies f deer and hares, to the first four brids, and to ze to October zs for stags, and fould duck. The close-time for all these birds to the end of March for hinds, deer-hunting or stalking varies from about August zz to October zz for stags, and from November zo

SEASONABLE AND UNSEASONABLE FISH.

different kinds of edible fish mostly in use are "in season" and "out of season"

THE following table shows the periods when the ifferent kinds of edible fish mostly in use are in season "and "out of souson". It is season "sad "out followed by the fish are then the fish are the fish are the fish are the fish are then the fish are then the fish are the

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and It is illegal to take fresh-water cravfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the

(d) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) For the first six months the bulk of our

season, and are to be had almost all through the London supply of shrimps comes from the Nether-year, even though they have been laid down in lands, but Dutch shrimps are far interior to the English beds for temporary storage.

both from Grisner to Hover.

PROGRESS IN MOTORLESS FLIGHT. It generally takes two or three years for any new sport to settle down into some semblance of new sport to settle down into some semblance of properly supervised orderliness. There is a spate of enthusiasm at the outset, which may continue as a flood, or degenerate into a mere trickle according to the success with which the new sport overcomes its initial difficulties, and survives its various ordeads. This has been the case with gliding, which, although not a new sport, has recently received a new lease of life, are tallight and a reverse arrivers. particularly in 1930 when, following various demonstrations by German experts, it again attracted attention in Great Britain. "Booms" are often to be mistrusted, and sometimes the mere fact that hundreds of thousands of people find a new common enthusiasm is sufficient eventually to kill it, but it can be said quite eventually to kill it, but it can be said quite safely that the gliding movement has now become firmly established in Great Britain. Although during the past twelve months the angle of approach has been considerably changed there is little doubt that the enthusiasm has by there is notice doubt that the chiminism has by no means waned, and in some respects considerably increased. This is particularly so with regard to the outlook of the average Gliding Tub. When the spectacular feats of Heir Ktonfeld and other German pilots first began to create a and other corman phots must began to create a desire for emulation amongst young air-minded people in this country, many thousands of young enthusiasts suddenly discovered that they wanted to glidle, and they focked to join the numerous glidling clubs which came rapidly into existence. When they had succeeded in keeping a primary type glider in the air for a fraction of a second they were very pleased with themselves, but too large a proportion of them failed to follow up their success and to qualify for the certificates which can be obtained when advanced training has been completed. It is on this latter aspect of gliding instruction that the clubs have now been concentrating attention. This is all to the good, for it is obvious that in order to keep pace with gliding developments in other countries, particularly on the competitive oncer countries, particularly on the competitive side, Britain must have an ample supply of fully qualified glider pilots. It must be explained that the popularly accepted term 'gliding' does not give a complete idea of the possibilities of motorless flight. Its really advanced form, and undoubtedly its most important aspect, is what is known as sailplaining There are three outstanding classes of motorless aircraft: (1) The Primary Glider: (2) The Secondary; and (3) the Sailplane. The two former types are mostly used for instructional purposes, whilst the third type is used for cross-country work, by pilots who have obtained their "C" certificate. Thee certificates, "A," "B" and "C," are obtainable after tests have been successfully passed under legulations laid down successfully passed under regulations laid down by the Royal Aero Club, and during the past year a greatly increased number of these cortificates have been obtained by gliding pupils in Great Britain. There has been a particularly notable increase in the number of "C" class pilots, whereas at the end of last year they represented a very small number. The Gliding Clubs, too, have now settled down on sound lines, and many new ones have come into existence. The movement in Great Britain is controlled by the British Gliding Association, of which Lieut. Col. Shelmediue, the new

late Sir Sefton Brancker, who was a staunch friend to British gliding, and did much to help the movement. The past year has been one of much experi-mental effort, and good progress has been made in this direction. The technical side of gliding has received more attention from the Gliding clubs, many of which now possess a valuable nucleus of members who have acquired valuable knowledge. Gilder design has naturally progressed, and some of the new types are a great inprovement in performance on those which preceded them. Notable directions in which useful advances have been made are in connection with towed flight and power launching, in connection with both of which much valuable new data has been discovered. Mr. Lowe-Wylde, one of the pioneers of towed flight in England, has been particularly active in experimental work. Many clubs are now training pupils in towed flight, in which a suitable motor car is used to launch the glider into the air, and to keep it aloft. The driver of the car plays a very important part in these operations, and must be specially skilled in the work. Pupils are taught by easy stages, the instructor using a car with dual control, so that he can easily correct any mistake made by either the driver of the car or the pupil in the glider. Power launching is covered by special regulations issued by the British Gliding Association, and has been experimented with in a number of clubs. An interesting gliding event during the year was the crossing of the Channel by Mi. Lissant Beardmore, and Herr Kionfeld, both of whom, however, were towed by aero-planes to a sufficient altitude before being The International Commission for released. the Study of Motorless Flight held a meeting in England towards the end of the year, and the delegates from several countries subsequently saw the first International Gliding competitions take place on the downs near Brighton. These competitions attracted many thousands of spectators Foreign competitors were present. and some of the English competitors flew gliders of foreign design. The Distance Flight for the de Haviland Cup was won by Mr. G. M. Buxton, of the London Gliding Club, on a "Professor" glider, with a flight of 500 yards. Mr. Buxton was also successful in the cross-country flight for the Wakefield Trophy, with a distance of three miles. Soon after this event started a heavy fog descended on the countryside and Mr. Buxton and two other competitors were lost in it for some time. They all succeeded in landing safely and thus proved the safety of gliding even under such unfavourable weather conditions A large number of other interesting events, designed to test the skill of the many pilots who had entered, also took place, including spot-landing competi-tions, figure of eight contests, rig and fly contests, and a club aggregate event. The wind was too light on both days for a really successful was two fight on both days for a really successful meeting. A number of new sallplanes were demonstrated at this meeting and showed considerable advance in design. Unfortunately the siderable advance in design. Unfortunately the meteorological conditions did not allow of their performance being fully appreciated, but there is little doubt that by the time the next take international contests take place some excellent British sailplanes will be available. The clubs are now taking up sailplaning seriously and some of them are building their own machines. Progress on the technical side during the year is regarded as satisfactory, but it is certain that the possibilities c of which Lieut.-Col. Shelmerdine, the new Director of Civil Aviation, is the President. In this office Lieut.-Col. Shelmerdine succeeded the

motorless flight have not yet been fully probed. Future progress lies with the enthusiastic experimenters rather than with those who are simply attracted by the fascination of the sport itself, and the numbers of the former are now sufficient lines will go on. Many suggestions have been made which would divert motorless flight from its orthodox course of development. The glider, it is thought by some, might become "the motorcycle of the air" if fitted with a light engine, but the "Rocket plane" experiments in Germany motive possibilities of a novel kind which might nective possionities of a novel kind which impair be applied to the glider. The pioneer-experts, however, are seemingly satisfied with the lines on which they are now working. Some critics make much of the point that gliding has no commer-cial application, but it would seem to be early to argue too nigidly on this aspect of it. At the same time it is equally premature to paint an extravagant picture of the glider being used for purposes which are now fulfilled by other media of passenger transport. At the moment gliding is a sport with a well-developed technical bias and as such it is not surplishing that it makes so strong an appeal. There is no other sport quite like it. Its thrills have no pronounced element of danger, the percentage of accidents being very This fact is as much a tribute to the common-sense lines on which the movement is organised as a proof of the absence of serious risk. The growing international interest in gliding was emphasised by the fact that representatives of ten nations attended the British meeting of the International Commission. The ann of the Commission was lucidly explained by Lord Amulree, the Secretary of State for Air in the then Government, when he said that its object was to secure international co-operation in scientific, technical, seronautical and administrative questions concerning motorless flight, and the exchange of ideas for mutual benefit which would result should help to solve the large number of hitherto unsolved problems

Gliding, considers Lord Amulree, has a very definite contribution to make to the general progress of aviation and to certain branches of technior aviation and to certain branches of technical research, and should do a great deal to popularise flying. One point which cannot be too strongly emphasised in favour of a continued interest in glidling is its value in the training of air pilots. It has been proved that a course of motorless flying reduces the time needed to enable a pilot efficiently to control power-driven should not provide "flying for the million."

Pupils of ordinary intelligence quickly make progress, and once they gain confidence are generally keen to take their "A" certificate. The great need in this country at the moment is the provision of some gliding schools on the lines of the famous German school at the Wasserkuppe, at which, by-the-way, many British pilots have been trained. The training resources of most ordinary Gliding (lubs are obviously limited, and the provision of even one central school of this kind would no doubt be welcomed by gliding enthusiasts in Great Britain. So far, gliding has not made a very pronounced feminine appeal. But there are a number of certificated women pilots in Britain. Most of the clubs, however, have not neglected the social side, which, by the way, has a distinct publicity value, and many of them have ladies' committees to take charge of this aspect of their activities The two-seater glider has made its appearance, and it is not unimportant to mention as an indication of the progress which has been made that at least one plottess which has been made that as least of the gilder of this type has provided hundreds of 'weed "joy" flights for the general public at gliding demonstrations A glider "flying-boat" has also been successfully landed by a speedhas also been successfully landed by a speed-boat. A notable flight in 1931 was that from Hamworth to Chatham and back on thermal currents by Herr Kronfeld. The 12th annual competitions at the Wasserkuppe attracted much attention, and the performances of many young German pilots were proof of striking progress in the science of motorless flight.

AREA AND POPULATION.

Continental Distribution.	English Square Miles.	Estimated Population.
In Europe Iu Asia In Africa In North America In Central America In the West Indies In South America In South America In Uccania	121,512 1,824,550 4,652,000 3,893,020 8,600 12,300 97,800 3,300,000	48,000,000 333,000,000 50,000,000 9,000,000 5,,000 1,730,000 314,000 8,000,000
Total	13,909,782	450,094,000

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere.

EMNOLOGY.—The estimated white population of the Dominions in xgrx was 60,000,000, mainly British and Irish, but pastly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 fite native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, x,000,000 Chinese, and x,000,000 Polynesians, with various other elements, including x00,000 "Red Indians" in Cauada.

RELIGIONS.—Of the total population over

RELIGIONS.—Of the total population over aro,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Julinists, 4,000,000 Sikhs, Jams and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no flundamental law upon which the Constitution of the British Empire rests, but there are three main punciples underlying its administration, viz, self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada; Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the Imperial Conference.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Prime Ministers of the various Dominions, at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1917, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1918 the Conference, which was held concurrently

with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the Premiers' Conference, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923, 1926 and 1939, is as follows: —The Prime Ministers and other Ministers of the United Kingdom, Canada, Commonwealth of Australia, New Zealand, Union of South Africa, the Irish Free State, and New-Coundland, the Secretary of State for India and other representatives of India. The Secretarist of the Conference is provided by the Governments remeasured.

Skiff Government — (x) Great Britain.—
The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the Rittain Government are the King; the Legislature (House of Loids and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament; and the Judicature.

(a) The Indian Empire.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and tepresents the authority of. Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council with a legislature of two houses, the Council state of 66 members (of whom not more than so are government officials), and the Legislative Assembly of 144 members (a6 official and the lemander elected).

(a) Imperial Dominions.—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is

repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's may be controlled by the returned of the Governor a assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspen-sory clause and the refusal of the Royal assent. Subject to such control the parliament of a selfgoverning Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dom'nions may be divided into four classes, according to the way in which they

are governed — (a) Those Many Dominion Status. Where "Dominion Status" is enjoyed the executive is entrusted to political chiefs who are responsible, entrusted to pointical enters who are responsible, not merely or mainly to the Crown, but to the elected legislature of the Dominion. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, the Irish Free State and Northern Ireland. Malta, Southern Rhodesia and Northern Rhodesia have "responsible government,"

but certain powers are reserved.

(b) Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown. In this class may be placed the Bahanas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritins.

(c) Where there is government by a Governor acting with an executive and a legislative rouncil, the councils being nominated by the Crown or a Governor representing the Croten. Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambla, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(d) Wherein both legislative and executive powers are vested in the Governor alone. In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuaualand, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(e) Protectorates The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(f) Spheres of Influence. A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(g) Mandatory Spheres, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by man-date from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish govern-ments of Palestine and Mesopotamia.

SELE-Support.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure,

Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrons attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DRFENCE.—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government. Questions affecting general strategical defence are considered and determined by the Imperval Defence Committee, which co-ordinates the work of the sea, land and air forces. In the Great War of 1974-1978 the Dominions provided Armies or Contingents, which fought in every area and hore a full share of the sacrifices by which victory was achieved. The land and sir forces of the Dominions are maintained at the expense of the Dominions concerned. The amounts provided for Naval Defence in the estimates of the under-mentioned parts of the estimates of the under-mentioned parts of the Empire for the year 1930-31 are as follows:—Great Britain £51,735,000; Canada \$3,500,000; Australia £12,735,633; New Zealand £675,450 (including £125,000 as a contribution towards the Naval Base at Singapore, and £100,000 interest and sinking fund on account of H.M.S. New Zealand); Union of South Africa £78,550. The proportion of expenditure on Naval Defence to the total funder and Evaport trade of these to the total Import and Export trade of these parts of the Empire is as follows: Great Britain 3°04 per cent.; Canada o 15 per cent.; Australia 1°06 per cent.; New Zealand o 77 per cent. Union of South Africa o 043 per cent. Per caput of population the expenditure is, Great Britain or population the expenditure is, Great Britain f1 as 7d.; Canada 36 cents; Australia 3s. 6d.; New Zealand 9s. rd.; Union of South Africa (European population only 10/4d. As regards Colonies not possessing responsible governments, contributions to Imperial Defence are paid to the War Office.

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of the Empire. _This Parliament has, with the consent of the King-Emperor, delegated its legis-iative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretaries of State for the Dominions and Colonies are Cabinet Ministers, their active participation in the government of the nations of the Empire decreasing with the measure of self-government accorded to each. Parliament also exercises a control

over Indian affairs through a Secretary of State.
THE JUDICATURE —The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (see p. 246) consists of such members of the Prity Council as have held or are holding high judicial office, or in aid of administration in the earlier stages of provision being made for the inclusion of repre-algovelopment. Certain capital expenses are sentatives of India and the self-governing Do-also undertaken from time to time by the Central iminous. India and the Dominious have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities (*ee pp. 318-28) and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the Butish Dominions and Colonies, the United States of America, and the German Empire. Ithodes Scholarships are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £400, and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 196, of whom 100 come from the British Empire and 96 from America. Secretary to the Rhodes Trustees, The Marquess of Lothian, C.H., 17, Waterloo Place, London, S.W. 1. Oxford Secretary, Prof. C. K. Allen, M.A., Rhodes House, Oxford

Statistics issued by the Universities Bureau of the British Empire show that the total number of students from overseas attending Universities and Colleges in the United King-Universities and Colleges in the United Kingdom at the beginning of the 1923-30 session was 5,426, of whom 995 are from Africa, 1,071 from America, 2,225 from Asia, 794 from Europe, and 244 from the Pacific. The principal figures are. India, Burma, and Ceylon, 2,246; United States, 621; South Africa and Rhodesia, 521; Egypt 366; Australia, 223; Canada and Newfoundland, 233; Germany, 252; China, 143; West Indies, 240; New Zealand, 128; Russia, 64; France, 63; Japan, 62; Netherlands, 46; Poland, 44; Switzerland, 42; Man, 42, Norway, 32, Hungary, 32; Spain, 30. gary, 31; Spain, 30.
The Davison Scholarships, established in 1923,

have been withdrawn.

Under The Commonwealth Fund (The Fuller Building, 42 East 37th Street, New York, U.S.A.), established in 1918 by Mis. Stephen V. Harkness, there are available for candidates of British descent 40 Fellowships, of an annual value of approximately £600 each, tenable for two years at certain American Universities. They may be awarded as follows.

z. Thirty Fellowships open to men and women, unmarried, under thirty years of age, domiciled in England, Scotland, Wales or Ireland, and graduates of recognised universities therein

2. Ten Fellowships for (a) candidates from the British Dominions, graduates of a University of a British Dominion or Colony, men or women unmarried, under thirty years of age, who have studied, but not necessarily graduated, at a British University and (b) candidates whold an appointment under the British Government, or the Government of a British Dominion, Colony, Protectorate, or Maudated Territory, or the Government of India. They may be single or married, but must not be more than year of award. At least five of these ten Fellowships are open to candidates from the Government Service.

FINANCE. — Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal customs tarins are in most cases the principal source of revenue. The tariffs are gene-rally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obli-gations of Crown Colonies and Protectorates are not in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. Advances so made and still outstanding are shown under the heading "National Debt" (see Index).

Stocks authorised under the Colonial Stock Act 2000 are Trustee Securities, and the price at which some of them may be obtained is shown

on p. 455.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-pro-ducing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and malze, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominions. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mauritius, and beet sugar in Canada and elsewhere Fruit is grown in most of the Dominions and figures largely in the sales of the London Fruit Exchange (Spitalfields). Meat is produced in large quantities in New Zealand, Australia and South Africa. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the USA; coal is also abundant in Australia, Canada, India and South Africa is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia; chemical and mechanical wood pulp for paper-making is extensively produced in Canada and Newfoundland. Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while 70 per cent. of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Guana, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

CAPITAL OF THE BRITISH EMPIRE.-London

(England). Population (1937), 8,202,838.

The Chief Magistrates of the following Citles of the British Empire are designated Lord Mayor (in Scotland, Lord Provost).

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding Magna Carta (zsz.), which secured annual parlia-ments and the equal administration of justice; the Habeas Corpus Act (1679), securing the liberty of the person; the Act of Settlement (1701), providing for the Protestant succession to the throne; the Act of Union with Scotland (1707), the Act of Union with Ireland (1800), the Partia-ment Act (1912), which enabled the Commons to pass certain Acts without the concurrence of the other chamber; the Government of Ireland Act (1920), and the Irish Free State (Agreement)

Act, 1922.
The constituent parts of the British Constitu-

tion may be thus briefly described :

- z. The Sovereign.—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the "The King can do no wrong " is a maxim of the Constitution, and consequently no action for civil wrong will he against the Crown A petition of right will, however, enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General against the Attorney-General.
- z. The Legislature.—Parliament consists of two Houses, the Lords and the Commons.

(a) The House of Lords consists of peers A peer (a) The House of Lords consists of peers. A peer may hold his seat by (x) hereditary right, (a) creation by the King, (3) official position or election. English bishops (a4), Irish peers (a8) elected for life, and Scottish peers (a6) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(b) The House of Commons.—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies Practically all persons over at years of age are qualified to vote at elections. The maximum duration of Parliament is five years Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies

- 3. The Executive The Crown (the King in Council) "makes peace and war, issues charters, Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (see page 169). The Cabinet has no corporate existence. Ministers cannot has no corporate elastence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.
- 4 The Judicature.—(a) England and Wales.— The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament reculon presence by both Rouses of Parliament Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in Rouse but the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench at the Assizes. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury Courts of criminal jurisdiction in England are: (x) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," see p. 248) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman. The recorders of certain cities and boroughs have a jurnsdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipenof a) reast two justices of the peace of a stipendary magistrate. (4) The Court of Crimmal Appeal has power to hear appeals against convictions and sentences.

- (b) Scotland.—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland, consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 254) exercises func-tions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and jus-tices of the peace have jurisdiction in petty CO GOG
- (c) Northern Ireland.-The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

RELIGIONS AND LANGUAGES.

Religions and Languages.—The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was diseasellisted in Ireland in 1859, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, and estimated figures for 1929 will be found on p. sec. The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts are being made to revive the (lacic language in the Irish Free State. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 7,069 persons speaking Gaelic only (Ross and Cromarty 3,435, Inverness 3,223, Argyll 335, other counties 170, and 137,149 speaking Gaelic and English at the Census of 1931.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various local Government Boalds in xgxg). The subjects which local hodies administer are, under alia, education, the poor law; public health; police; the control of the sale of intoxicating liquors, the provision of lunatic sayluns. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each Wates there are receive countries for each City and Borough (under Lord Mayors) or Mayors), and for Urban and Runal Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

POLICE.

The strength of the Police force was 58,080 in England and Wales (1930), 6,613 in Scotland (1939), and 2,877 in Northern Ireland (1939). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office The LONDON POLICE consists of the City Police and of the Metropolitan Police. The City Police district comprises an sists of the copy some an area of 675 statute acres, and contains two courts of justice, those of the fundhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p 251). Although the area is comparatively small, the rateable value is enormous. The night population is a 806, but the day (or working) population is a 806, but the day (or working) population is a 806. tion is 10,896, but the day (or working) popula-tion is 436,72x. The Force under the Com-missioner comprises 1 Assistant Commissioner, missioner comprises i Assistant commissioner, a Superintendeuts, 7 Chief Inspectors, 25 Inspectors, 27 Sub-Inspectors, 25 Sergeants, and 983 Constables, also 18 Constables on private service duty. The City of London Police Reserve (Headquarters, Bunhill Row, E.C. 1) numbered

3,266 all ranks in Oct 1931.

The Metropolitan Police district embraces an area of 447,526 statute acres, with a population of about eight millions. There are within this area fourteen Police Courts (see p. 252). The Force on Sept. 5, 1932, consisted of 33 Superin-

tendents, 668 Inspectors, 2,963 Sergeants, and 17,012 Constables, making a total of 20,696, with 17,018 Constances, making a total of 20,000, with a 424 horses. The strength of the Metropolitan Special Constabulary Roserve and its Auxiliary Force on Sept. 5, 1931, was 21,545. The gross Special Constanuiary Roserve and its Auxiliary Force on Sept. 5, 1921, was ar,545. The gross expenditure of the Metropolitan Police and Metropolitan Police (curts for the year 1920-31 was £8,479.958. On March 21, 1921, there were 13,810 Police pensioners, and 1,340 pensioned widows and 459 children.

Changes in Taxation (Original Budget).

The following Changes in Taxation were proposed in the Budget:

posed in the Budget:—
INCOME TAX.—Income Tax (Schedules B, D and E) at present payable in two equal instalments on January x and July x to be payable as to three-quarters on January x.

PETROL AND MOTOR CYCLES—Petrol—The duty on petrol raised from ad. to 6d. a gallon (to yield £8,300,000 in a full year). Light Motor Cycles—Annual tax of xgs in lieu of the present 30s. on light motor cycles, to encourage the manufacture of a new type of light machine.

LAND VALUES.—The Finance Bill to provide for a tax of xd in \pounds on capital land value: tax to be levied for 1933 34 and subsequent years.

EXCHANGE ACCOUNT—£30,000,000 taken from the dollar exchange reserve during the War and amounting to £33,000,000.

THE REVISED BUDGET.

On Sept zo, 1931, amended Budget proposals for 1931-32 and for 1932-33 were introduced in the House of Commons by Mr. Snowden, Chancellor of the Exchequer in the National Ministry The Chancellor was faced with deficits of £74,479,000,000 for the financial year 1933-33 and £170,000,000 for 1932-33. To meet these deficits the following proposals were made:—

Proposals.	1931-38	1932 33.
Economies	£22,000,000	£70,000,000
Savings on Debt— Amortisation New Taxation—	13,700,000	20,000,000
Inland Revenue (Direct) Customs and Excise	29,000,000	57,500,000
(Indirect)	11,500,000	24,000,000
Total Estimated Surplus	£76,200,000 £1,521,000	£171,500,000 £1,500,000

Economies.

The proposed *Economies* (£ss,coo,coo in 1931-32 and £70,coo,coo in the complete financial year 1932-33) are summarised as under.—

Reduction of Salaries (Ministers, M.P.s., Judges, Civil Servants, and Members of Defence Services)	£4,534,000
Defence Services (Material, &c.)	5,000,000
Education (Salaries and Grants)	10,300,000
Do. (University Grants)	150,000
Health Services	1,850,000
Police (Pay, &c.)	500,000
Agriculture	655,000
Forestry	478,000
Empire Marketing Board	250,000
Colonial Development Fund	350,000
Unemployment Grants	500,000
Unemployment Insurance :	300,000
Reduction of Expenditure	25,800,000
Increased Contributions	
	10,000,000
Road Fund	7,865,500
Miscellaneous	2,500,000
Total Savings	£70,032,500
W	

New Taxes (Direct).

Standard Rate of *Income Tax* increased from 48 6d. to 58. in £ and readjustments made in allowances. Increase of *Surtax* by to per cent.

New Taxes (Indirect).

l'ax on Beer raised by zd. per pint and on Tabacco by \$d. per lb. Petrol tax increased by zd. per gallon. Entertainment tax raised by zd. on each \$6d\$. and extended to include \$6d\$. tickets.

MONETARY GOLD.

IN a written Parliamentary reply (Ma) 5, 1930) the Kinancial Secretary to the Treasury (Vir Pethick Lawrence) stated that the monetary gold supply of the world at the end of 1929 was estimated, in a Memorandum appended to the first Interim Report of the Gold Delegation of the League of Nations, at \$11,779,000,000, equivalent to £2,297,000,000. This includes an amount "in circulation," in the sense of being outside the reserves of central banks and Treasuries, estimated at \$756,000,000 (£155,000,000), but this is very conjectural.

The gold held in the countries named in the question at the end of 1929 and at the latest available date was (in £ millions):—

Country	December, z929	Aprīl, 1931
United States France Germany Italy	880'3 335'1 56'1 147'7	969 0 447'7 115'1 57 4 146'3

The proportion of gold to currency in circulation (exclusive of subsidiary coin) was (in millions):-

Country.	Currency	Gold.	Proportion per cent.
United States (\$) France (fr.) Germany (rm.) Italy (lire) Great Britain (£)	77,231 3,685 14,797	4,716 55,616 2,348 5,313 146.3	72.0 63.7 35.9 41.8

GOLD PRODUCTION.

THE Annual Production of Gold, for the as years 1905-1929, is stated below from figures issued by the Bureau of the Mint, Washington, D.C., U.S.A. In 1929 the chief producing countries were Unum of South Africa, \$215,243,881; United States, \$44,514,300; Dominion of Counda, \$39,861,664; Russia, \$20,671,835; Mexico, \$13,475,411, Australia and New Zealand, \$12,096,438, Southern Rhodema, \$11,593,034

based on the statutory income of the year xest-8). The Bur Tax is in effect year 1927-8). The Bur Tax is in effect a deferred instalment of Income Tax payable on January x after the end of the Income Tax year. Thus the first payment of Sur Tax was due January 1, 1930, and was the deferred instalment of Income Tax for the year 1928-9.

Sur Tax for the year 1930-31 (payable January 1, 1932), is at the following rates plus 10% of each rate on persons whose total incomes exceed £8,000:— For every £ of the first £500 of the £ s. d.

the excess For every £ of the next £1,000 of For every £ of the next £2,000 of

the excess

For every £ of the next £s,000 of of the excess.....

For every £ of the remainder of the excess

Notes on Income Tax. Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's

income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employed two terms not previously used in connection with the Income Tax, viz., "assessable income" and "taxable income."

"Aussesable Income" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income

as computed for Income Tax purposes.
"Taxable Income" means that part of the
"assessable income" upon which income Tax is actually charged, that is, the "assessable moome less the various deductions referred to below.

less the various dedictions referred to leilow.

Deduction in arriving at Assessable Income.

Earned Income Allowance.—The differentiation
in favour of "earned" income is made by deducting one-fifth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £300 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

An allowance is made of one-fifth of the total An allowance is made of one-fifth of the total income (from whatever source) of persons of the age of §5 years and upwards whose total income does not exceed £500. This allowance is granted, in the case of a married couple, where either the husband or his wife, living with him, has attained the age of §5 years at the commencement of the year of assessment, but the joint total income must in such a case fall within the prescribed limits. Provision is also made for meaning the provision in the present of the pres scribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption. - Exemption from tax may be claimed where the total assessable income does whose wife is living with him, $£z_{50}$. Where the income is wholly earned, these limits are equivalent to £135 and £187 10s. respectively. See above.

Deductions from Assessable Income in order to

arrive at Taxable Income .- Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." The deductions may be claimed irrespective of the amount of the taxpayer's total income

Personal allocance may be claimed of £zco, or, in the case of an individual whose wife is living with him, £zso.

Wyfe's Earned Income.—When a taxpayer's

total income includes any earned income of his

total income includes any earned income of his wife, the personal allowance of £150 is increased by a sum equal to four-fifths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's for Widow's) House-keeper taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (see below) is given or in the causetty of a house-leaf with the charge in the causetty of a house-leaf with the charge and care of any child or adopted child of his in respect of whom the deduction for children (see below) is given or in the capacity of a house-keeper or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person

employed for that purpose. Deduction in respect of Widowed Mother, &c., taking Charge of Children —A deduction of £50 may be claimed, under certain conditions, by an Unmarried Person who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (see below) is given.

children or adopted children (see below) is given.

Deduction for Children.—A deduction nav be
claimed in respect of each child, step-child, or
adopted child under the age of a years, or who,
if over that age, is receiving full-time instruction
at any univarity, college, school, or other
educational establishment. The deduction
allowable is £go in respect of each additional child for whom
the relief is due. No deduction is, however,
allowed in respect of each and child or adopted child allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £50 a year. Deduction in respect of Dependent Relatives.— A deduction of £33 may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, (b) his wife indicated or (b) his or his wife's widowed mother, whether or (s) his or his wire's windowed mother, whether incapacitated or not, or (c) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (a) or (b) is conditional, however, upon the income of the dependent relative not exceeding Go a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income rates of tax chargeable on the taxable income (i.e., that part of the income on which tax is actually charged) apply, whatever the total amount of the income. For the year ending Apr. 5, 1232, the first £175 of the taxable income is chargeable at 2.6d. in the £. The remainder of the taxable income is chargeable at the standard rate of tax, i.e., at 32. in the £. Helief in respect of Life Assumes Premiums.—Where allowance is due in respect of premiums and for Life Assumes of the contracts for

paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the from the amount of tax arrived at unon the preceding paragraph, and calculated at following rates:—one-half the standard rate in the \mathcal{L} on the amount of the premium paid on policies on the amount of the premium paid on policies taken out since June sa, 2016, irrespective of the claimant's total income; and on policies taken out before June sa, 2016, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,200, of three-fourths of the standard rate in the £ where his income exceeds £1,200 and does not exceed £1,200, and at the standard rate in the £ where his income exceeds £1,200 and the standard rate in the £ where his income exceeds £2,200. income exceeds £2,000

INVENTORY DUTY, see ESTATE DUTY.

LAND VALUE TAX .- In respect of all land in Great Britain there will be charged in respect of the financial year ending March 31, 1934, and each subsequent year a tax at the rate of one penny for each pound of the land value of every land unit. The Finance Act 1931 imposes on the Commissioners of Inland Revenue the duty of ascertaining the land value of every such land unit and indicates the method by which the valuation is to be made. For the purpose of the charge to the tax the land value is to be reduced either (a) by an amount equal to four times the annual value for income tax purposes or (b) by an amount equal to seveneighths of the land value of the unit-whichever is the less.

Where any land unit comprises agricultural land a "cultivation" value is also to be ascertained and the amount by which the tax is reduced is either the amount of the cultivation value or the amount calculated as above which would be allowable if no cultivation value was shown, whichever is the greater.

Certain exemptions are granted in respect of land owned by the Crown, National Trust, railways, &c., and also, under certain conditions, land used as playing fields.

If the aggregate amount of tax payable in respect of all the land units owned by one person does not exceed ten shillings he is entitled to relief from the tax.

-The quota payable by each Parish as fixed in the year 1798 (less the amount redeemed), is raised by an equal pound rate, the rate of Assessment not to exceed 1s. in the £. Where the income of the owner of the the f. Where the income of the owner of the land (when not a body of persons, corporate or incorporate) does not exceed fife he is exempt from payment of land tax, and if the exempt from payment of tank ext, and it the owner's income does not exceed £400 one-half of the tax is remitted, but he must claim this relief before payment of the tax.

LOCAL GOVERNMENT FINANCES.

In addition to the State Revenue and Expenditure large amounts are received and expended by Local Authorities in Great Britain, The estimated total collected from ratepayers and expended by Local Authorities being :-

Service	England & Wales.	Scotland
Poor Relief Education		(xgs8 sg) £4,858,000
Police	10,300,000	5,307,000 1,073,000
Other	89,500,000	10,680,000
Total	. £168,500,000	£81,918,000

The gross rental of Rateable Hereditaments in Eugland and Wales in 1927-38 was 5278,384,347 the rateable value being 5278,382,828, and the assessable value under the Agriculture Rates Act 2923, £258,879,292.

Payments to Local Taxation Accounts. In the financial year 1930-31 Rayland and Wales received £295,838, and Scotland received a total of £30,898.

LOCAL GOVERNMENT DEBTS.

In addition to the National Debt there are considerable amounts outstanding as Loans of Local Authorities. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, transways, waterways and other purposes. On March 31, 1938, there were outstanding loans in England and Wales to the amount of £1,121,225,965, against the total the sum of £6,20,20,407 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capital-246,000 ized amount of outstanding ross and capital-ized a furifier in Scotland (on March 21, 1926) £329,930,000 March 31, 1927) £16,479,299.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at \$5,600,x86,68; of which \$4,x86,68; was to be repaid at once in cash and the balance funded at 3 per cent. for to years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent. in 6e years. Interest is payable on June 25 and Dec. 25 in each year at the rate of 3½ per cent.

for the first 10 years, and 4 per cent. thereafter, to include the sinking fund. A "Table of Total Indebtedness of Foreign Governments to the U.S. Treasury, July 1, 1930" (p. 776 of Complete Edition) shows a "Funded Indebtedness" from Great Britain of \$4,336,000,000 at that date, a decrease during the twelve months since July 1, zeen, of \$28,000,000.

OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices. &c. On March 31, 1931, these liabilities stood at £129,391,936, an increase of £42,418,947 upon the total for the previous year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to

creditors of hankrupt estates.

Loans Guaranteed by British Government .-The Nominal Net Liability of the State in respect of losus guaranteed by the British Government was stated on March 3r, 1931, to be as follows:—
Turkish Loan, £2,497,594; Egyptian Loan,
£3,994,400; Greek Loan; £3,613,600; Mauritius
Loan, £3,7,19; Transvaal Loan, £13,229,595;
Sudan Loan, £1,245,400; Welsh Church Loan.
£3,27,391; Local Loans, £424,953,322; Irish
Land Purchase Stock, £137,340,768; Ulster
Savings Cortificates, £1,443,969; 124% per cent.
of the Austrian Guaranteed Loan, secured on the was stated on March 3z, z93z, to be as follows :gress receipts of Austrian Customs and Tobacco monopoly; Palestine Loan £4,449,626; and Tanganyika Loan £2,070,000.
Unrepaid Advances.—Against these Guaran-

teed Loans may be set the amounts remaining unpaid on March 3t. 1931, on account of Advances made by Great Britain to various Governments, made by Great Britain to various Governments, viz:—Crele, £40,000; Kenya and Uganda, £9,508,509; Uganda, £767,272; Nyasaland, £928,000; Persia, £245,000; Nauru and Ocean Islands, £771,286; Tanganyika, £3,37,200; Somaliland, £278,000; Northern Rhodesia, £75,500; Dominica, £26,000; Nigeria, £363,568, British Guisna, £50,000.

The Sinking Fund.

Reductions in the Debt by means of a sinking fund were first made in 1875 by Sir Stafford Northcote, who set up the New Sinking Fund, consisting of the balance of the Annual Charge after providing for interest and cost of management. That term was afterwards applied to the fund set up by Mr. Baldwin in 1903; but has again been transferred to the 1908 Fund. The Old Sinking Fund, was the application of the surplus revenue of any year for the redemption of debt when so determined by Parliament. Debt reduction is also made by means of Terminable Annuities, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable, and by means of the following Funds :-

z. Victory Bonds Sinking Fund, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged, £3,93,681. a. Funding Loan Sinking Fund, £3,341,997 applied in cancellation of Debt in 1928-32.

3. Conversion Loan Sinking Fund, £15,692,131 applied in purchase and caucellation of £12,764.761 in 1930-31.

11 1930-31.

4. 4 per cent. Consols Sinking Fund, under which £20,043,392 was applied in cancellation of £21,322,829 in 1930-31.

5. Other Sinking Funds. Issues from the Consolidated Fund. £14,765,985 applied in Debt reduction in reconstitution.

reduction in 1930-31.

6. Depreciation Fund, under the Finance Act of 1917, by which sums are issued by the Ex-chequer and are applicable to the purchase for chequer and are applicable to the purchase for cancellation of 5 per cent. War Loan 1929-47 at a price below 95, and of 4 per cent. War Loan 1939-48 at a price below par. (£186,751.000 of 5% Stock and £21,920,900 of 4% Stock had been op purchased up to March 31,1930; no purchases could be made in 1930-31.)

7. Payments for Death Duties, under Section 3 of the War Loan Act, 1939, amounting at

the War Loan Act, 1919, amounting at arch 31, 1931, to £13,021,557 cash and March 31, 1931, to £117,302,511 securities.

National Debt Redemption Fund.

Very slowly the National Fund, established for the purpose of eventually redeeming the National Debt, grows from the voluntary gifts and interest on invested funds. The audited balance sheet, as at December 32, 1930, of the Fund (of which Messrs. Baring Brothers and Company, Ltd. a, Bishopsgate, E.C. a, are the Trustees) shows the following net additions during the year:—Donstions Lacs 7s. 7d., profit on investments realised £3,560 ox. 5d., and income £41,838 8s. xxd. The amount of the Fund on the 3xst December, 1930, amount of the Fund on the 31st December, 1932 was £520,465 gs. 6d. Under the proxisions of Clause 30 of the Finance Act, 1938, the Fund is exempt from Income Tax. The Fund was constituted on November 10, 1937, with a gift of £499,878 4s. 11d., and forty-seven persons added £12,705 8s 11d. in the following year. There is also a further sum of £5,000 that will pass to the Fund at the conclusion of certain life interests. This National Fund has no connexion with the Government-it is a purely voluntary movement to lighten the debt burden of posterity, but not that of the present generation unless there is an undreamed-of accession of funds. It was the expressed hope of the original donor that his contribution should serve as the nucleus of a very large fund.

Against the External Debt of £1,066,668,363 owing on March 31, 1921, may be set the amounts owing to Great Britain by certain of the British Dominions, and by various Countries in Europe. The amount owed to Great Britain far exceeds

The amount owed to Great Britain in: exceeds the External Debt, and the total Assets have a nominal value of £3,403,619,803.

The amounts remaining unpaid, and the estimated value of Investments made by the British Government in various Loans and Junertakings, and the state in the control of the control o were shown below (as on March 31, 1921, prior to the aunouncement of the Hoover Plan);—.

Dominions and Colonies.

Interest was paid on all these Loans, and in the case of Australia, New Zealand and Trinidad an annual Sinking Fund:—

WIDOWS' AND ORPHANS' AND OLD AGE (Contributory) PENSIONS.

Under the Widows', Orphans' and Old Age Contributory Pensions Act, 1929, which came into force on January a, 1930, pensions are provided for all widows over age go of men of the insurable class who died or attained age so before January 4, 1928, when the Widows' Orphan' and Old Age Contributory Pensions Act, 1929, came into force. The date of commencement of these pensions was July 1920. pensions was July 1, 1920, in the case of those widows who were over 50 years of age on that date, and January x, regs, in the case of those then between the ages of gg and 6c. A further provision extended the time during which the Pre-Act "widows pensions awarded under the regs:

1925 Act remain payable, while provision was also made to allow pensioners to continue to draw their pensions and insured persons to preserve their reights to pensions by becoming voluntary contributors after migration to the dominions. The remaining provisions of the new Act were mainly directed to amending the provisions of the rest Act in order to do away with certain restrictions affecting the award or payment of pensions.

The following table shows the number of persons who came under the Acts on October,z,

GREAT WAR PENSIONS.

FRESH applications for compensation in respect of disablement claimed to be due to service in the Great War can no longer be entertained, since the period of seven years from the date on which the claimant's active service terminated, or the date fixed (August 31, 1921) as the end of the Great War, whichever is the earlier, has now expired in all cases.

While this is the statutory position, it has been made known by announcement in the House of Commons and elsewhere that except

ional cases, in which clear evidence is produced that an ex-service officer or man is suffering substantial incapacity caused by his war service in respect of which for good reason no claim was made within time, will be investigated with a view to the grant of appropriate compensation.

DISABLEMENT PENSION.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury or disease attributable to or aggravated by war service. Such temporary award usually runs for a period of 12 months, and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, rest and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

At March 31, 1931, out of some 485,000 pensions in payment to disabled officers and men, about

425,000 were final awards.
Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at too per cent., and the lowest degree entitling to pension is so per cent. Where the disablement is assessed at less than xoo per cent. the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a private 50 per cent dis-abled would receive 50 per cent. of the full rate of pension and 50 per cent. of the full rate of allowances for wife and children (if eligible).

allowances for wife and children (if eligible). Disablement assessed at less than so per cent. is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks. The Great War Pensions expenditure during the year ended March 31, 1933, ago, amounted to about \$52.875,000, and for the current year ending March 31, 1933, is estimated to amount to about \$50.051.000. This will bring the aggregate expenditure of the Ministry of Pensions since 1927, and of the Service Departments from 1921 to 1921. and of the Service Departments from 1914 to 1917, together, to £1,016,000,000.

RATES OF PENSION.

The following are some of the principal rates of weekly pension for a private soldier zee per cent, disabled, and of pensions or allowances for dependants of a private soldier;— Private—40s.; wife's allowance res.; child-ren's allowances—7s. Ed. for first child and 6s.

for each other child; (if there is no wife, zos. for the first, 7s. 6d. for the second, and 6s. for each other child).

Widow-over 40 or with children 26s. 8d.; under 40 and without children 20s.; allow-

ances for children 10s., 7s. 6d., 6s.

Parents—need-pensions not exceeding 20s. Provision is also made for other dependants. A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding ses. a week.

The Ministry of Pensions provide courses of treatment for disabilities accepted as attributable to or still aggravated by service, and if in and to or sell aggravated by service, and it is consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances. In the course of its fourteen years of work the

Ministry of Pensions has spent on medical treatment and its accessories about £59,900,000, and another £36,300,000 in special allowances to the patients and their families, during the treatment, in addition to their ordinary pensions.

NUMBER OF FIRST AWARDS.

Officers and Nurses—From the beginning of the War to March 31, 233, the following awards of retired pay or pension were made to officers (Navy, Army and Air Force) and their relatives, and to Nurses .-

Officers 60,725
Widows 12,301
Children 13,405

('hildren of Widows 4x0,542
Motherless Children 16,417

Other Dependants 417,763 PRINSIONS AND ALLOWANCES IN PAYMENT

(on March 31, 1931). The following were the approximate numbers of pensions in payment as at March 31, 1931 :-Officers 23,850

" Children 5,600 " and Nurses' Dependants . 5,175

The following allowances were also in payment as at March 31, 1931:—
Men's l'inal Weekly Allowances
Allowances for Men's Wives and

Children 255,100 Allowances for Children of Men's Widows, etc.....

80,400

UNEMPLOYMENT INSURANCE ACT.

The Unemployment Insurance Act of reso, which had the effect of increasing the number of state insured workpeople from about acce, see to ra, see, see, imposed a statutory condition that a claimant for benefit should condition that a claimant for benefit should have paid in all not less than recontributions, and subsequent legislation raised the qualification to 30 contributions in the s years preceding the date of claim. This condition (known as the "first statutory condition") however, has in fact, at no time been operative, as a long succession of Acts have been introduced to postpone from time to time the date of its enforcement, and since the Act of zos7 only 8 contributions in the previous a years or 30 contributions at any time have been required in respect of "transitional" benefit, i.e., benefit paid when the main statutory condition has not been compiled with.

When the Act of rose came into operation the Unemployment Fund had a credit balance of over £22,000,000, but after only 8 months had elepted the reserve was exhausted and recourse

and increasing deficiency, and Act after Act has been passed to raise the limit of the amount which might be advanced by the Tresury. to meet the deficiency. The Act of March, 1930, was passed largely in the hope that by lifting the burden of "transitional" benefit from the Fund to the Exchequer, the Fund would in future be able to meet the ordinary benefits for an increasing number of claumants, but the increase in the number of unemployed continued at an unprecedented rate throughout the whole of the year 1930, until by Christmas, out of 12,400,000 workpeople insured against unemployment in Great Britain and Northern Ireland, there were 2,725,000 on the registers of employment exchanges (of whom about two-thirds were wholly unemployed and the remainder temporarily stopped or only in casual work). At that arily stopped or only in casual wors). At timet date about x person out of every g insured was unemployed, or double the corresponding ratio at the end of 250. An analysis undertaken for the Royal Commission on Unemployment Insurance showed that of the total number of claimants for "transitional" benefit on January eligibled the reserve was exhausted and recourse ance showed that of the total number of to borrowing commenced. The cost of "tran-claimants for "transitional" (or "uncovenanted" benefit as it was stional" (or "uncovenanted" benefit as it was say, 1931, 1931, nearly half of the men and more than known earlier) has left the Fund with a heavy half of the women had paid no contributions

No benefits in respect of dependants were payable until November, pay, when the Unemployed Workers lependants Act came into force produing for a weekly benefit of as for an edult and as for a child dependant. Young persons, aged as and under at, who receive additional benefit for a dependant, receive the full adult rates, as well as the dependant's allowance.

allowance. These rependant's allowance made in rates of contribution and benefit.

in the preceding ra months, and nearly three-quarters of both man and women had paid less than 3 contributions during the period. During the year rage, the total contribution income to the Fund amounted to £45,845,000, while ex-penditure (including "transitional" benefit £16,78,000 amounted in all to nearly twice the contribution income. At the end of rage the Fund was in deficiency to the extent of £59,90,000, and it was still necessary to borrow heavily in 1921 for which purpose Acts were passed in March and July raising the borrowing limit to £50,000,000 and £115,000,000 respectively. Apart from the changes in rates of contribu-tion and benefit the National Economy Orders of October, 1921, embodied the following important

tion and benefit the National Economy Orders of October, 292, embodied the following important changes in administration of the benefit:— Ordinary benefit is limited to so weeks in a benefit year (a reversion to the practice in force before the 1927 Act which removed this limit, after which the claimant, until qualified by further employment, would be entitled to "transitional" pay in respect of which all claimants were to be required to satisfy a needls test before a public assistance authority.

Note.—When the yield of whent per acre differed from the average for the 30 years 1893-1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between o's and o's bushel, the year has been noted as "Slightly above (or helow) Average"; when between o's and x 5 bushels, as "Decidedly above Average" or "Deficient"; when between x's and x's bushels, as "Good" or "Bad"; when between x's and x's bushels, as "Very good" or "Very bad"; and when above 3'5 bushels, as "Extremely good" or "Extremely bad." * From April x, 1933, the figures of Imports include imports (if any) into Great Britain and Northern Ireland from the Irish Free State, but exclude the direct foreign trade of the Irish Free State.

Production per Acre.

The production per acre of cereal crops, roots and hay in the year of the outbreak of the War, and in 1930, is shown in the following table:—

In rear there was a stoppage of production for 88 days, ending in a settlement on June 28, 1921. In 1926 there was a stoppage of produc-tion from May 1 until Nov. 20.

Home Consumption of Coal.

In a normal year about 200,000,000 tout of coal are available for home consumption. Railway locomotives require about 14,000,000 tout ; gas works 17,000,000 tons; coke production 17,000,000 tons, of which about half (with 1,500,000 tons) is consumed by blast furnaces; colliery engines require about 17,000,000 tons, and coal miners receive about 6,000,000 tons; electrical generating stations require about 7,000,000 tons, and coasting ships require over 1,000,000 tons and coasting snips require over 1,666,660 tons; in addition, about 40,000,000 tons are used for domestic heating and cooking, and over 70,000,000 tons for manufactures. In the six months (Jan.-June), 1933, atcamers and motor vessels used 7,055,000 tons of coll and 200,755,000 gallons of oil fuel.

N B—The above particulars relate to registered trade unions in Great Britain only, and include unions of employers of which there were & in 2529 with Funds of 529, 334. The total number of Trade Unions, registered and unregistered, in Great Britain and Northern Irolland (mployees only) at end of 1299 was 1,114, and their membership was 4,833,000.

Trade Unions and Politics.

In a written reply to a question in the House of Commons in January, 232, the Minister of Lalour (Rt. Hon. Margaret Bondfield) gave the following figures :-

Total amount subscribed to Political Funds of all Trade Unions making returns-

Year	Registered	Unregistered.	. Total.
1924	£ 146,176		£246,276
1925	154,514	*	¥54,5¥4
х9жб	137,006	*	137,006
1927	136,692	•	x36,69a
1928	200,489	£69,612	170,101
1929	107,034	50,632	257,666

Before 1908 Unregistered Unions were not required to make returns.

Bankruptey Statistics.

England and Wales (1989).

The number of debtors adjudicated bankrupts was 3,929, with liabilities 1/5,859,366, and assets £2,537,253; of composition as 29, with liabilities £225,098, and assets £22,016; of administration

Great Britain Industrial Socs. Workman's Compensation, do. 574

orders for detended debtors estates 44, with liabilities £1:8,355, and assets £7,325. In siddition, there were 2,572 assignments, composi-tions, &c., under deeds of arrangement, with liabilities £5,362,495, and assets £2,462,527.

Scotland (1989).
The number of sequestrations in Scotland was \$16, with liabilities £790,681, and assets £99,237.

£99,237.

Northern Ireland (1939).

The bankruptcies numbered 29, with liabilities \$39,975, and assets £35,321; deeds of arrangement 53, with liabilities £39,477, and assets £45,882; arrangements under the control of the Court 45, with liabilities £39,931, and assets £25,775.

Industrial and Provident Societies.

* It is not generally known that associations for tat is not generally known that associations re-cearing on any industry, business or trade may be registered under the Industrial and Provident Speicites Acts, and when so registered enjoy, among other advantages, the privileges of limited liability. In his report the Registrar of Friendly Societies who administers these Acts says:

"A society, established to carry on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and obtain the privileges of incorporation with limited liability, provided that it restricts the interest which any mention may have or claim in its shares to £300, and if it carries on the business of banking, that its share capital is not withdrawable.

At the end of 1929, 5,853 societies were registered; they had a total membership of 7,270,836; and their balance sheets showed total assets (omitting inter-society investments) valued at 221,868,000. The societies registered at the end of rosp were classified by the Registrar as

follows :

Number of Societies.	Share Capital	Balance of Undis- tributed Surplus and Reserves
	£	£
z , 3 0g	206,255,237	16,771,397
20	9,734,694	7,302,114

COMMUNICATIONS.

Roade

The total mileage of public roads in Great Britain is approximately 177,000 miles, of which 152,000 are in England and Wales and 25,000 in Scotland. The cost of maintenance and improvement in 1914-15 was £18,800,000, and in 1928-29 £57,342,643. The roads of Great Britain have 597,342,543. The roads of Great Britain nave been classified by the Ministry of Transport, and out of the total mileage of 177,000, 26,400 (approximately) have been included in Class I,

and 15,900 (approximately) nules in Class II.

The maintenance and repairs of public roads is within the jurisdiction of the "highway authorities." Under the Local Government Act, one the local Government Act, ross, county councils in England and Wales as from the appointed day (April 1, 1930), became the highway authorities for all roads in rural districts and all classified roads (i.e. Class I and Class II Roads) outside the county and metropolitan boroughs, together with the main roads, for which the county councils were already the highway authorities prior to the appointed day. These roads are known as "county loads" and are now a county charge, although district councils in many cases continue to carry out the actual work of maintenance and improvement. The borough and urban councils are the highway authorities for roads other than county roads which lie within their areas. In Scotland under the Local Government (Scotland) Act, 1989, the county councils are the highway authorities in respect of all roads outside the boroughs, and in respect of all classified roads boroughs, and in respect of all classified roads in horoughs with a population of less than so, one except the botough of Arbroath. All boroughs remain highway authorities in respect of their unclassified roads. The Act provides that the functions of the County Council in regard to highways may be partially exercised by Committees or by the Town Councils of small boroughs in accordance with an administrative subsequent appointed by the County Council to scheme submitted by the County Council to and approved by the Secretary of State for and approved by the Secretary of State of Section Section The motor licence duties (referred to below) are paid into a Road Fund which is administered by the Minister of Transport. Grants are made from the Road Fund to highway authorities towards the cost of maintenance and improvement of roads and bridges. During the year 1930-32 the grants from the Road Fund amounted to £27,372,123. The bulk of this morey was directed to assisting highway authorities in the maintenance and improve-Under ment of classified roads and bridges. the Local Government Act, 1929, the grants hitherto made out of the Road Fund towards the maintenance of classified roads in London and the county boroughs and of unclassified roads in counties have been discontinued as from April x, 1930, and a sum corresponding to these amounts, together with an additional contribution, is paid out of the Road Fund towards the block grants to local authorities for which the Act provides,

The total gross receipts from the taxation of road vehicles between December z, 1929, and road vehicles between December x, 1989, and November 30, 1930, amounted to £37,040,384.

The approximate number of motor vehicles licensed during this period was x,260,500, while licenses in respect of private and hackney horse-drawn carriages numbered 53,015. The average receipt in respect of a whole year licence was £13 186. 6d. for cars taxed on horse-power, from street accidents in Paris.

£2 138. 6d. for motor bleycles, £36 3s. 6d. for internal combination and steam-driven goods vehicles, £30168. od. for electric goods vehicles and £49_118. od. for motor hackneys.

Railways.

The length of road (first track) of the railways owned, leased or worked by the Companies formed under Part I. of the Railways Act, 1921, at Dec. 31, 1930, was as under:—

Great Western ,, London, Midland & Scottish ,, London & North Eastern ,,	3,804 6,956
Total	19,336

Railways in 1930.

The gross receipts during 1930 from railway working amounted to £184,826,388, compared with £195,400,523 in 1930, a decrease of £10,573,141. The principal figures were:—

1	Receipts for 1930.	Decrease on 1929
•	£	£
Ordinary passengers— third class	46,437,913 46,829,972 15,180,435	2,581,434 3,631,342 1,573,804
fuel	35,592,316	1,950,526

Expenditure on railway working decreased from £151,311,466 in 1939 to £147,595,684 in 1930, a saving of £3.715,782. The operating latio rose to 79.85 per cent. in 1930, compared with

rose to 79°85 per cent. In 1930, compared with 77'43 per cent. in 1930. The total net receipts of the railway and ancillary businesses in 1930 were £38,044,598, compared with £45,071,208 in 1930, a decrease of £7,026,630. The decrease occurred mainly in net receipts from railway working, which fell from £44,098,057 in 1930 to £37,240,698 in 1930 The net revenue for the year 1930 amounted to £43,072,356, which compares with £49,321,739 in 1930. The amount appropriated for the payment of interest and dividends in 1930 was £43,740,671, compared with £48,325,050 in 1930 These figures represent 3.68 per cent and 413 per cent, respectively upon the total capital

receipts.

The total number of ordinary and workmen's journeys was 1,217,285,700, a decrease of 18,936,832, or 1°53 per cent', compared with 1929. The total number of season tickets (equated to an annual basis) was 779,031. a decrease of 1,871. The total number of passenger jounneys, including season ticket holders on the basis of 600 journeys per annual ticket, was thus 1,684,704,300, a decrease of 20,049,432, or 1°18 per cent, compared with 1929. Receipts from passengers decreased by £3,225,379, or 4°57 per cent, the higher ratio of decrease being attributable to the extended use of cheap fares.

The total tonnage of goods and minerals (excluding companies' free-hauled traffic) conveyed on all railways was 304,35x,107 tons, compared with 329,578,743 tons in 1929, made up as follows:

1930	Decrease
	Tons
53,225,630	4,349,414
57,846,551	7,026,839
00	00.
	13,841,383
	Tons 53,225,830

The total number of live stock conveyed was 15,116,280, compared with 27,700,803 in 1293. The passenger and goods road vehicles operated by the four amalgamated railway companies showed substantial increases in traffic in 1930 compared with 1293.

Canals.

There are 3.8sg miles of canals and canalised rivers in Great Britain (England and Wales, 5.4x miles; Scotland, 124 miles), no additions to the mileage having been made for several years. In 1930 the inhand waterways carried tonnage (so far as 10tuns are available) as under 1

	Mileage of Canals	Tonnage carried.
Independent	1,234	11,419,861
Railway owned	1,048	1,693,905
Thames	126	22,897
Caledonian and Cunan	70	99,121
m		
Total	2.478	12 225 nR.

A Royal Commission on Transport reported in 1930 that, in spite of their limitations, cauals and inlaud navigations form a useful component of the national scheme of transport, and that properly intenalised and developed they can be made to render much useful service to the community in the future. The Manchester Shy. Canad. opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1992 the tonnage carried through the canal was 6,588,559 tons, and in 1930 the tonnage of toll-paying traffic was 6,290,625 tons, and the tolls, dues, &c., £1,395,557.

Tramways.

The total mileage of transways and light railways open in Great Britain on Dec. 31, 1929, was 2,323. The total receipts un 1929 were £26,769,000, the working expenses £21,26,000 and the net receipts £5,613,000 (pross) and £56,005,000 (net).

Acting and interests in the London Traffic Area. The Bill was held over at the Dissolution of Palliament.

Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the Nate "from time immemonal." The telegraphs were transferred to the State on Jan 38, 3870; the telephoneservice became exclusively owned and operated by the Government (with one or two minor exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan 3, 3912. The submarine telegraph cables connecting the British Isles with the various Dominions and most Foreign Countries except the Continent of Europe are maintained and operated by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

For full conditions, exceptions, &c., see Post Office Guide, pp. 840, published Jan. and July, price 1s.

Parcels.

girth combined, 6 ft. GENERAL REGULATIONS.

UNPAID PACKETS (letters, newspapers, post-

cords) are charged double postage on delivery; UNDERPAID PACKETS, double the deficiency, REDIRECTION.—(3) By agent of addressee: Letters, post cards, printed papers, and naivepapers may be reposted free not later than the day after delivery (not counting Sundays and public holidays), and must not have been opened or tampered with. Parcels may be redirected free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being for the whole London Postal District being for this purpose one Town Delivery Area), otherwise they are charged at the ordinary prepaid rate. Rejistered packets, which must be taken to a Post Office, are re-repartered free only up to day after delivery. (a) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Requests for re-direction of letters, &c., must be on printed forms, obtainable from the postmaster or postman, and signed by the persons to whom the letters are to be addressed. Reducction is free for remonths: thereafter costs 1s. for each surname months; thereafter costs 1s. for each surname for second, is third, and is each subsequent year. Separate forms must be filled in for parcels, and for the (postal) forwarding of telegrams.

EEGIFTATION.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. Parcels (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. Fee 3d. exclusive of postage. Advice of delivery, a further 3d. The latest time for registering is usually half an hour before the latest time for registering is usually hair an hour before the latest time for posting ordinary packets; at Head Offices, if open, this may be done later for 6d. late fee. Unregistered packets containing coin or jewellery, or found open and containing stamps, uncrossed bearer cheques, uncrossed postal

orders without payee's name, &c., 10s. or more in value, or any marked "registered" and found in a letter-box, undergo compulsory registration (8d.), earrying no compensation.

COMPENSATION for loss or damage is granted though not as a legal right even if fee is paid and packing adequate.—The fees for com-putation inclusive of registration are:—Fee \$\frac{1}{2}\$., compensation up to \$\int_{\infty}\$\$ is \$\frac{1}{2}\$. \$\int_{\infty}\$\$ and \$\int_{\infty}\$\$ for each additional \$\int_{\infty}\$\$ 20 up to the maximum 1s. 11d. for \$\int_{\infty}\$\$ 400. Compensation up to \$\int_{\infty}\$\$ is given on (a) unregistered purels (for loss, only of certificate of posting is obtained at the time of certinate of posting is obtained at the time or posting), (b) unregulatered packets conveyed by Express Delivery Service No. (1). Compensation in respect of money of any kind (cons. notes, orders, cheques, stamps, d.c.) is only given it particulars (for identification) are kept and the money is sent by Regis-leved Letter Post in one of the special envelopes sold officially (see next page); the maximum compensation for coin is 5. Compensation for pecialist, vacles, de., is only given on registered packets; for glass, crockery, greases, colour-powders, fish, meat, fruit, and vegetables only when sent as parcels. Compensation is not given for damage to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (a) fragile articles hy registered letter post, nuless conspicuously marked "Fragile, with care."

CERTIFICATE OF POSTING unregistered parcels, free; other unregistered postal packets, 1/d.

EXPRESS DELIVERY SERVICE BY SPECIAL MES-SENGER.—There are five services of which (4) and (5) alone are available on Sundays:—(z) All the way, from most offices which deliver telegrams. Inclusive charge, which must be prepaid, in stamps, 6d. per mile, or part of a mile, with 1d. on each separate packet after the first, up to ten, the maximum; also a special charge of 3d. on each packet over x lb. in weight, Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, inquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland tele-gram gratis. (a) After transmission by post, at sender's request: (a) from the ordinary delivery office, if open for telegraph business (maxinum charge in London &d.); or if so marked, (b) "Express Delivery from Head Office" in large provincial towns, and (c) in London "from Head District Office" or "from G.P.O." Packets must be marked "Express," and letters bear a broad vertical line back and front. Charges as for (z) (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) see to very ten ress actuations packets. (4) see p. 500. (5) Of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges).—Waiting fees: 20 minutes free; each additional is minutes or part thereof, 2d.—For Sundays and Holidays, see pp 590-1, and next paragraph.

RAILWAN LETTERS.—An unregistered letter up to zos., taken to a Parcel or Booking Office of most railways while station is open, week days or Asandays, is sent of by next train or steamer to a station or port on any of these railways. Fee within 6t. Britain, or thesice to Jersey, Guernsey, Donglas I.M., or chief Irish ports, 3d., to other Irish places 4t. Unless marked "to be

called for," it is posted in the nearest letter-box at station of address, but (secopt on Sundays and an LF.X) can be delivered Express (from usual office, or first Express office it reaches) under Service sa, or (by wiring for messenger to meet it at station) under Service.

DISPOSAL OF UNDELLYBRED POWTAL PACKETS—Inlend packets chargeable with a postage of 14d. or more undelivered, are returned to sender without charge, if his address is found either outside or inside. Packets without sender's address or any enclosure of importance are destroyed except parcels hich, if not applied his aid case is cound to the process hich, if not applied his aid easier of the parcel of the process hich, if not applied his his are dealt with as requisite. Packets chargeable with postage not exceeding id are redelivered to sender only on payment of a second postage, and if name, address and request for return appear on outsite, those without such request are disposed of. British packets mudslivered abroad are returned to sender here on payment of charges due; printed papers only if return is requested. Magazine Pot packets are charged with return postage. For parcels see p 385.

return postage. For parcels see p \$85.

Posts Restarts (solely for the accommodation of strangers and travellers and for three months only.

Wholly unpaid packets are stopped. Regulations as to packing, writing, &c., are much similar to those for inland packets. Small Packets must be easily examinable.

Parcels from abroad.

These are subject to British Customs examination, and duties (with 6d. fee, or 1s. if they exceed 10s.) must be paid before delivery.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., must be) unarred for many countries, but not registered. They are subject to Customs, and contents and value must be declared on and contents and value must be declared on special forms; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs is given to British goods in parts of the Empire) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value of the water callected from declared value, otherwise they are collected from addressee. Packing must be substantial, and sometimes special kinds of packing are insisted upon. Certain articles are prohibited: among them letters nearly everywhere.

them letters nearly everywhere.

Delivery in many countries is only to certain towns, post offices, stations, or customs houses, whence addressee, who is notified of the arrival, must arrange conveyance. A delivery fee is sometimes collected from addressee (is cents in U S.A.). In Belgium, France and Spain parcels are mostly delivered by the railway companies. From most countries abroad, an undetwerable purcel as returned without notice at sender's expense, when posting, he instructed either its abundonment or its delivery to some other address or person in the country. Warshouing fees and (travely the foreign customs duty are sometimes payable, the return postage alwars.

customs duty are sometimes produced at always.
Limits.—23 lb.; parcels over 11 lb are only accepted at and for important post-offices, for certain countries (c. f.in table below), cannot be delivered Express, and generally may not contain coin, jewalery, &c. Maximum length generally \$\frac{1}{2}\$ ft., length and girth combined \$\frac{1}{2}\$ ft., but to Portuguess frimer: length 3 ft. length and girth \$\frac{1}{2}\$ ft., but to Portuguess frimer: length 3 ft. length and girth \$\frac{1}{2}\$ ft., but to Portuguess frimer: length 3 ft. length and girth \$\frac{1}{2}\$ ft. slice to China (other than about 1100 chief \$P.0), but a parcel \$\frac{1}{2}\$ in across may be \$\frac{1}{2}\$ in long, except to Sinking Province, where limits are 1 × 1 × 1 ft.

General Regulations: Postage Abroad.

DUTIABLE ARTICLES, except to some countries, must be sent as Parcela, Insured Boxes, or Small Packeta.

REGISTRATION (except for parcels and magasine post) is in force to almost all countries; valuable articles may not be sent in unregistered letters. Fee, 3d. Compensation on registered packets up to £3 is paid for entire avoidable loss while in the custody of a country in the Postal Union (see note † p. 524), if claimed within a year. REGISTRATION (except for parcels and maga-

INSURANCE (including, except for parcels. REGISTRATION) may be effected on packets to many countries at the following rates:—5d for £12; and 2d. for every additional £12 up to £2.11d. for £400. COMPENSATION up to 200. (328. if over 121b.) may be given on unwinsured parcels to or from Newfoundland, India and the exceller according. Forest, with many layer. parties to or from rewoundard, many larger foreign countries, except U.S.A., if certificate of posting is produced. Packets containing no articles but valuable papers (banknotes, etc.) or valuable documents (plans, etc.) (an be insured as letters; other valuable articles should be sent as insured parcels, or as "insured boxes."

DE SERL AS INSUFED PATCELS, OF AS "INSUFED DOXES.

INSURED BOX POST.—Jewellery and similar articles
(not letters, valuable paper, or commercial papers except an open invoice) may be sent in strong boxes by
letter mails to some British dominions (e.g., india and
New Zealand), Europe (except, Noway, Spain and Neur
East), Argentine, Brazil, China, Egypt (not Sudan), and Neur
French colonies, and a few other countries. Floature
27 per loss (minimum 1841.); maximum wedsilled in

18 x 8 x 6 in Cuntoms deciberations must well itself in

12×3×4 in Customs declarations must be filled in Casu or Data we (Parcels).—A reciprocal service exists between Great Britain and various parts of the Empire and certain Foreign Countries, Fees for collection: 4½d. for Trade Uharge (amount to be collection) 4½d. for Trade Uharge (amount to be collected) not exceeding £4. with ½½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £50 (fee & &d.), but in some countries loss (e.g., 1,000 france). Addresses fame as further fee (4d. in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable percols apply INTERNATIONAL EXPERGES ERRICE—Delivery by special messenger of correspondence (locally including parcels up to 11 lb.) to or from certain countries or certain towns in the same. 6d. is paid by the sender, the rest by addressee.

MONEY ORDERS.

ADVICE OF PAYMENT: 2d. inland (and to I.F.S.), 3d. for foreign and colonial orders (to certain countries). Payment may be stopped (fee 4d.); or deferred up to 10 days in case of Ordinary Inland Money Orders.

Inland (and I.F.S.) Ordinary Money Orders.

The poundage charged is, for sums not exceeding £3, 4d.; £10, 6d.; £30, 8d.; £30, 1d.; £40 (maximum), 1s. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (including Income Tax) if authorising document is produced.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which

Money Order from any Money Order omce which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams, and at some other offices. Foundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2d., and cost of official Telegram of Advice. If the order is to be delivered at payee's address, porterage must be prepaid unless it be in I.F.S.

Ordinary Money Orders Abroad.

These, which are payable in nearly all coun-These, which are payable in nearly all countries, should be taken out 1 or 2 days before despatch of mail. Poundage, £1, 6d.; £3, 1s.; £3, 1s. 6d., and thereafter 3d. per £1 or part thereof. Limits of amount, £30, £30 or £40. Limit of validity, 8-12 months.

Telegraph Money Orders Abroad.

Only to certain countries, e.g., to Canada, India and U.S.A., and to certain towns only in others, e.g., Australia, New Zealand, South Africa, Egypt and Pelestine. Poundage as for Ordinary Money Orders abroad, plus cost of official Telescond and the Canada and gram of Advice (at deferred rate if desired, in most British Possessions), plus supplementary fee of 6d for Newfoundland and foreign countries (Cuba 4s. 8d), 1s. for British Empire, Egypt and Mandates (Canada 6d. if telegram is full-rate).

POSTAL ORDERS.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom nearly all post offices in the United Kingdom during the ordinary hours of business on week-days. They are also issued and paid in most British Possessions, Mandates, and Postal Agencies (not Australia). They are paid (but not issued) in I.F.S. and at 55 Canadian offices. They are issued, with a counterfoil, for every multiple of 6d. up to 20s., and for 2is. Poundage: 6d. to 2s. 6d., 1d.: 3s to 15s., 1½d., 15s. 6d. upward, 2d. The name of payee must be inserted. They must be presented for navgnet within They must be presented for payment within 8 months from last day of the month of issue, or a fresh poundage will be charged. Adhesive, a fresh pointage win be charged. Addesive, unperforated British Postage Stamps may (except for Canada) be affixed to the face of an order in spaces provided (z or 3), to increase its value by 1, 2, 3, 4 or 5 pence.

TELEGRAMS.

Inland.

Telegrams may be handed in at a telegraph office, or, if prepaid and enclosed in envelope marked "Telegram," posted (without stamp) or handed to a rural postman. Rate, 12 words marked "Telegram," posted (without stamp) or handed to a rural postman. Rate, 12 words or less 1s. (to, from or in Irish Free State 1s. 6d.), each further word 1d.. The address is charged for. Original or redirected telegrams, or replies, sent on Stendays and (exc. Scotland) Good Friday, or Christmas Day are charged 6d. extra (prepayable). Replies may be prepaid up to 48 words; the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1d. Certified copy 6d., sometimes more "The charge includes delivery within 3 miles (1 in Irish F.S.) of the nearest telegraph delivery office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S.) by addresses. Usual hours 9 a.m. to 7 p.m.; larger offices 8 a m. to 7, 7.30 or 8 p.m. (see below and p. 590). For Sunday and Holidays, see above, below, and pp. 591-2.

ABBRYIATEP ADDRESSES, registered for 62 per annum, appear grats in Sell's Directory (& & 9 Johnson s Court, Fleet Street, London, E.C. 4).

Dilitary is an Triefform (a) if address is telephonic (exchange, number and town or county if needed count as a words only). (b) if "Telephone" (not charged for) precedes full telegraphic address, where exchange and number are unknown to sender; (c) if convenient to the Pot Office, unless (i) subscriber has otherwise directed, or (ii) "Private" (charged one word) precedes telegraphic address

LAYR FREE.—A telegram may often be got through from an office which is open to one closed for telegraphic business by payment of the following fees. Is for telegraphist, is for messenger, and 6d an hour for telegraphist is the has to want reply Postmasters may also accept telegrams after the usual hours on payment of is, for the postmaster, is for the telegraphist, and is for a messenger if it be necessary to call the telegraphist

telegraphic offices, are closed. Many stations send railway letters (p. 58s), and telegrams at train times. There is a collection and night despatch in most towns. Expuss Druven (Germon a for Provincial Head offices), and the state of the

carrier, in S. & E England Fee 1s, nesides postage and usual express fees (calculated in London as from G.P O — 8d. to 8s. 8d).

Evrices Dillver by messenger of a telephoned message (Service 5, p. 8s) is on Sundays restricted to the London Services of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of the Service of Se Telegraph offices nearly all open 9 to 30,30 a n and generally at the same hours, if any, as on Sunday evenings. PUBLIC HOLIDAYS in Scottand: Telegraph mostly as usual, other husiness as English Bank Holidays on delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, MO., PO., &c., business, hours as on Sundays.

Wireless Telegraphy.

Post Office as Licensing Authority - By the Wireless Telegraphy Acts, 1904-26, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships the United Anguom of on load pittins single in territorial waters except with the Postmaster General's licence. By the Wireless Telegraphy Order 1908, the provisions of the Wireless Telegraphy Act 1904 apply to British Ships whilst on the high seas. The Merchant Shipping whilst on the night seas. The necessary simplifies Telegraphy) Act, 1919, made it compulsory for all British seasoning ships over 1,500 tons to carry wireless apparatus. The Post tons to carry wireless apparatus. The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators for the Postmaster General's Certificate.

Ship and Shore Service.-The ship and shore stations of the Marconi Company and Lloyds, stations of the Marconi Company and Ladyue, 10 in number, were bought by the Postmaster General in 1900. The service has since been reorganised and now comprises 13 stations, viz.—Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portishead, Portpatrick. Rugby, Seaforth, Valentia and Portpatrick. Rugby, Seaforth, Valentia and Wick. Portishead Radio affords (a) world-wide communication with ships equipped with short-wave sending and receiving apparatus, and (b) communication up to a range of about 2,000 niles with ships equipped with long continuous wave-sending and receiving apparatus. Rugby Radio can transmit radiotelegrams to ships

equipped with long-wave receiving apparatus. The range is world-wide, but ships are not in a position to reply to this station. A public tele-phone service between cortain Transatlantic Liners and telephone subscribers in Great Britain and certain Continental countries is also afforded through Rugby Radio.

Anglo-Continental Wireless Services. — Post Office wireless services have been instituted side by side with the cable services to the following Continental countries:—Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, Rumania, Latvia, Finland and Russia. The services with Italy, Hungary, Rumania, Estonia, and Danzig are carried on vid the Leafield Station (near Oxford). The latter station is also used for the transmission of news and commercial intelligence intended for simultaneous reception in several European countries. A medium-power transmitter at the Rughy Station is also used for the services to Czechoslovakia and Poland

Super-power Transmitter at the Rugby Station. This transmitter uses power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of British Official news messages, Meteorological Office, reports and Greenwich Time Signals, and for transmitting radio telegrams and news messages to ships at sea.

Beam and Omni-Directional Wireless Stations -The privately-owned wireless stations in this country at present carrying on commercial services with other countries are owned and operated by Imperial and International Com-munications Limited. They consist of the munications Limited. They consist of the Marconi Short Wave Wireless Beam stations at Bodmen, Bridgwater, Grimsoy, Skegness, Dor-chester and Somerton, the high-powered omnidirectional station at Carnaryon, and the medium-power omun-directional stations at Ongai and Brentwood in Essex. The Bodmin and Bridgwater and the Grimsby and Skegness Beam stations consist of two groups of two units each, one unit of each group being a transmitting station and the other unit a receiving station. The Bodmin transmitting station and Bridgwater receiving station carry out direct high-speed wireless communication with Canada and South Africa. The Grimsby transmitting station and Skegness receiving station carry out similar communication with Australia and India. The Dorchester Beam transmitting station consists of seven Marconi short-wave Beam transmitters, and is the largest beam wireless station in the world. The Somerton station is the receiving station of this shortwave Beam group, and has eight receivers employed on the same services

All these wireless stations are operated and controlled directly from Electra House, London, the central radio office of Imperial and International Communications Limited.

* Radiotelegrams.

**Hadiotselgrams.

The Addresse of a radiotelegram should contain name of addressee, of ship, and of coast-station to be used. Private messages for H M. Newy may not be sent through Portion head or Rugby radio, and must have in the address. Warship followed by the name of the vessel, or Submarine" (which with identifying letters and figures counts in address as one would. Next must come (ar) if ship be abroad, the name of the coast station fit this is not known, sender should enquire of the

"Radiotelegram," as used in the official Postal Guide, denotes only a message to or from a shiput sea, and includes no other kind of radiotelegraphic message.

Secretary, Admiralty, London by reply-reld telegram or letter, stating when it is proposed to send the message]; if the at zer in the Mediterranean, the only coast station allowed is Rimelin Radio (Maita) (c.-73), if on the China Shation, Seletar Radio (Str. Settlements) and Stonecutters Radio (Hong-Kong) (c.-73), if on the East Indies Station Aden Radio (c.-76) or Maiara Radio (Cevlon) (c.-78), if of South African Coast, Jacobo Radio (Durban), Slangkop Radio (c.-76), if of the Rast Coast of North America: when north of \$\frac{7}{8}\$ N. AIR SERVICES.

The Air Port of London (Croydon Aerodrome, Waddon—Tel., Croydon, 2720), extended under the Air Ministry's improvement scheme, was opened on May 2, 1928. The cost of the station was about £360,000, and the buildings include hangars, offices and a hotel with 50 bedrooms. Airway traffic is controlled from a tower by a Civil Aviation Traffic Officer. Some of the

biplanes in the services operating from Croyden carry 40 passengers and about x,see lb. of luggage, and are fitted with refreshment buffets. Air expresses are subjected to a complete routine inspection before being granted their daily airworthy certificates by inspectors licensed by the Aeronautical Inspection Department of the Air Ministry.

Services Operated by Imperial Airways.

ATR MATIS.

AIR MAIL SERVICES. Details of services, time saved, and fees payable are embodied in the official Air Mail Leaflet which can be obtained free of charge through any Post Office.

At the Imperial Conference of Oct., 1926, the Secretary for Air, Sir Samuel Hoare, laid down two broad propositions:—
(z) That the Empire is in urgent need of better communications.

(a) That their improvement will require a sustained and united effort.

By seroplane or ariship London could be brought within a fortnight of the farthest cities and territories of the Empire. Journeys could be reduced to the following periods:—

educed to the following periods	Dave
'Canada	
India	5
Australia	**

New Zealand..... 13 In April, 1929, a stage of development in the air journey between London and India was marked by the introduction of large passenger aeroplanes for the London—Paris—Marseilles section, transhipping into air boats for the passage over the Mediterranean, and so from Cairo—Baghdad—Basra to Karachi During winter months the route is overland as far as Athens.

SHIPBUILDING, 1930-81.

The total of new tonnage to which classes have been assigned by Lloyd's Register during the twelve months ended June 30, 1931, amounts to 557 vessels, of 1,758,610 tons gross, while the corresponding figures for the year ended June 30, 1930, were 637 vessels, of 1,56,785 tons gross. Plans for 140 vessels, of 1,56,785 tons gross. Plans for 140 vessels, of 1,56,785 tons gross. Plans for 140 vessels, of 1,56,185 tons, were nassed by the Society in the course of the year. These figures are very much smaller than those for the previous twelve months (601 vessels, of 2,62,500 tons) are the lowest recorded since 1932. Of this projected tonnage, 40 are prevent. (236,500 tons) was intended to be built in Great Britain and Ireland, and 59'79 per cent (137,580 tons) in other countries. The countries in which the greater part of the new tonnage classed by Lloyd's Reguster, during the year, has been constructed are shown in the following statement:—

Country.	No of Vessels	Tons Gross
		i -
Great Britam and Ireland	353	z,033,56a

Mercantile Shipping.

On June 30, 1930, the sea-going Mercantile Marine of Great Britain and Ireland had a total tonnage of 20,438,444 gross tons, of which 20,321,920 tons were steamers and motor ships, and 216,524 sailing vessels

Census of Seamen (March 31, 1930).—Total number of seamen employed, 194,633, as under:

Sea trading Vessels,	British	Foreign	Lascars
Steam	12.165	13,479 950 4	48,775 3,997 0
Total	127,518	14,433	52,682

The British Fuhing Fleet.—On Dec 31, 1927, the fishing boats belonging to the United Kingdom, Isle of Man and Channel Islands numbered x4.555 (273,762 net tons) of which 6,283 were sailing vessels (26,412 net tons) and 8,272 steam and motor vessels (247,350 net tons). The estimated number of men and boys em-

ployed in sea fishing in 1929 was 60,034, of whom 53,357 were regular fishermen and 6,677 persons occasionally employed in sea fishing.

Wrecks (World),-The total losses of the World's Mercantile Marine in 1930 are stated to be 39s vessels with a gross tonnage of 425,473 as against 499 vessels (604,703 gross tone) in 1939, these losses (2930) include 246 steamers (339,405 gross tons), 14 motor vessels (38,199 gross tons), 37 auxiliary vessels (7,886 gross tons) and 95 satling vessels (39,923 gross tons).

(British).—In 1929.38 sailing vessels (2,460 gross tons) and roo steam and motor vessels (113,623 gross tons), a total of 147 vessels (116,083 gross tous), were totally lost at sea. In xgao the following lives were lost through wrecks at seafrom sailing vessels, crew 4, passenger ml; from steam and motor vessels, crew 127, passengers mt
—a total of 131 The years with the heaviest cases of life at sea were 1912 and 1914. In 1912 the total of 2,335 included 673 of the crew and 325 passengers on S.S. Tutanne; in 1914 the total of 1,798 included 171 of the crew and 340 passengers on S.S. Empress of Ireland.

Ocean Shipping in British Ports.

Total net tonnage of British and Foreign sailing and steam vessels entered and cleared in the Foreign Trade (with cargoes and in ballast) at all ports in Great Britam and Northern Ireland .-

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England cocupies the southern portion of the island of Great Britain and lies between 95° 45° and 49° 97′ 20″ N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 45′ E. and 5° 43′ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Caiais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornis coast), Wales and the Irish Sea. Total area, 50,851 square miles. Population (1921) 37,334,917.
Retief.—There is a natural orographic division

Relief.—There is a natural originable division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west, culminating in the Cheviot, 2,696 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chaus, running N. by W. to S by E., with their highest point in Cross Fell, 2,330 feet above mean sea level West of the Pennines are the Cumbrian Mountains, which contain in Sonfell Pick (2,326 feet) the highest land in England, and east of the Pennines are the Vorkshire Moore, their highest point being Urra Moon (1,489 feet). South of the Pennines are the Peck of Derbyshire (2,688 feet) and Dartmoor (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), long Mynd (1,674 feet), and Brown Clee (2,805 feet); in Hereford-shire the Black Mountain (2,326 feet), in Monimouthshire the Sugar Loal (2,325 feet), and Monimouthshire the Sugar Loal (2,325 feet) and Cloucestershire contain Cleeve Cloud (2,334 feet). Hydrography.—The Thames is the longest and

Hydrography.—The Thames is the longest and most important river of England, with a total length of are miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (60 miles from its mouth); the Wilts and Berks Avon canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Kton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The Severn is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Tenne and Upper (or War-wickshire) Avon. The Severn is tidal below Gloncester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury the greater part of the river is very picture que and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (x6% miles), which

admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey. The Severn Transel, which carries the Great Western Railway under the river, 14 miles below the Sharpneas Bridge, was begun in 1873 and completed in 1886 (at a cost of \$5.000,000) after many difficulties from flooding, &c. The tunnel is 4 miles 624 yards in length (of which 24 miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ones and Trent from the Pennine Range, the Great Ones (sée miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weld, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lacces are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ullswater and Derwentwater.

Islands.—The Scilly Islands (Cornwall), as miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, population (1921), 1,732. The capital is flugh Town, in St. Mary's. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants fiourishing in the open. The size of Wight is separated from Hampshire by the Solent. The total area is 147 sq. miles, population (1932), 88.400. The climate is mild and lealthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Lowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Varmouth, Totland Bay, Seaview and Bembridge. Lundy Island, 2x miles N.W. of Hartland Point, Devon, is about 1/2 miles long, and x mile broad, with a total area of about 1,050 acres (mainly picturesque), and a population of about 50: it contains the seat of the proprietor of the island and two lighthouses.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 52° in the Sciliy Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and arbinar, while the east region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash. The climate of England is influenced by the much-indented coastline of the west and by the flow of warm water in the Guif Streens Drift, which strikes the S.W. projection and proceeds N. and E. along the west and south coasts.

EARLY INHABITANTS.

Prehistoric Man.—A skeleton found at Galley Hill, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about zooo to 1500 R.C., and a date between these years has been given to Stonehenge (presented by Sir C. H. E. Chubb to the Nation in 1508, and now preserved as a national monument). Stonehenge (ro miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the Goidels, a people of Celtic race, and in the Iron Age another Celtic race of Brythons, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Casar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Loudinium. The British leader from 48-55 A.D. was Caractacus (strictly Caratacus), who was finally captured and sent to Rome. By 70 A D the conquest of South Britain was completed, a great revolt under Boadicea (strictly Boudicca), Queen of the Iceni (Norfolk), being crushed in 6x A D In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Madrian's Wall*, from Wallsend to Rowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about zoo acres was first uncovered in the 18th century at Silchester (Calleva Atrebatum), 10 miles south of Reading, and since 1800 the whole site has been investigated. Four main groups of roads radiated from London. and a fifth (the Fosse) ran obliquely from Ermme Street (at Lincoln), through Leicester, Cren-cester and Bath to Exeter. Of the four groups radiating from London one ran S. E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as Watting South wales, a thru (now known as watting Street) ran through Verulamium (St. Albana) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the Roman Province of Britain from Gaul in the grd century (or possibly earlier), the Bishops of Londinium, Rhoracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash

to Spithead, while about 350 A.D. incursions in the north of Irish (Scott) and Picts became most formidable, and towards the end of the entury many troops were removed from Britan for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabit tants, whose language and customs re-emerged.

Anglo-Saxons and Normans. - The Celtic Britons appear to have called in the Saxons to Britons appear to have caned in the saxons to resist the raids of the Picts and Scots, and eventually the English (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of Welch (old English Waelso = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several king-doms, of which the chief were Northumbria doms, of which the chief were Northumbria (Bernncia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Frinday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England annears to have been converted by the end of appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as Offa's Dike, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was Wessex, with its capital at Winchester, and the greatest of the Wessex kings was Alfred the Great (87z-90z), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th centhe Treaty of weamore (278). In the root century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resust the invaders, and England paid tribute (Danegelf) for many years, and was ruled by Danish Kings from roof to root, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Nor-way) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the Battle of Hastings (or Sautlache) on Oct. x4. x666, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the Norman Conquest all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 49 Administrative Countres (under the Local Government Act of 1888). The boundaries of these Administrative Countles differ in many cases from those of the older Geographical Counties, while the areas of the 72 County Borough's created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, so miles from its outflow into the North Sea.

The City of London represents London within its ancient boundaries. The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance compasies, and mercantile houses, in addition to the Roman Wall, the Norman Tower and the state centry Guildhall, to the messive splendour of St. Paul's, and the architectural beauty of Wren's spires (Row Church. St. Bride's, St. Dunstan's in the East, &c.).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kemisington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of z800, and was created a city by Royal Charter of Oct. 20, 1000, the Council consisting of a Mayor, so Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kemisington Gardens, and from Oxfordstreet to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia. Westminster is the richest of the London areas.

Metropolitan Boroughs.—Under the London Government Act of 1895 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to as Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council —For County purposes the aftairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—For Police purposes the administration is invested in the City Corporation as to the City Police and in the liome Office as to the Metropolitan Police. The authority for the supply of water is the Metropolitan Water Board; while the River Thames is administered as to its tidal portion by the Port of London Authority and above Teddington by the Thames Conservancy, the lighthouse and pilotage authority being Trinity House. The bridges are maintained in the City of London by the Bridge House Estates Committee of the Corporation of the City, and in the remaining area by the London County Council. The London and Home Counties Joint Electricity Authority (5 Millbank, Westminster, S.W.x.) provides (or secures the provision of) electricity throughout an area of x.797 sq. miles. Locomotion is provided by the London county Council as the Transway authority, and by private enterprise as to underground or other railways, &c.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans, it is said, it received municipal institutions which have endured in their main features to the present day. In Saxon times it was, in reality, a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight. means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Blahop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Balliff, which, in 1191, was changed to Mayor, the first holder under the new name being Henry the first holder under the new name being Henry Fitzalwyn, who filled the office for as years. On his death a new charter was granted by King John in 1824, which directed the Mayor to be chosen annually, which has ever since been done; though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of Lordon" (in reality four times A. D. Mayor of London" (in reality four times A D. mayor of London (the relaty four times A 1397, 1398, 1496, 1419); and many modern cases have occurred. The title of Lond Mayor was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant being popularly known as the Lord Mayor's Show.

THE CORPORATION OF THE CITY OF LONDON.

Was famed for its vast conflux of its abundant commerce even in the yof the Christian era. From the is said, it received municipal institutions and its said, it received municipal institutions. Richard II, directed them to be chosen for me. The Common Council, elected annually on St. Thomas's Day (Dec. zz.), was, at an early date, substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. Sheriffs (as well as aldermen) were Saxon officers who usually had charge of a large district. The time of their appointment for London is untime of their appointment for London is un-certain, but they appear in ancient records as early as A.D. 1730. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, how-ever, lost this privilege, as far as the election of Sheriff of Middlessex is concerned by the Local ever, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888; but they continue, as heretofore, to choose the Sheriffs of the City of Loudon. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in

1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance circ. 1219. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk and Common Serieant are mentioned as officers in the charter of Edward II., A.D. 1319; but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1931-1932.

THE CITY GUILDS (LIVERY COMPANIES).

In the majority of cases the designation of the Company gives a cue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (thridle, bit, and spur makers), Poulters (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

9,716 Liverymen of the Guilds are entitled to vote at elections in Common Hall (see p. 604). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the Parlamentary vote in that district.

who have residential or other qualification in the City have the Parhamentary vote in that district.

There are 77 Guilds in existence. The Liveries of the Loriners (390), Stationers (376), and Merchant Taylors (335), are the most numerous, the Fletchers' (as), the smallest.

THE LONDON FIRE BRIGADE. Headquarters: 94 Southwark Bridge Road, S.E. 1.

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries; and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took overthese responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade"

On Dec. 3r, 1930, the complement of the Brigade consisted of:—r chief officer; a divisional officers; 3 assistant divisional officers; and 1,933 officers, firemen, and pilots; a technique.

nical and clerical staff of 189. There were 6x land fire-stations, 3 river stations and x river repairing depot. The appliances included 87 motor fire engines, 74 motor escape vans, 6 petrol-electric motor ladders, 3 petrol motor ladders (in addition to tenders, &c.), 3 hose carts and xxo fire escapes, x long fire ladder, 64 miles of hose, x steam and 3 motor fire floats, 55 smoke helmets, 399 hook ladders and 293 hook belts. There were x,689 street fire-alarm posts, 7 telephone lines from station to station and 365 telephone lines to public and other buildings. The number of calls to which the Brigade responded during the year ended Dec. 31, 1930, totalled 8,308, and the fires numbered 4,619, of which 35 were classed as "serious"

PRINCIPAL OFFICERS.

Chief Oficer, Arthur B. Dyer, A.M.I.G.E.
Divisional Oficers, Maj. C. C. B. Morris, M.C.;
Com. A. N. G. Firebrace, R.N.
Assist. Divisional Officers, Maj. F. W. Jackson,
D.S.O.; C. M. Kerr, A.M.I.G.E.; F. W. Field.

THE LONDON COUNTY COUNCIL.

Offices. The County Hall, Westminster Bridge, S.E. z. and Old County Hall, Spring Gardens, S.W. z.

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday), 9.30 to xs.30 (Saturday).

Meets on Tuesday at 2.30 p.m.

under the Local Government Act of 1888. London is an administrative county, covering an area of

117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, se aldermen, and zz4 councillors, together z45, or, if the chairman be also an elected member or alderman, z44. The term of office for aldermen is 6 years, and ten retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly for 3 years. The councillors are elected uncountry by the ratepayers, and the councillors elect the addermen. The positions of aldermen and country to the term of cillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the re-servation to the Council itself of all questions of principle, and to periodical reports of action taken. In addition to members of the Council co-opted members are included on the following committees: Central Public Health, Education. Housing, Mental Hospitals, Midwives Act and Public Assistance.

Under the Local Government Act, 1929, the Council, as from April 1, 1930, became responsible for the administration of all forms of poor relief in London, including the services previously maintained by the late Metropolitan Asylums Board As required by the Act the Council prepared an administrative scheme for discharging the functions transferred, and the transferred services were merged as far as possible in the Council's existing organisation and allocated to the committees of the Council to which they were appropriate.

The Finance Committee have important statutory powers. No costs, debt or hability exceeding Aso may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-rusing body for all the local authorities in the county, and has a net debt, according to the latest returns, of £80,980,000 (of which £42,708,000 represents debt takings), and an annual expenditure of about forty millions.

The Central Public Health Committee, among other duties affecting public health, are responsible for the treatment of tuberculosis, the diagnosis and treatment of venereal disease, the maintenance of 75 hospitals, with accommodation for over 42,000 patients, and the Council's ambulance service.

The Education Committee comprise thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Education service involves an annual expenditure of about £13,000,000. The Council maintains 2,272 £13,000,000.

THE London County Council was constituted | elementary schools with over 628.000 pupils. and aga secondary and technical schools, evening institutes and training colleges, with nearly 200,000 students. In addition it gives grants-inaid to 122 secondary and technical schools and training colleges.

The Housing Committee perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 27, 1931, in respect of all schemes was £36,618,000, and very large works are still in progress. About 45,000 houses and tenements have been completed since the war.

The Improvement Committee deal with questions relating to the carrying out of street improvements and construction of bridges, tunnels and ferries. Among other works now being carried out are the reconstruction of Lambeth and Chelsea bridges and the widening of Putney bridge.

The Mental Hospitals Committee administer the duties falling on the Council under the Lunacy Acta and the Mental Deficiency Act, 1913, and also the mental hospitals transferred from the Metropolitan Asylums Board. The Council has mental hospitals and other institutions for the care of mental defectives, with accommodation for over 31,000 patients.

The Metropolitan Main Drainage system covers Th. Metropolitan Main Drainage system covers about 198 square miles, including certain districts outside the county, and comprises about 400 miles of main, storm-relief, intorcepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and five sludge vessels. The total capital outfay on main drainage is in progress for a scheme to relieve certain districts from flooding after heavy falls of reinterest of the station of the stations of the station tricts from flooding after heavy falls of rain, and for the installation of plant at the northern outfall for the treatment of sewage by the activated sludge process.

The Public Assistance Committee administer the duties in connection with poor relief, other than hospital treatment, including the maintenance of institutions, receiving homes and training centres, for over xx,000 inmates.

The Council is the Training Authority for Indon The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 165 street miles, all of which are electric lines (123 miles on the underground conduit system and 43 miles on the overhead system). The whole of this great system is worked by the Council, and through-running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted on March 32, 2932, to £28,382,000, and the net debt outstanding to £8,383,000. The results of working for the year 1930-21 were: gross receipts £4,363,566, surplus on working £763,899, surplus for year, after payment of interest or capital outlay and providing for repayment of debt, £31.639, which was carried forward. Amongst the Other Powers and Duties of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; maintenance of fire brigade; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers; town planning; controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licenes; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on motor cars, adg and establishment and certain other local taxation herences, registration of War charities; and welfare of blind persons.

The Expenditure of the Council, including loans to other local authorities, is met by two chlef sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sunking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All horrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at September 30, 1937, was £98,204,521. These figures are exclusive of the issues of Bonds, the amount outstanding at September 30, 1937, being £6,021,775 Local Bonds for Housing.

The Rating for the year 1931-32, as shown by the statement below (which relates to rate accounts only), amounted to 6s, 3d, in the pound over the whole country including the City, and a further rate over the count; outside the City of 2½d. In the pound, together 6s. 7½d. The total rate for 1930-31 was 7s. 2½d. The Assessable Value of the County of London on April 6, 1931, was £59,406,139-a 2d. rate over the whole country producing £447,546.
